**PC Case**

# MODECOM SIROCO ARGB FLOW MIDI

# PREPARE YOURSELF...

Do you dream of an efficient and well-functioning computer? This is great because you can choose a good computer case for your components, such as MODECOM Siroco. Inside the case you will find four 140 mm ARGB fans, an ARGB fan controller and practical solutions for building a computer. There are plenty of airy panels for optimal air circulation, and there is also plenty of space for a high CPU cooler and long graphics cards. The MODECOM Siroco case is a great choice for building a computer, both for gaming and for working with, for example, graphics programs that require strong components.

- ✓ 4 x 140 mm ARGB fans pre-installed.
- ✓ Side panel door made of tempered glass.
- ✓ Mesh front and top panel.

- ✓ 2 x USB 3.0 and 1 x USB-C.
- ✓ PCIe removable brackets.
- ✓ Possibility of vertical GPU mounting.
- ✓ Ready for water cooling.

- ✓ Dust filters.
- ✓ PSU tunnel.
- ✓ Space for 6 hard drives (5 SSD / 1 HDD or 4 SSD / 2 HDD).
- ✓ Fan speed and ARGB controller.

**MODECOM SIROCO**

# 4 x 140 mm FANS

**Four 140 mm ARGB fans are installed in the case**. Three of them, mounted on the front, force air into the computer, while one, mounted on the rear panel, blows hot air out.

This solution ensures that components runs cool, regardless of the processes and activities performed by the computer.

But that's not all - you can install additional fans on your own (2 x 120 mm or 140 mm on the top and 2 x 120 mm on the power supply tunnel).

MODECOM SIROCO

# THE DOOR IS OPENED

---

A side door made of tempered glass makes it very convenient to assemble and clean the computer. You can easily and conveniently open the door and replace RAM, graphics card and other components.

**There is no simpler and more convenient solution** for assembling and modifying the computer's interior and cleaning it than the one used in the MODECOM Siroco case.

Tempered glass, allows you to display the installed graphics card and other expensive components.

**MODECOM SIROCO**

# YOU DON'T HAVE TO FIGHT FOR COOL AIR

Mesh panels - front and top - are responsible for **optimal airflow**. Small openings at the front effectively bring in cool air while keeping dust particles away. The airy elements at the back and top dissipate heat.

Here is a design in which optimal airflow benefits the operation of the entire computer.

# CREATE YOUR GAMES AND DATA STORAGE HERE

You can install **up to 6 hard drives** in the MODECOM Siroco case. It's up to you whether you want to install them in a configuration of 5 SSD and 1 HDD or 4 SSD and 2 HDD.

The space for installing SSD drives is located on the motherboard tray (two on the back and two on the front) and one in the PSU tunnel.

