LOGIC AGIR PC CASE

LOGIC AGIR

CHOOSE WISELY

Logic Concept AGIR is a Midi Tower standard case supporting ATX motherboards. All elements of our housing were made with attention to detail. The final product is an excellent basis for building computer.

FOR MODERN COMPUTERS

This PC Case provides excellent airflow. The front panel made of metal mesh provides excellent ventilation, and the side panel made of tempered glass allows you to display the computer configuration elements. This PC case is a great choice for modern computers.

AIRFLOW

SAY NO TO HOT COMPONENTS

—LOGIC AGIR

This design ensures excellent ventilation. This is due to the front panel being made of mesh. Such an airy panel will also work well in the case of water cooling installations. This PC case allows the installation of 240 or 280 mm radiators. Additionally, the upper panel of the case allows the installation of two 120 mm fans. The ventilation holes on the top panel are additionally protected by a magnetically mounted dust filter.

TEMPERED GLASS

As befits a case for gaming computers, Logic Agir has a tempered glass on the side of the case. It was deliberately limited to the side panel only, in favor of the airy front and top panel.

—LOGIC AGIR

PRE-INSTALLED REAR FAN

As standard, the case is equipped with one cooling 120 mm fan that extracts air through a ventilation hole at the back of the case.

PROTECT YOUR COMPUTER FROM DUST

DUST FILTER

A dust filter is located on top of the PC case. Thanks to this, it effectively catches unwanted dust and protects installed components.

Small holes in mesh panels protects against dust that gravitationally enters your computer, even when the computer is turned off.

This solution reduces amount of dust inside your computer.

LOGIC AGIR

MAXIMUM COMFORT

For maximum comfort of use, all ports necessary for everyday computer work are placed at the top of the panel. This design allows you to conveniently and quickly connect all necessary computer accessories. The ports include: 3 USB ports (including 1 USB 3.0) and audio ports that allow you to connect a wide range of accessories.

—LOGIC AGIR

PLENTY OF SPACE

Behind the motherboard tray, there is as much as 21 mm of space for cable management, which allows you to ensure an attractive and clean appearance of the components visible through the glass side panel.

PSU

TUNNEL FOR PSU

LOGIC AGIR

A gaming PC must be equipped with a good and powerful power supply. That's why we made sure that it would feel at home here by providing a lot of space for your PSU.

INSTALL YOUR
FAVORITE GAMES

The installation of HDD or SSD drives is also well thought out here.

You can install 2 x 3,5" HDD or 2 x 2,5" SSD disk drives here. Space for your favorite games is guaranteed
