**LIGHTWEIGHT
AND
PRACTICAL**

—LOGIC BASE 15

Light and comfortable

The Logic Concept Base 15 bag is a lightweight, weighing only 240 grams, and a very comfortable bag for transporting a laptop, designed for people who are looking for a functional solution at an affordable price.

The main feature is high practicality in transporting a laptop, especially in public transport, where the weight of luggage can be important when traveling to work or school.

Additional side pockets provide optimal functionality - there is room for documents or notes.

Universal and practical bag

- **Two inner compartments.**

- **Durable.**

- **Made of nylon.**

- **Rear strap for attaching to a travel bag.**

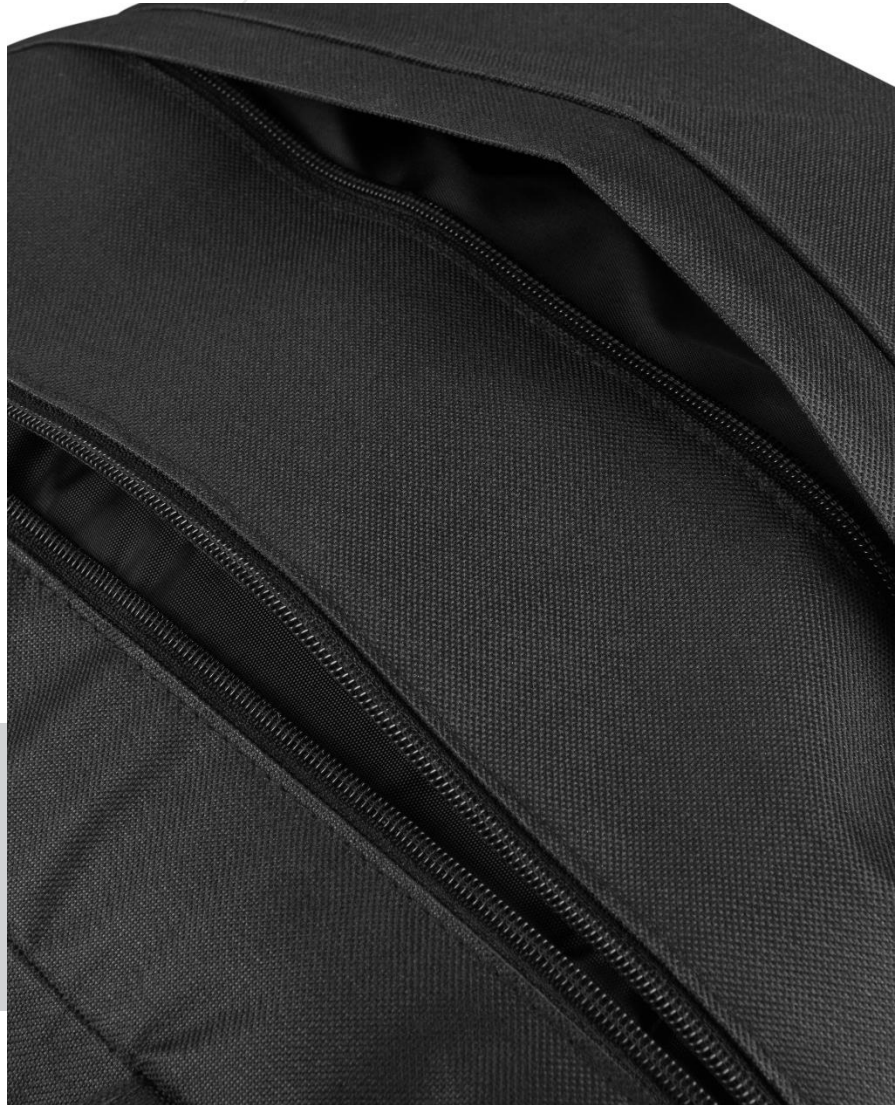

- **Material that protects against water and moisture.**

- **Two front pockets.**

- **Convenient zippers.**

- **Adjustable shoulder strap.**

- **Comfortable handle.**

Practicality

The main compartment has room for a 15.6" laptop, charger, necessary cables and a mouse.

The flexible, nylon material from which the bag is made allows, depending on the thickness and model of the laptop and accessories, to fit inside the most necessary documents or other handy items.

Additional pockets, closed with a zipper, increase functionality in everyday use - you can allocate additional space for the necessary things.

PLACE FOR 15,6" NOTEBOOK

You can easily fit a 15.6" laptop in the main compartment. Depending on the model of the device and its thickness, you can also successfully fit accessories or necessary documents.

NYLON

The bag is made of nylon. It is characterized by high durability and quick drying. It is also characterized by high flexibility - it can stretch without cracking. Nylon is a non-absorbent material, which means that it does not absorb moisture and effectively protects the contents of the bag in the rain.

A pleasant way to work or school

Work or study can be made easier with the Logic Base 15 bag. Low weight, only 240 grams, allows you to transport the laptop from home to work in a very convenient way. This is especially important when traveling by public transport, where it is not always possible to find a seat. The lightness of the bag in such cases is of great importance, affecting the comfort and well-being for the whole day of work or study.

Additional pockets increase the practicality of using the bag and make the way to work or school much more pleasant.

SAFETY + COMFORT

A comfortable handle and an adjustable strap ensure the comfort and safety of transporting your laptop.

An additional belt for a travel bag ensures maximum travel comfort and is extremely useful during any holiday or business trip.

Zippers

—LOGIC BASE 15

The bag is closed with a double-sided zipper. It is a convenient, quick and practical protection of the contents of the bag.

The advantage of zippers is also very easy to use.