However, you can mount two HDDs in the hard drive basket, located in the power supply tunnel.
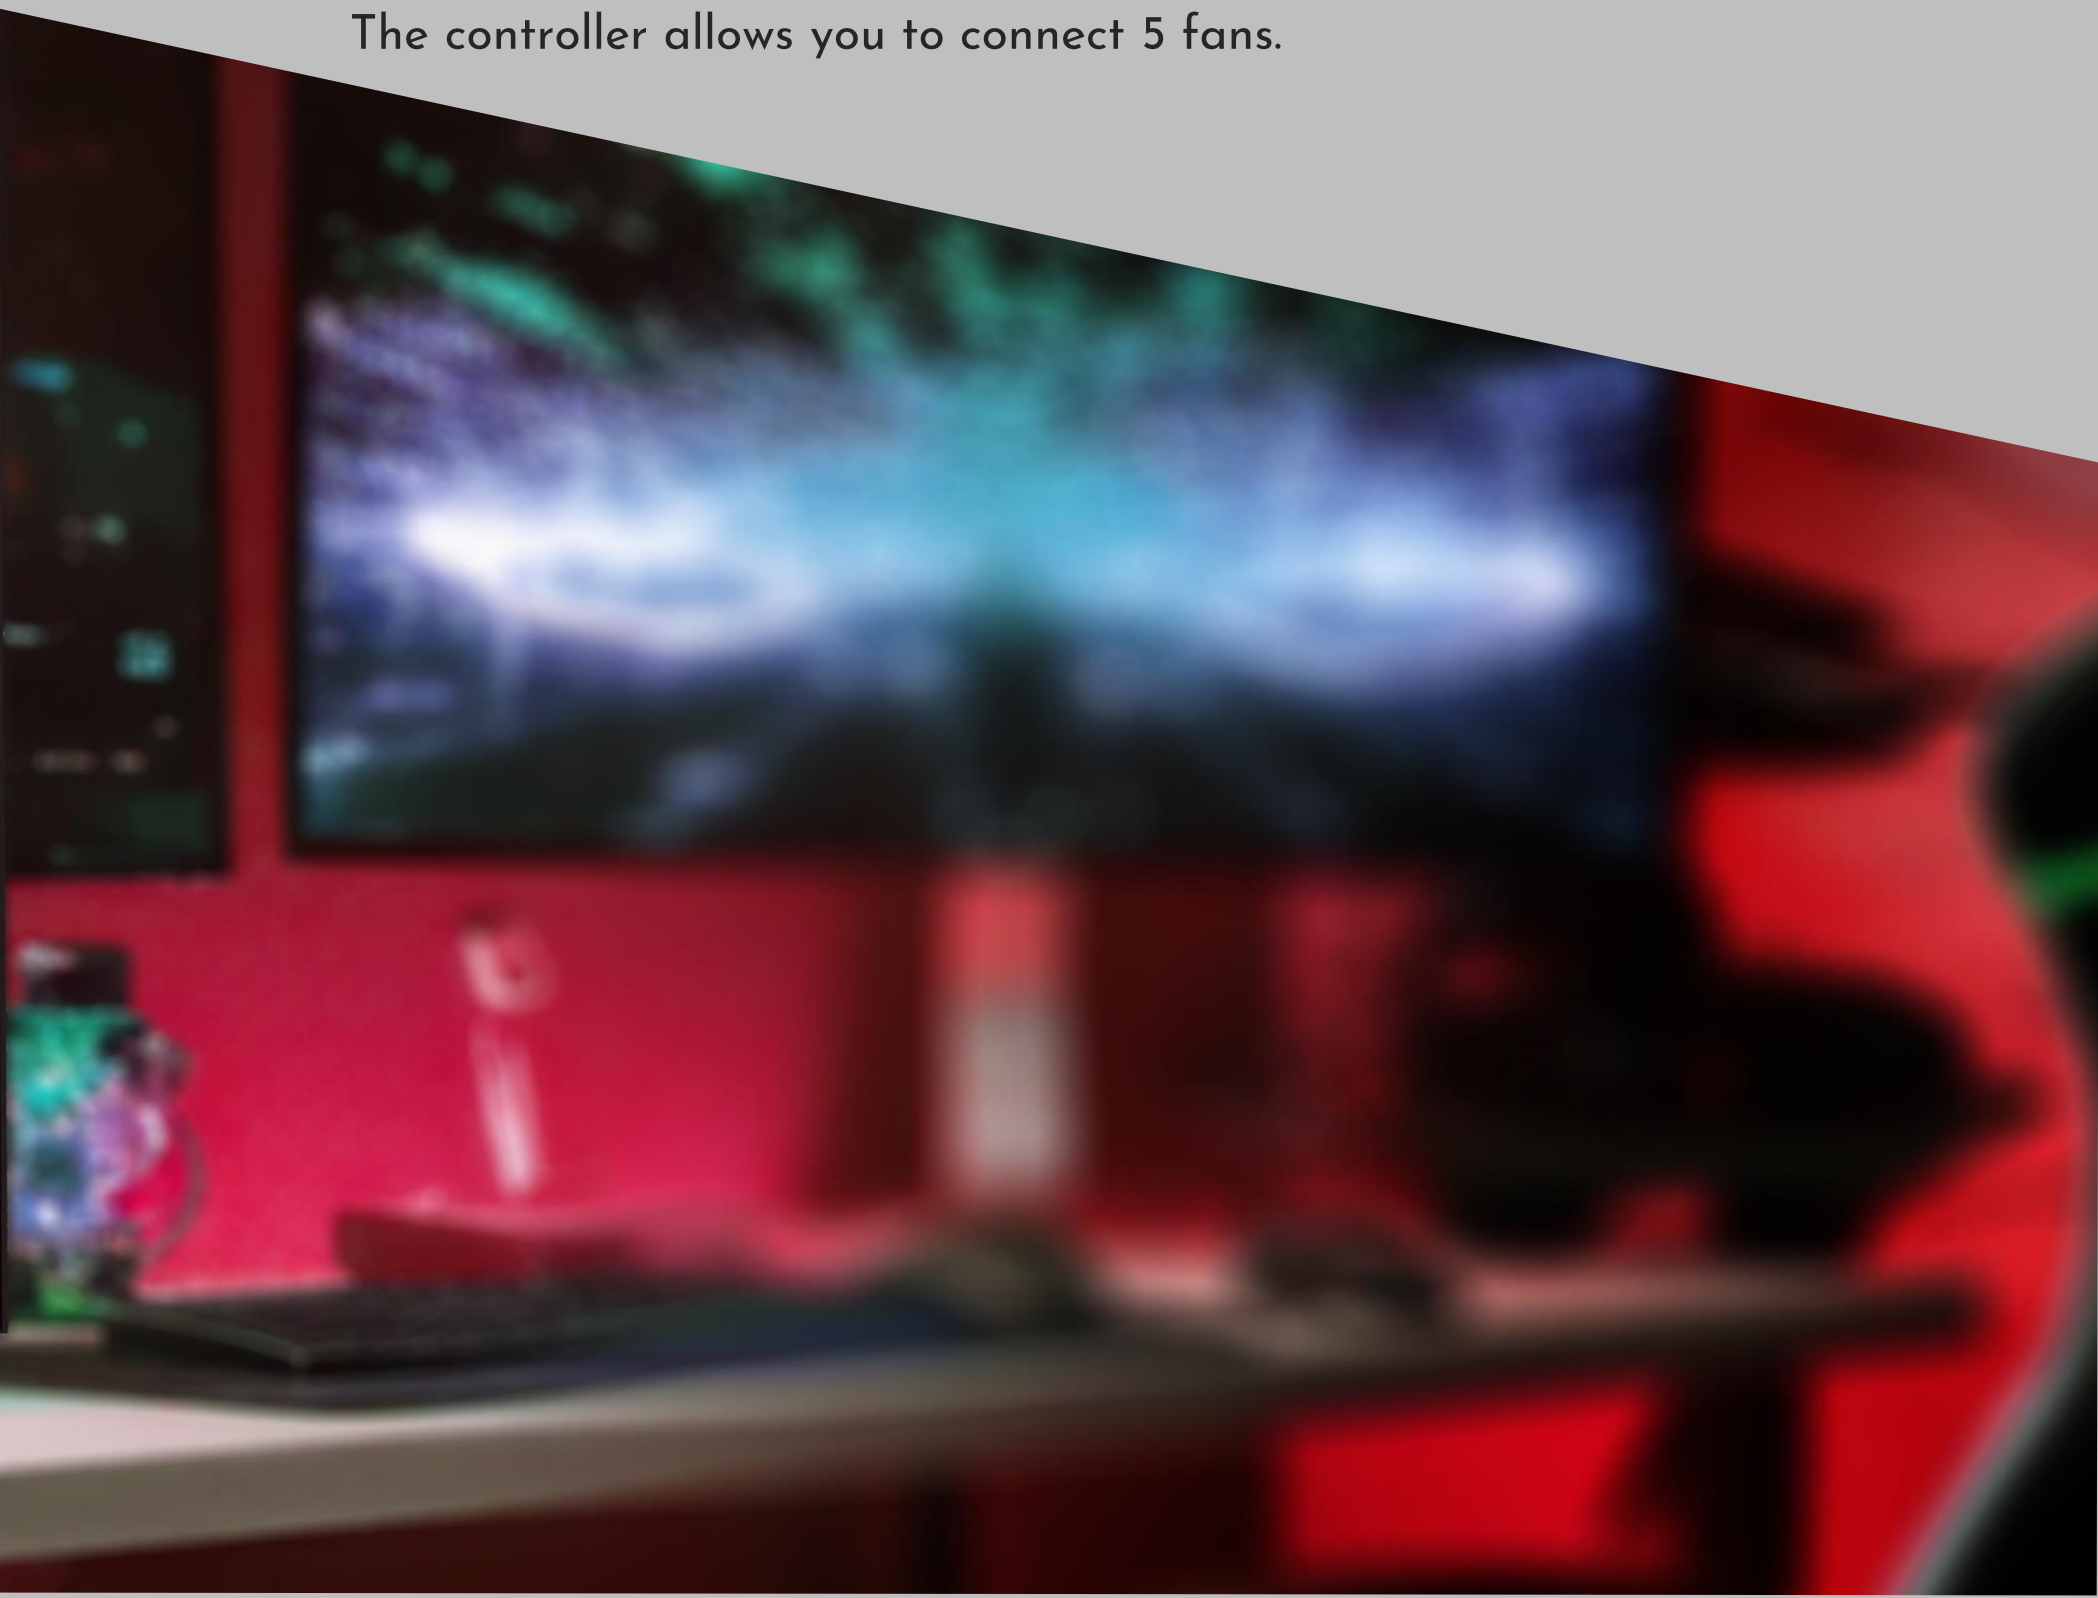

