MODECOM OBERON BLACK

MODECOM

MODECOM OBERON BLACK

MODECOM OBERON was designed for those who like spacious and functional interiors combined with nice and modern design. Well worked-out construction of this gaming case interior combined with perfectly developed details of the front panel make up for a flagship product among newly launched MODECOM computer cases. OBERON stands out thanks to its elegant and minimalistic design highlighted with classic black colour.

Key features

- ✓ construction for demanding gamers
- ✓ multiple organisation solutions
- ✓ modern design of the front panel
- ✓ functional interior with a tunnel for power supply unit and HDD 3.5" hard drives
- ✓ three dedicated drive bays for SSD 2.5" hard drives
- ✓ HDD 3.5" hard drives tool-free mounting
- ✓ extension cards tool-free mounting
- ✓ pre-mounted black 120 mm fan
- ✓ window on the side
- ✓ anti-dust filters
- ✓ space for video cards up to 395 mm
- ✓ possibility of mounting CPU cooling up to 163 mm

Computer case

Cooling system

OBERON has one pre-mounted black 120 mm fan on the back, which is a great solution preventing the components from blocking the airflow. OBERON also has the possibility of mounting water cooling system. Maximum height of CPU cooler is 163 mm.

Space organisation system

OBERON enables extension cards tool-free mounting, and convenient wiring organisation system makes it easy to keep the interior well-organised. Space for video card is extended up to 395 mm.

Functional and modern design

OBERON lets you organise its interior in whatever way you like according to your own preferences with the use of high-end components and keep the good airflow at the same time. The interior will stay clean thanks to easily dismountable filters: magnetic filter on the top, and on the bottom under the power supply unit.

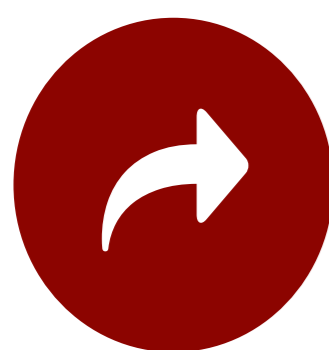

SSD/HDD drive bays

You can mount three SSD 2.5" and two HDD 3.5" hard drives tool-free in OBERON case. Power supply unit and 3.5" hard drives are placed in a tunnel on the bottom of the case. SSD hard drives are mounted on both sides, which makes it easy to keep the good airflow.

Additional information

MODECOM OBERON

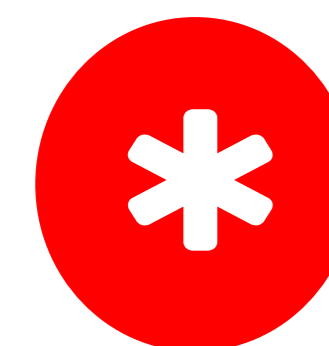

Long video cards

Mount long video cards up to 395 mm inside

Solid and durable frame

The frame of the case is made of high-quality black-painted SPCC steel of 0.7 mm thickness.

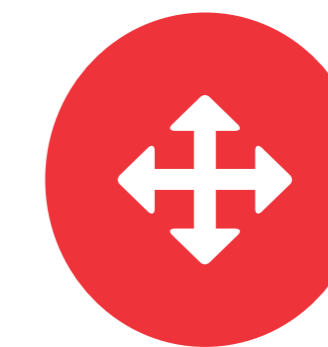

CPU cooler

Possibility of mounting CPU cooler up to 160 mm height.

Power supply unit mounting

For better airflow, the power supply unit is mounted on the bottom of the case in a dedicated tunnel.

Side panel with a window

OBERON is equipped with classic side panel with the possibility of mounting additional fan on it

Anti-dust filters

Filters placed directly under the power supply unit and on the top panel will prevent the dust from getting inside the case.
