**SIZE 96%**

The functionality of a full-size keyboard in a smaller version.

# VOLCANO GAMER 96 BT

## WIRELESS GAMING

MODECOM Volcano Gamer 96 BT is a keyboard that ensures comfort and pleasure of wireless gaming. The freedom from wires is an unquestionable advantage in multimedia entertainment. At the same time, thanks to advanced technology, you can choose the type of connection - via Bluetooth 5.0 module or via 2.4 GHz. Whichever connection type you choose, the fun of your favorite games will last for the best!

# Full-size

# FULL-SIZE KEYBOARD FUNCTIONALITY IN A SMALLER SIZE

98 keys and 20% more desk space thanks to the 96% size. The numbers do not lie - MODECOM Volcano Gamer 96 BT offers the functionality of a full-size keyboard in a smaller size.

96%

TKL

65%

## LIKE A FULL-SIZE BUT 96%

The 96% keyboard with a numeric section is a design aimed not only at gamers.

Thanks to the numerical section, the keyboard will be perfect as a tool for work and study. Any tasks performed in the MS Office environment are much easier to do, especially when it comes to working with numbers.

However, gamers will also appreciate this design. Some of us are used to working with a full-size keyboard, and the ability to control the arrows from the numeric section in some games is an undisputed advantage during multimedia entertainment.

Tablet

Smart TV

PC

## CONNECT 3 DEVICES AT THE SAME TIME WITH A BLUETOOTH 5.0 MODULE

Thanks to the Bluetooth 5.0 module, you can connect 3 devices at the same time. Imagine this convenience when, after playing your favorite game, you take the keyboard, go to the next room and sit comfortably on the couch and use it for the TV.

You can also use the keyboard for study or work by pairing it with a laptop. Just sit back in the chair and work wirelessly in the best possible way.

# USB TRANSMITTER, 2.4 GHz CONNECTIVITY

How simple and convenient it is! Just take the USB transmitter out of the box and insert it into any free USB port on your computer to enjoy wireless connectivity. If you need to take the keyboard on a trip, nothing easier - just hide the USB transmitter in a dedicated place on the bottom of the keyboard.

## THE BEAUTY OF PUDDING

The amazing appearance of the keyboard is obtained thanks to the pudding keycaps. LED RGB backlight "spills" all over the keyboard thanks to "milky" overlays.

The best effect is obtained after dark - this is when the keyboard most often impresses with its appearance. If you like RGB LED lighting, the pudding keycaps will meet your expectations.

## THE MATERIAL MAKES THE DIFFERENCE

The keycaps up to 2/3 of their height are made of translucent milk material. Thanks to this design, the RGB LED backlight gains strength - the translucent material distributes the colors evenly over the keyboard.

If you value aesthetics - pudding keyboards will be a great choice on a gaming desk.

## GAMING KEYBOARD

MODECOM Volcano Gamer 96 BT is a typical gaming tool, although it can handle in any other situation. A keyboard with a numeric section, but in a smaller 96% format, wireless connectivity, Gateron Yellow switches in hot-swap technology, pudding keycaps, RGB LED backlight and dedicated software - everything every player needs here.

# GATERON

GATERON YELLOW HOT-SWAP MECHANICAL SWITCHES

## WHAT ARE GATERON YELLOW SWITCHES?

Quiet and linear Gateron Yellow mechanical switches are perfect for gaming, typing or everyday computer work.

Similar in characteristics to the well-known red switches, they are characterized by 5 g more pressing force, making them a great choice for gaming.

Find out more about the switches in our video:

<https://www.youtube.com/watch?v=Q6hlijkyy34E>

# REMOVABLE SWITCHES HOT-SWAP GATERON

Each switch can be removed and replaced with another. Thanks to this, you can freely configure the keyboard and adapt it to your own needs.

Do you want the most frequently used gaming buttons to have a yellow switch, and the rest to a blue or brown switch? Yes - it is possible and you can do it yourself in a few easy steps. You don't need any special tools for this, and changing the switches is child's play.

## DEDICATED SOFTWARE AND MEMORY FUNCTION

---

The keyboard has a built-in memory, which allows it to "remember" the configured keys, eg in Windows (programmed macros and assigned key functions), and after connecting to a second computer with Mac OS or Linux, you can work with previously saved functions.

## EFFICIENT BATTERY means 100 hours of wireless gaming

A powerful 4000 mAh battery allows you to play wirelessly for 100 hours with the backlight turned off and 2.4 GHz connectivity. Enjoy wireless connectivity for a long time and do not worry about the battery - the keyboard will inform you in advance of the need to recharge it with the red flashing FN button.

## SELECT A PREFERRED CONNECTION MODE

---

At the bottom of the keyboard we put a switch that changes the modes of connection of the keyboard to the computer. Depending on your needs, you can choose:

- Wired connectivity via the included USB-C cable. Connecting the keyboard to the cable charges the keyboard battery.
- Wireless connectivity via a Bluetooth module.
- Wireless communication via 2.4 GHz radio via a dedicated USB transmitter located on the bottom of the keyboard.