If you add space for M.2 drives on the motherboard, the computer in the MODECOM Siroco case will become a real storage room for games and documents.
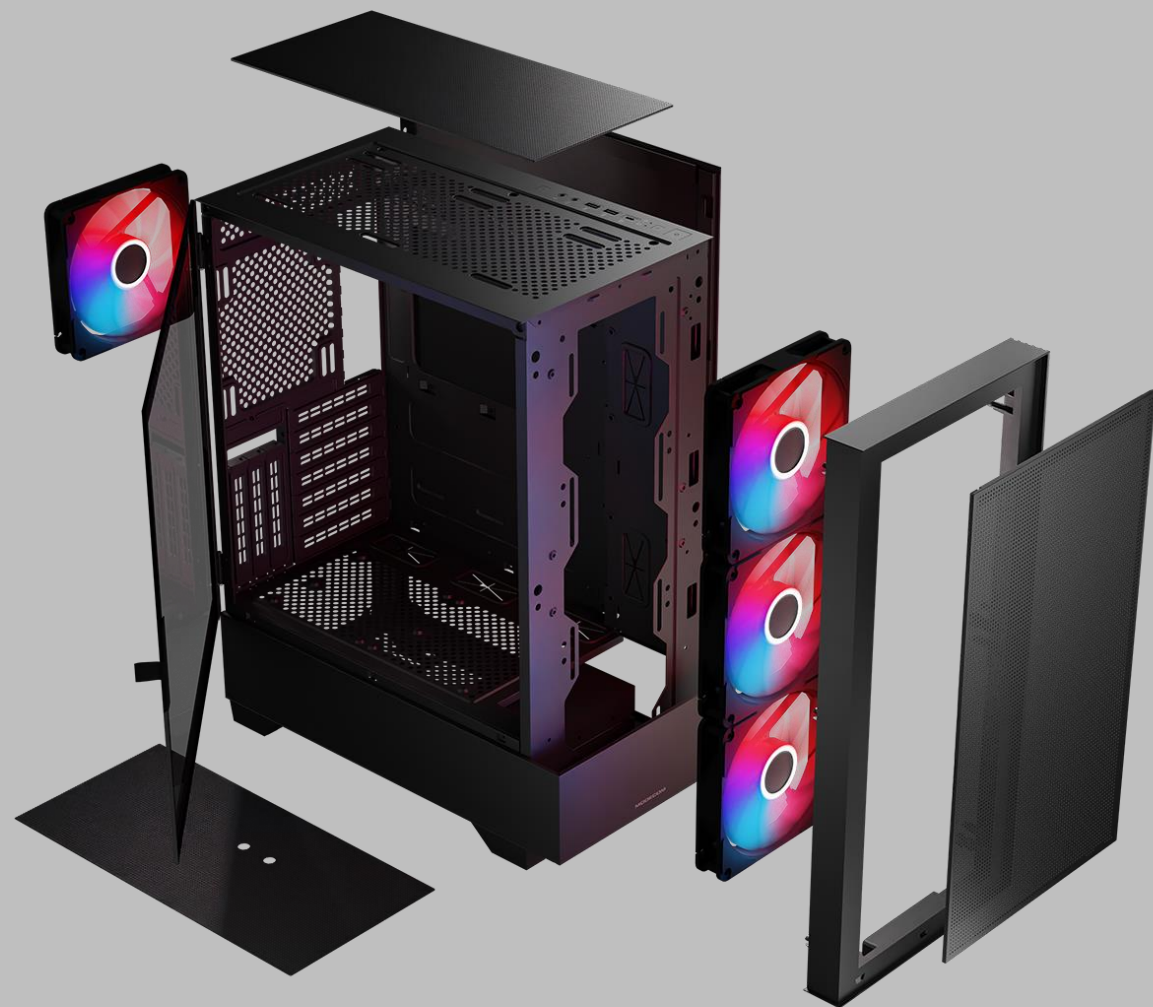

