

FOR ANY ADVENTURE

— LOGIC EASY 2

**It doesn't matter
where you are or
where you're going**

The Logic Concept EASY 2 backpack is an elegant, comfortable and practical backpack, designed for people who are looking for a functional solution at an affordable price.

The main features that make this backpack highly functional are its capacity and a large number of convenient and practical pockets.

A versatile and practical backpack for every day

FEATURES

- Strong, durable and solid shoulder straps covered with breathable mesh.

- The back of the backpack is covered with a breathable mesh.

- Three small pockets on the front for handy accessories.

- Main compartment with separate laptop compartment.

- Central compartment for documents, notes, smartphone.

- Comfortable handle.

- Additional compartment for documents and accessories.

- Space for a 15" or 16" notebook.

—LOGIC EASY 2

Desired space

Compartment separates laptop from the rest of the backpack, protecting it from scratches or other types of accidental damage.

Additional pockets allow you to pack all useful accessories such as a mouse or even a compact keyboard.

Zippers provide not only safety against accidental opening of the pocket, but also the necessary convenience and practicality of using the backpack.

15" OR 16" NOTEBOOK

A special protective layer made of high-quality materials is the perfect protection for any laptop with a screen diagonal of 15" or 16".

NYLON FROM RECYCLING

The backpack is made of recycled nylon. It is characterized by high durability and quick drying. It is also characterized by high flexibility - it can stretch without cracking. Nylon is a non-absorbent material, which means that it does not absorb moisture and effectively protects the contents of the backpack in the rain.

—LOGIC EASY 2

BEST COMPANION

The Logic Concept Easy 2 backpack will be your companion in every situation. It will work well in everyday business duties, at work, at school or during trips.

It will be great as a handy backpack also for evening activities and weekend excursions with friends.

SAFETY + COMFORT

A durable and strong handle is, above all, the much-needed safety of carried items in a backpack.

Made of plastic and metal elements for a secure grip. The hand fits comfortably on the handle, translating the functionality of the backpack into the safety of its transport and the necessary comfort.

—LOGIC EASY 2

BREATHABLE FABRIC

The backpack is equipped with strong and very comfortable, adjustable shoulder straps.

They are covered with a breathable mesh, the main purpose of which is to ensure optimal ventilation when in contact with the skin.

Breathable mesh adds a kind of "softness" and pleasure to the touch, which translates into even greater comfort of use.

Breathable fabric also covers the back of the backpack.

—LOGIC EASY 2

**In the city, on the go, to
work or school - a
practical and
comfortable backpack
for everyday adventures.**

CAPACITY AND NUMEROUS POCKETS

Lots of pockets and compartments
