THE SUCCESSOR OF A SUCCESSFUL DESIGN THAT CAN DO MORE.

MODECOM ARIEL 2 is a versatile ATX computer case. Designed in the spirit of modern elegance, the ARIEL 2 fits into any type of interior, both in the office and at home. The spacious interior with a cable management system will accommodate all the components necessary to build a modern computer unit. The ARIEL 2 PC case combines features such as reliability, functionality, durability and elegance in its design.

Compared to its predecessor, it performs even better in the tasks set before it, successfully allowing the construction of an efficient and modern computer.

MODECOM ARIEL 2

UNIVERSAL MEANS GOOD

Elegant design of this PC case will fit into the interior design of a modern office as well as a classically furnished loft. In addition, it is characterized by proven solutions - especially the space on the front panel with the option of installing a card reader or optical drive.

The versatility of the MODECOM Ariel 2 allows you to build a computer for work, study and gaming.

The construction of the computer case is so practical that it will work in any office or home office. The possibility to install a optical drive, large capacity, four USB ports, elegant design - this case has everything you need to work.

FOR HOME & OFFICE

FAN

120 mm fan included

OPTIMAL SOLUTIONS FOR LEARNING, WORKING AND... GAMING

The case has a quiet and efficient 120 mm rear fan installed. If you decide that you need to build a computer that is to prove itself during heavier work or occasional gaming, you can install 3 additional fans on your own (two 120 mm on the front panel and one 120 mm on the side panel). You can install up to 4 fans in total. This computer case is simply ready for all user needs, regardless of the situation.

MODECOM ARIEL 2

GOOD INTERIOR ORGANIZATION

In MODECOM Ariel 2 you can install three 2.5" SSDs or two 3.5" HDDs. Thanks to this, the computer can perform functions not only for learning and occasional gaming, but above all for work with a large possibility of archiving files.

PRACTICAL SOLUTIONS

Front panel has four USB ports, two of which are USB 3.0 ports.

In addition, the front panel has a Power and Reset button, as well as a microphone and headphones input.

ADVANTAGES OF THE FRONT PANEL

The entire plastic front panel, made in the style of elegant brushed aluminum, has been divided into two separate sections. It is completely removable, just pull and remove it. This definitely makes it easier to clean your computer.