# CONTROL WITH A CONTROLLER

You can set the backlight color and rotation speed of the installed ARGB fans using the built-in ARGB controller. This gives you even greater options for configuring your computer. You decide what your work, study and play station will look like!

The controller allows you to connect 5 fans.

**DUST PROTECTION**

# DON'T YOU LIKE CLEANING? THAT'S GOOD!

## EFFECTIVE PROTECTION AGAINST DIRT AND DUST

Your computer in the MODECOM Siroco PC case is **effectively protected against dust**. The dust filter under the power supply and the magnetic filter on the top panel effectively minimize the amount of dust inside the case. Densely placed holes on the front panel also help keep the inside of the computer clean.

If you don't like cleaning, this PC case is for you - you don't have to constantly clean the interior with compressed air.

MODECOM SIROCO

# READY FOR GAMING

The well-designed interior of the case allows for the installation of **high CPU coolers (up to 180 mm) and long graphics cards (up to 345 mm).**

Here is a PC case in which you can build an efficient and modern gaming computer.

# THE COLORFUL WORLD OF ARGB

Your place of work, study and gaming does not have to be boring. All this thanks to **illuminated ARGB fans**. You can set any favorite color and illumination mode to fit even better into the interior design.

Your desk can take on interesting colors - take advantage of this opportunity!

MODECOM SIROCO

# ERGONOMICS AND COMFORT

On the top panel we have placed two USB 3.0 ports and one USB-C port. Thanks to this, you can conveniently connect a pendrive and other devices.

The panel also has an HD Audio input for a microphone and headphones, as well as a Power and LED/Reset button.

This solution is especially useful when the computer is placed on the floor - all ports are within easy reach.

DO IT YOURSELF – IT'S EASY!

# PLEASURE OF INSTALLATION

## PRACTICAL INTERIOR

Thanks to the side door and a well-designed service section with a dedicated place for cables and rubberized cable gromets component installation is a pleasure.

Building a computer in the MODECOM Siroco PC case is a pleasure.

**MODECOM SIROCO**

# PSU TUNNEL

You are building an efficient and modern computer for gaming and fun, so you need a powerful power supply.

In the MODECOM Siroco PC case, you can mount it in a dedicated tunnel, ensuring optimal and uninterrupted operation.

The maximum length of the power supply with the mounted disk basket is 210 mm. However, if you decide to dismantle the basket, you will install a power supply with a length of up to 350 mm.

# WATER COOLING?
# OF COURSE!

MODECOM Siroco is **ready for water cooling installation**. If you decide that air cooling is not enough for you, you can install a radiator up to 360 mm at the front, up to 240 mm at the top and up to 140 mm at the rear.

There are many computer configuration options - decide for yourself which option will be best for you.

MODECOM SIROCO

# UNIVERSAL MEANS GOOD

The high versatility of the structure will fit into the interior design of a modern office as well as a classically equipped loft. Additionally, it features proven solutions that will be appreciated by graphic designers, architects, photographers, etc. – wherever you need a computer with a powerful processor, a good graphics card and plenty of space for data storage media.

The versatility of the MODECOM Siroco case allows you to build a computer for work, study and fun.

# EVERYTHING IS IN ITS PLACE

## SCREW BOX

For maximum convenience of assembling the computer, you will find a box with mounting screws inside the case. Everything is organized and in its place - all to make the computer assembly as simple as possible.

MODECOM SIROCO

# READY FOR EXPANSION

The four 140 mm ARGB fans that you receive from us at the start after taking it out of the box are not enough? That's nothing - you can install two 120 mm or 140 mm fans on the top panel and two more 120 mm fans on the power supply tunnel.

**MODECOM**

**MODECOM SIROCO**

# VERTICAL CARD MOUNTING

Ready for vertical installation of a graphics card.

**MODECOM SIROCO**

# ELEGANCE, MODERNITY AND STYLE

Interesting and modern design is a characteristic feature of MODECOM Siroco. It will fit perfectly into any desk as an interesting element of home or office equipment.

# 5 REASONS WHY YOU SHOULD BUY IT

**01.**     **4 x 140 mm PRE-INSTALLED ARGB FANS**

**02.**     **MESH FRONT AND TOP PANEL**

**03.**     **SIDE PANEL DOOR MADE OF TEMPERED GLASS**

**04.**     **FAN CONTROLLER**

**05.**     **DUST FILTERS**