## NON-SLIP FEET

---

On the underside of the keyboard, we have placed four non-slip feet, thanks to which the keyboard will be stable even during the most exciting game.

It is also possible to adjust the angle of the keyboard in two steps.

**98 pudding keycaps**  
**98 hot-swap switches**  
**100% of gaming**  
**96% size**

## POWER OF CABLE

---

Although the keyboard works wirelessly, you can also work and play "on the cable" using a 180 cm length rubberized USB-C cable. Thanks to this solution, you are guaranteed instant response time in games and you do not have to worry about the battery level.

# Choose keyboard

Enter the world of gaming and forget about the reality that surrounds you. Use the latest technological solutions and have fun. Or take advantage of its best features and spend a comfortable time while working or studying.

**It's your choice, we only gave you the tool.**

## PLAY, WORK, LEARN, HAVE FUN

Take advantage of its best features for work or study

Despite its gaming character, it will be perfect for everyday use - work, study and even simply browsing the Internet. MODECOM Volcano Gamer 96 BT will be a great tool for any task.

## PUDDING

Pudding keycaps give the keyboard a unique look. They emphasize the decor of the gaming stand in the best possible way.

## HOT-SWAP SWITCHES

Gateron Yellow switches with 50 million click lifetime. Each switch is made in hot-swap technology. The linear nature of the Gateron Yellow switch is perfect for gaming.

## DUAL INJECTION

The keycaps are made in the dual-injection technology. Wear-resistant and easy to replace or clean.

## BACKLIGHT

The backlight color can be freely configured, both from the keyboard and software.

# 10 REASONS WHY YOU SHOULD BUY IT

## 01. SIZE 96%

The keyboard is highly versatile. If you often work with numbers or type, a keypad with a number section will be an excellent choice. At the same time, it is smaller than other full-size keyboards.

## 02. FOR YEARS

Mechanical switches, non-abrasive keys and quality of workmanship - the keyboard will serve for years.

## 03. MECHANICAL

Gateron Yellow switches with 50 million click lifetime. The linear nature of the Gateron Yellow switch is perfect for games.

## 04. HOT-SWAP

All switches are replaceable. Thanks to this, you can adjust the keyboard to your own needs.

## 05. WIRELESS

Wire-free and great comfort - these are the advantages of playing on a wireless keyboard.

# 10 REASONS WHY YOU SHOULD BUY IT

## 06. WORK OR PLAY

The keyboard is universal, but has a gaming character. It will work as a tool for playing, learning and working.

## 07. SOFTWARE

The software can be downloaded from the manufacturer's website - [www.volcanogaming.pl](http://www.volcanogaming.pl)

Thanks to it, you can adjust the keyboard to your own needs.

## 08. PUDDING WITH LED RGB

RGB LED backlight of 16.7 million colors allows you to define the appropriate color under your own preferences.

Delicate backlight, or maybe a full range of colors? It is only your choice. Plus beautiful pudding keycaps. This keyboard is gorgeous!

## 09. LOTS OF FUNCTIONS

Windows key lock and full Anti-Ghosting are useful functions for gaming and work.

## 10. 100 HOURS

A powerful battery provides 100 hours of wireless gaming with the backlight turned off and 2.4 GHz connectivity.

## Gaming and long-lasting character

Gateron Yellow mechanical switches with a lifetime of 50 million clicks allow you to reliably enjoy any virtual entertainment. Due to their design, they ensure the longevity of the gaming keyboard.

The use of high-quality materials and components, the perfect fit of every detail is not only a pleasure to use, but also the certainty that MODECOM Volcano Gamer 96 BT will be a keyboard for years.

## 01. WINDOWS KEY LOCK

Windows key lock prevents accidental pressing of the Windows key. Thanks to it, you will never see a situation where you will suddenly see your... desktop during the most exciting gaming situation. Remember that you decide when to end the game.

## 02. SOFTWARE

Thanks to the software you can record macros and program the keyboard backlight in any configuration. With these features, you can say the keyboard is REALLY YOURS.

## 03. FULL ANTI-GHOSTING

Most keyboards available on the market can detect just a few keys at a time. On keyboards with this restriction, gamers will not be able to use more key combinations that are required in many games. As a consequence, it limits the quality of entertainment and affects the results achieved in games. The keyboard is equipped with an advanced full anti-ghosting function, which gives the user unlimited freedom - with no limit to the number of simultaneously pressed keys. Thanks to it the keyboard is professional tournament equipment.

## 04. RGB LED AND PUDDING

The keyboard is equipped with fully adjustable LED backlight in full RGB palette. You can create your own profiles in which only selected keys will be illuminated (adjusted to a specific game or to your own preferences).

## 05. RUBBER, NON-SLIP FEET

We have placed four non-slip feet, thanks to which the keyboard will be stable even during the most exciting games.

## 06. DUAL INJECTION

The keyboard uses high-quality double-injection keycaps. An overlay made with this method consists of two separate elements: external (translucent) and internal with an overprint. Thanks to this method, the print will not wear off even as a result of intensive use.
