MODECOM VOLCANO GHOST

## *MODECOM VOLCANO GHOST*

---

High-quality surround sound combined with comfortable use, perfect balance and modern design. These are just few features of MODECOM VOLCANO GHOST headphones being another product in MODECOM VOLCANO gaming product line. Thanks to 7.1 sound system you will literally feel the sound surrounding you from every corner. Before you put VOLCANO GHOST on, you need to make sure you're ready for this experience. The experience of incredibly realistic adventure during which you will be able to hear every little whisper. Thanks to VOLCANO GHOST you will always be ahead of your enemy who will crawl behind you.

# Major features of MODECOM VOLCANO GHOST

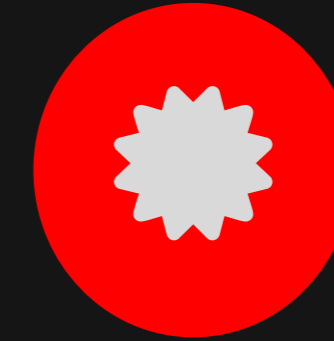

## 7.1 surround sound

If you install dedicated software, VOLCANO GHOST headphones will take you to the world of 7.1 surround sound.

## Perfect sound parameters

MODECOM VOLCANO GHOST are characterised by perfect technical parameters. They include e.g.: Wide frequency range (20 - 20.000), impedance (16Ω), sensitivity (99dB±3dB). They will provide you with clear sound and massive and breathtaking bass.

## Sensitive circular microphone

VOLCANO GHOST headphones are equipped with very sensitive microphone (42dB/20 KHz) with 4 mm membrane. Circular microphone will only pick up those sounds that should be heard. Noise gate will muffle humming and slamming.

## *Virtual 7.1 surround sound*

Thanks to VOLCANO GHOST headphones, every time you enter the world of games you will feel like it's something realistic and incredible. The software dedicated for the headphones will replace their stereo sound with virtual 7.1 surround audio system. Consequently, virtual surround system will make you feel like you're surrounded by the sound. Thanks to this system, every location you visit will disclose incredible depth of its sounds.

MODECOM VOLCANO GHOST

## *LED backlight*

VOLCANO GHOST headphones are backlit with red LED making them look incredibly predatory. The backlight may be regulated with a button placed on the cable. There are three backlight modes available:

- Constant backlight
- Breathing backlight
- No backlight

MODECOM VOLCANO GHOST

## *Very sensitive circular microphone*

Very sensitive circular microphone was placed in the left capsule. Its most important element is a small 4 mm membrane picking up sounds coming from the front and from behind it. All sounds coming from both sides of the microphone will not be picked up. This means that you can play in the room where there are other people talking. If the microphone has the right position, it will only pick your voice up.

- ✓ Crystal clear sound from the front and from behind
- ✓ Side noise gate

# Major features

MODECOM VOLCANO GHOST

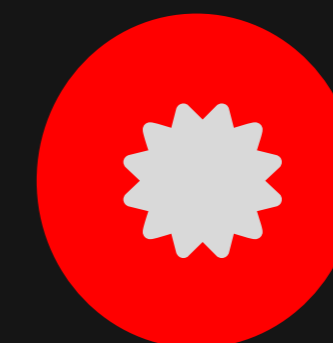

## Long and solid cable

VOLCANO GHOST are connected to the computer with the use of long cable ending with USB port. The cable is braided, which makes it more durable.

## Big and comfortable capsules

VOLCANO GHOST headphones are equipped with big and comfortable capsules with 5 cm diameter. Apart from convenience in use, they perfectly muffle external sounds. You can be sure that nothing will disturb you in getting entertained.

## Sensitive circular microphone

Left capsule is equipped with very sensitive circular microphone with 4 mm membrane.

## Remote controller placed on the cable

Remote controller is placed on the cable enabling you control major functions. You can use it to turn on/off the microphone, turn down the headphones and control LED backlight.