MODECOM ARIEL 2

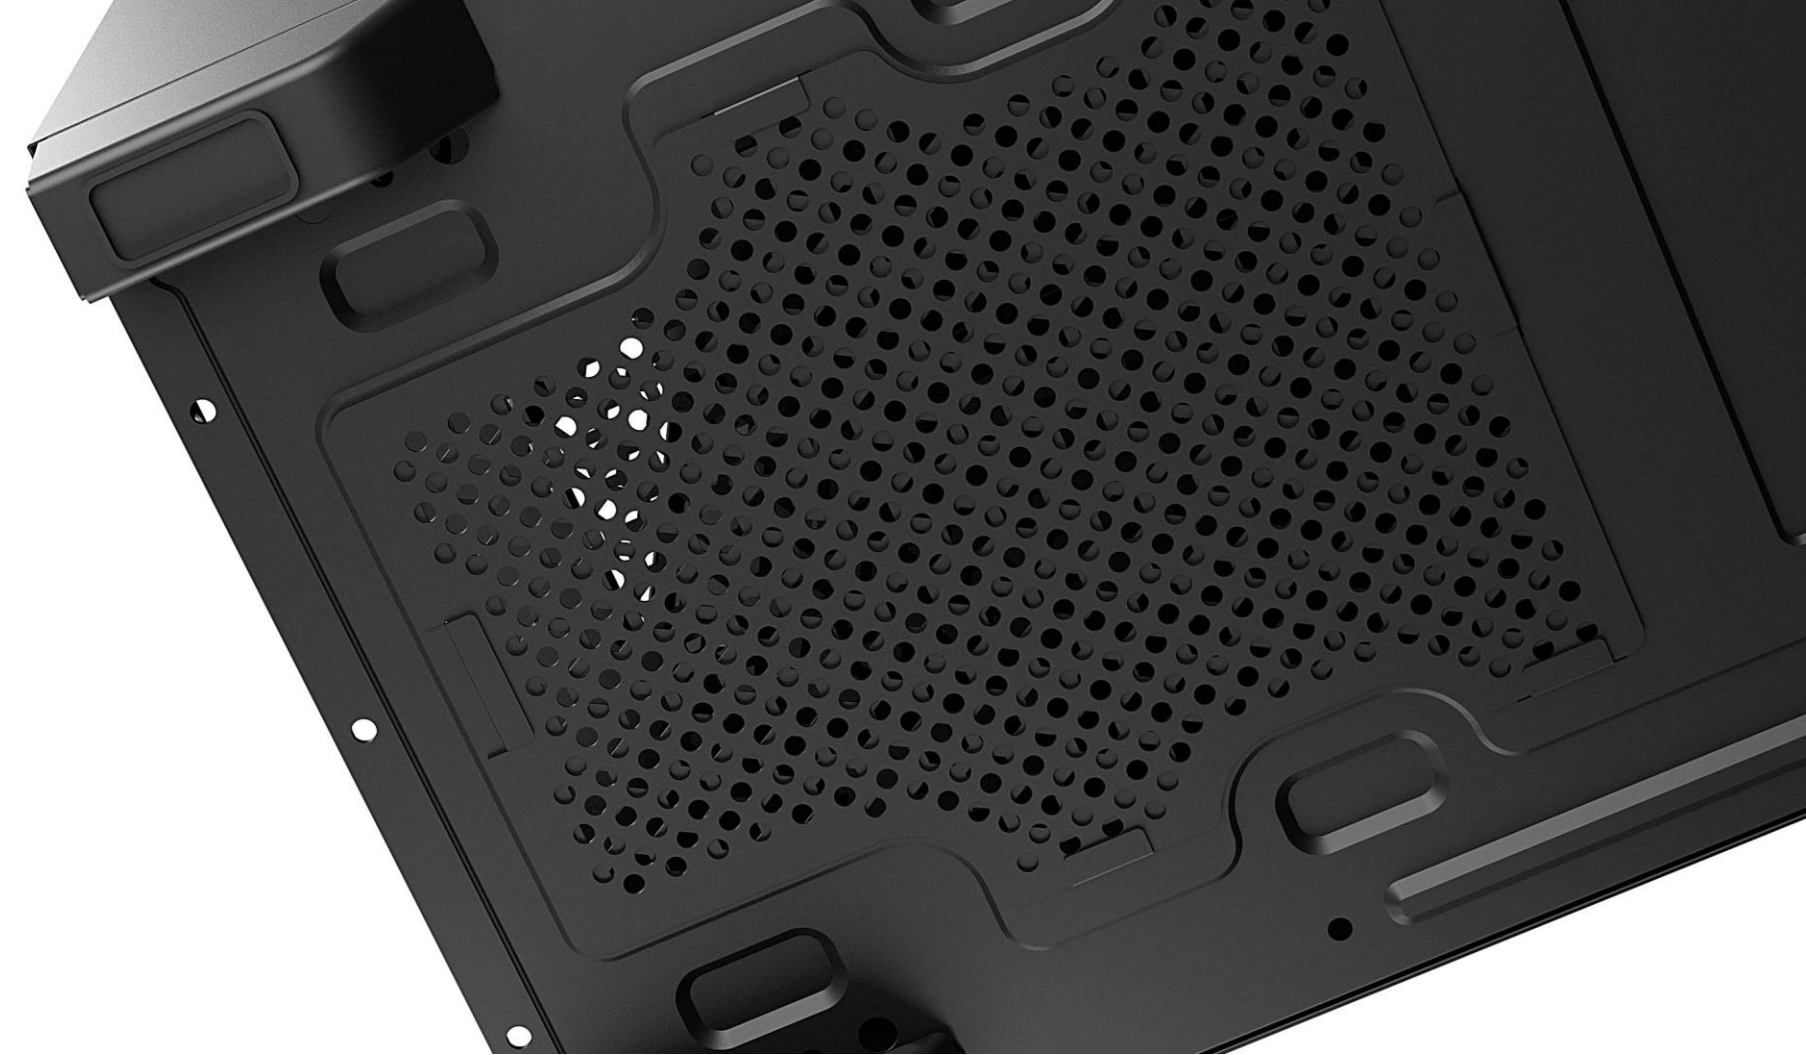

OCCASIONAL GAMING? WHY NOT! GPU up to 395 cm.

This computer case is best suited for study and work sets. In the office or at home. It is a good choice for energy-saving computers.

However, if you decide that your computer must also be used for gaming, you can install graphics cards (GPU) up to 395 mm long and CPU coolers up to 160 mm.

ANTI-DUST

DUST STOP!

PROTECTION AGAINST DUST

The anti-dust filter located directly under the power supply prevents dust from entering into the computer.

