

# MODECOM OBERON PRO SILENT

3 x 120 mm fans.

High capacity.

Noise-dampening mats.

Two color versions - black and white.

**3 x FANS**

2 x 120 mm fan on the front of the case and 1 x 120 mm fan on the back of the case.

**MESH**

Two mesh stripes on the edges of the front of the casing, mesh under the casing and on top.

**NOISE-DAMPENING MATS**

2 mm thick noise-dampening mats.

**CAPACITY**

Great possibilities of interior arrangement.

**QUALITY**

The use of high-quality materials during production ensures its durability.

**CPU COOLING**

The possibility of mounting a CPU cooler up to 163 mm.

**FUNCTIONAL**

Functional interior with a tunnel for power supply and HDD 3.5" hard drives.

**GRAPHIC CARD**

Space for graphics cards up to 395 mm.

**FILTERS**

Anti-dust filters.

**REAR FAN**

Illuminated, 120 mm ARGB fan on the back of the case.

**DESIGN**

Designed to reduce noise coming from the components.

**PANEL**

Front panel with audio inputs, USB, reset and power button.

**MESH**

Two mesh stripes on the edges of the front of the case.

**FILTER**

Anti-dust filter on the bottom.

**PCIe BRACKETS WITH SCREWS**

All PCIe brackets are installed with screws. You can easily remove any PCIe bracket without breaking them out.

**CABLE GROMMET**

Rubber cable grommet - not only does it look more aesthetically pleasing, but it also increase safe for the cables.

**FANS**

2 x 120 mm fans.

**TUNNEL**

Tunnel for power supply and hard drives.

## "OBERON HAS EVERYTHING THAT AN AVERAGE USER MAY REQUIRE"

The history of the MODECOM Oberon model dates back to 2016, when its first version appeared on store shelves. It offers a number of useful features that every gaming enthusiast will appreciate.

Over the years, the Oberon model has evolved - an additional fan, removable PCIE brackets, or rubberized cable grommets are just some of the changes. MODECOM Oberon won not only the hearts of gamers, but also the sympathy of experts. They agreed that the installation of a gaming computer or work computer in the MODECOM Oberon case is not only a reasonable choice, but also economically justified.

## NOISE-DAMPENING MATS

Noise-dampening mats inside on the right, left, top and front panels. They are designed to dampen the sound of working components and cooling fans of the processor and graphics card.

They reduce the noise coming from inside the computer, even during intense gaming.

## STANDARD ATX

ATX standard case.

## DESIGN

Modern and beautiful appearance of the case thanks to the fashionable and elegant design.

## FUNCTIONALITY

The high functionality of the case is its advantage - large possibilities of interior arrangement will allow you to build an efficient computer for games or work.

# OBERON PRO SILENT

Capacious and modern PC case.

**MODERN  
WHITE**

**ELEGANT  
BLACK**

# OBERON PRO SILENT

## PC CASE

MODECOM OBERON PRO SILENT has been designed for users who appreciate a spacious and functional interior combined with an attractive, modern design.

2 mm noise-dampening mats reduce the amount of decibels coming out of interior. During intense gaming, components such as the processor or graphics card heat up and the fans run faster and faster, producing more noise, which can disturb and is unpleasant. Noise-dampening mats reduce this noise and allow you to play without the characteristic "howling" of component fans.

The MODECOM OBERON PRO SILENT version is modern construction based on the experience of previous versions of the OBERON series.

## MODECOM OBERON PRO SILENT - FOR GAMING OR WORKING AND LEARNING

The history of MODECOM PC cases goes back over 20 years and is related to the establishment of the company. The evolution of the design of personal computer cases, which has been going on for years, results in interesting and practical solutions that are not only intended to protect and improve the functioning of components (protection against dust, dirt, overheating), but at the same time performs the aesthetic function of the gamers stand. MODECOM OBERON PRO SILENT offers the best solutions available on the market in order to build a functional computer for gaming or work.

# NOISE- DAMPENING MATS AND RUBBER CABLE GROMMET

Soundproofed PC case, which limits the decibel coming from the inside of the computer.

Inside, there are rubber grommets. They were designed to protect the cables against damage.

## 10 REASONS WHY YOU SHOULD HAVE IT

- 
- 01. FOR GAMING / WORK / STUDY**

The fashionable, but at the same time elegant design of the case will suit both the gamers stand and the desk intended only for work or study.
  - 02. 3 x FANS**

Three 120mm fans are factory-mounted. Two on the front and the other on the back of the case.
  - 03. REMOVABLE PCI/PCIe BRACKETS**

All PCIe brackets are with screws. You can easily remove any PCIe bracket without breaking them out.
  - 04. NOISE-DAMPENING MATS**

2 mm noise-dampening mats.
  - 05. RUBBER CABLE GROMMETS**

They were designed to protect the cables against damage.

## 10 REASONS WHY YOU SHOULD HAVE IT

### 06. **HDD / SSD**

You can install three 2.5" SSDs and two 3.5" HDDs in a tool-free system.

### 07. **TUNNEL**

The power supply tunnel separates the PSU from other components. This solution ensures a lower temperature inside the case.

### 08. **PSU**

Inside, there is a large space (240 mm) for the power supply. This allows for the installation of long power supplies and easy cabling arrangement.

### 09. **PANEL**

Front panel with audio inputs, USB, reset and power button.

### 10. **MODERN DESIGN**

MODECOM OBERON PRO SILENT has its charm. It is a modern case for building a modern gaming computer.

## HDD/SSD

In MODECOM OBERON PRO SILENT you may install three 2.5" SSDs and two 3.5" HDDs in a tool-free system. The power supply and bracket for 3.5" hard drives are placed in a covered tunnel on the bottom of the case, while SSDs are mounted on both sides of the interior construction, which does not block the air flow inside.

# PRACTICAL SOLUTIONS

All PCIe brackets are with screws. You can easily remove any PCIe bracket without breaking them out.

## ANTI-DUST FILTER BOTTOM

The filter on the bottom of the power supply protects the inside of the case from dust and dirt.

Simply disassemble the filter and clean it thoroughly to ensure a constant flow of air to the power supply.

## CHOOSE IT FOR THE OFFICE

Fashionable white or elegant black? Regardless of which color version you choose - your desk will look modern and elegant.

We know that you need not only functionality, but also an interesting design.

# PLAY AS YOU LIKE

## PERFECT FOR GAMING

MODECOM OBERON PRO SILENT is also perfect as a PC case for building an efficient gaming computer.

For years, MODECOM OBERON cases have been used as for building gaming units and are exhibited at the largest gaming events in Europe, such as Poznań Game Arena, Intel Extreme Masters or Gamescom.