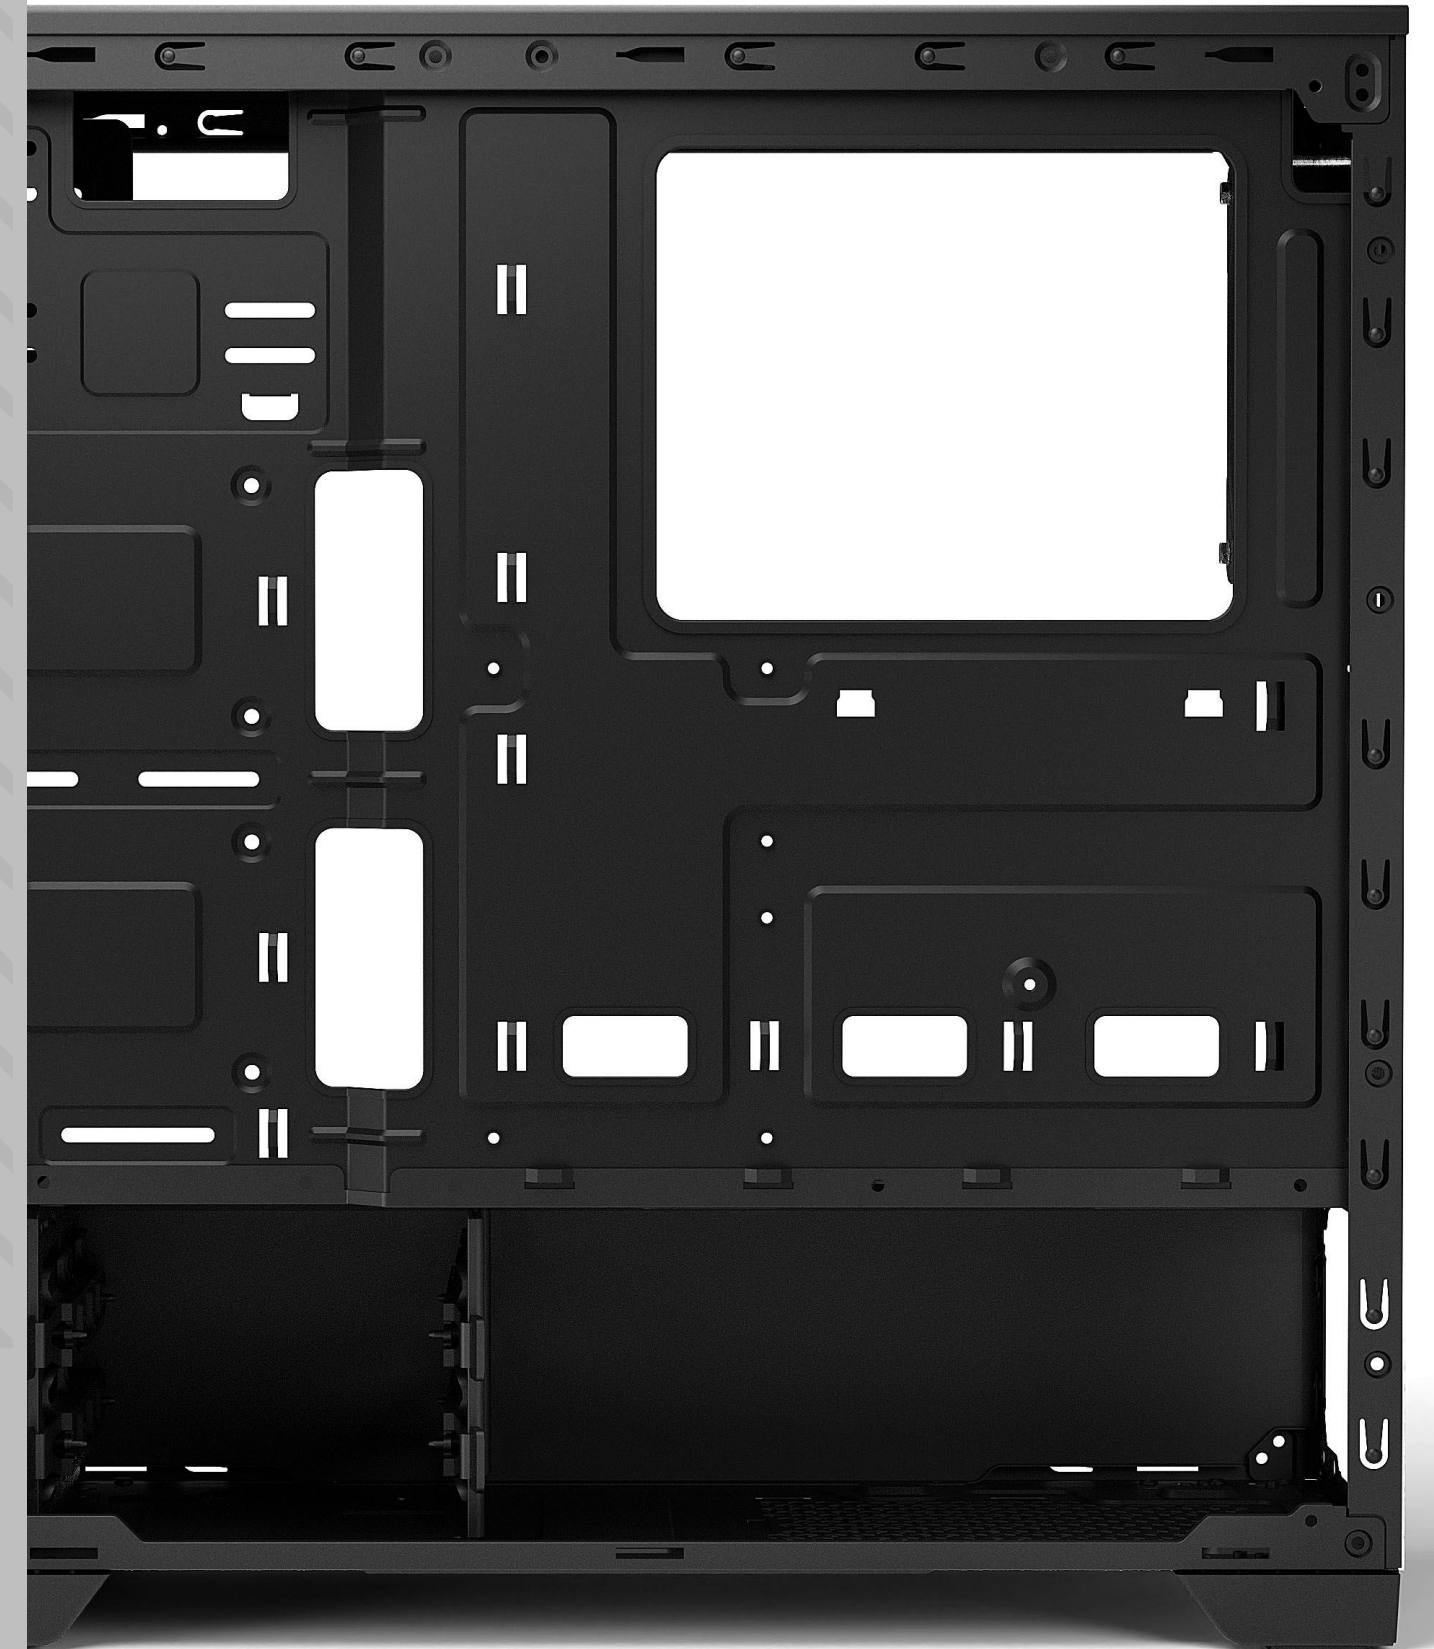

Small air vents on the sides of the front panel also have a positive effect on air circulation and protect against dust.

GOOD INTERIOR ORGANIZATION WITH PLACE FOR A LONG PSU

In MODECOM ARIEL 2 you can install power supply unit up to 185 mm long. This is the right amount of space even for a long, powerful power supply.

Good interior organization allows you to arrange cables in a convenient and thoughtful way.

The right amount of space between the chassis and the side panel not only ensures the assembly comfort of computer components, but also contributes to keeping it tidy and optimal air circulation.

MODECOM ARIEL 2

• • •

PRACTICAL

Modern solutions in the ATX standard with space for a card reader or optical drive.

MODECOM ARIEL 2

FOR WORK OR STUDY AND... GAMING

Designed for study and work. But nothing stands in the way of building a gaming computer as well.

The possibility of installing additional fans and space for a graphics card up to 395 mm are universal solutions for building a powerful computer.

ELEGANT DESIGN

Tired of RGB LED backlighting? Don't need a tempered glass side panel? Do you want an elegant case with an elegant front panel with a brushed aluminum structure? Here you go - MODECOM Ariel 2 is here for you.

BUILD YOUR COMPUTER
ACCORDING TO YOUR
NEEDS

5 REASONS WHY YOU SHOULD HAVE IT

01. HOME&OFFICE

The versatility of the PC case and practical solutions allow you to build an efficient computer for work, study or gaming.

02. BRUSHED ALUMINUM

The brushed aluminum pattern on the front panel gives it elegance.

03. SPACIOUS INTERIOR

Spacious interior for convenient arrangement of components.

04. QUALITY

The use of good quality materials (0.55 mm steel sheet) and good fitting of individual elements determine its durability for years.

05. FRONT PANEL

An easily accessible front panel allows you to conveniently connect headphones or use pendrives.
