IMPORTANCE OF INTERIOR

Building a gaming PC? And you need more „compact” solution? Then of course you need a well-thought-out, well-designed and good-looking MINI ATX case. With three mounted ARGB fans, an airy front and top, dust filters, and the side panel was made in the form of a tempered glass door. This is where the Logic Concept Portos ARGB MINI PC case comes in handy. A real competitor for gaming tasks, ensuring good airflow, working culture of components, their safety and low temperatures of installed components. And everything in a small size.

CHOICE IS YOURS

OPEN YOURSELF TO NEW

The side panel door made of tempered glass not only facilitates the assembly of components, but also allows you to keep the computer clean.

Just open the door and clean the inside with compressed air. Isn't it a simple and practical solution? These are the only ones we want to give you, because they simply belong to you.

AIRFLOW

SAY NO TO HOT COMPONENTS

The airy front and top panels significantly facilitate air circulation. **Two fans (120 mm ARGB) on the front** and **one (120 mm ARGB) on the back** of the case effectively cool the hot components. Everything for your comfort and safety of computer.

—LOGIC PORTOS ARGB MINI

READY FOR GAMING

Logic PORTOS MINI ARGB is a PC case designed to build an efficient and modern gaming computer. Optimal air flow, practical solutions and pre-installed ARGB fans make it a gaming character.

READY FOR GAMING COMPONENTS

The possibility of mounting **graphics cards up to 340 mm** and the **maximum height of CPU cooling up to 155 mm** allows the installation of most efficient components available on the market.

TEMPERED GLASS

As befits a case for gaming computers, Logic Portos MIDI has a tempered glass on the side of the case. It was deliberately limited to the side panel only, in favor of the airy front and top panel.

PROTECT YOUR COMPUTER FROM DUST

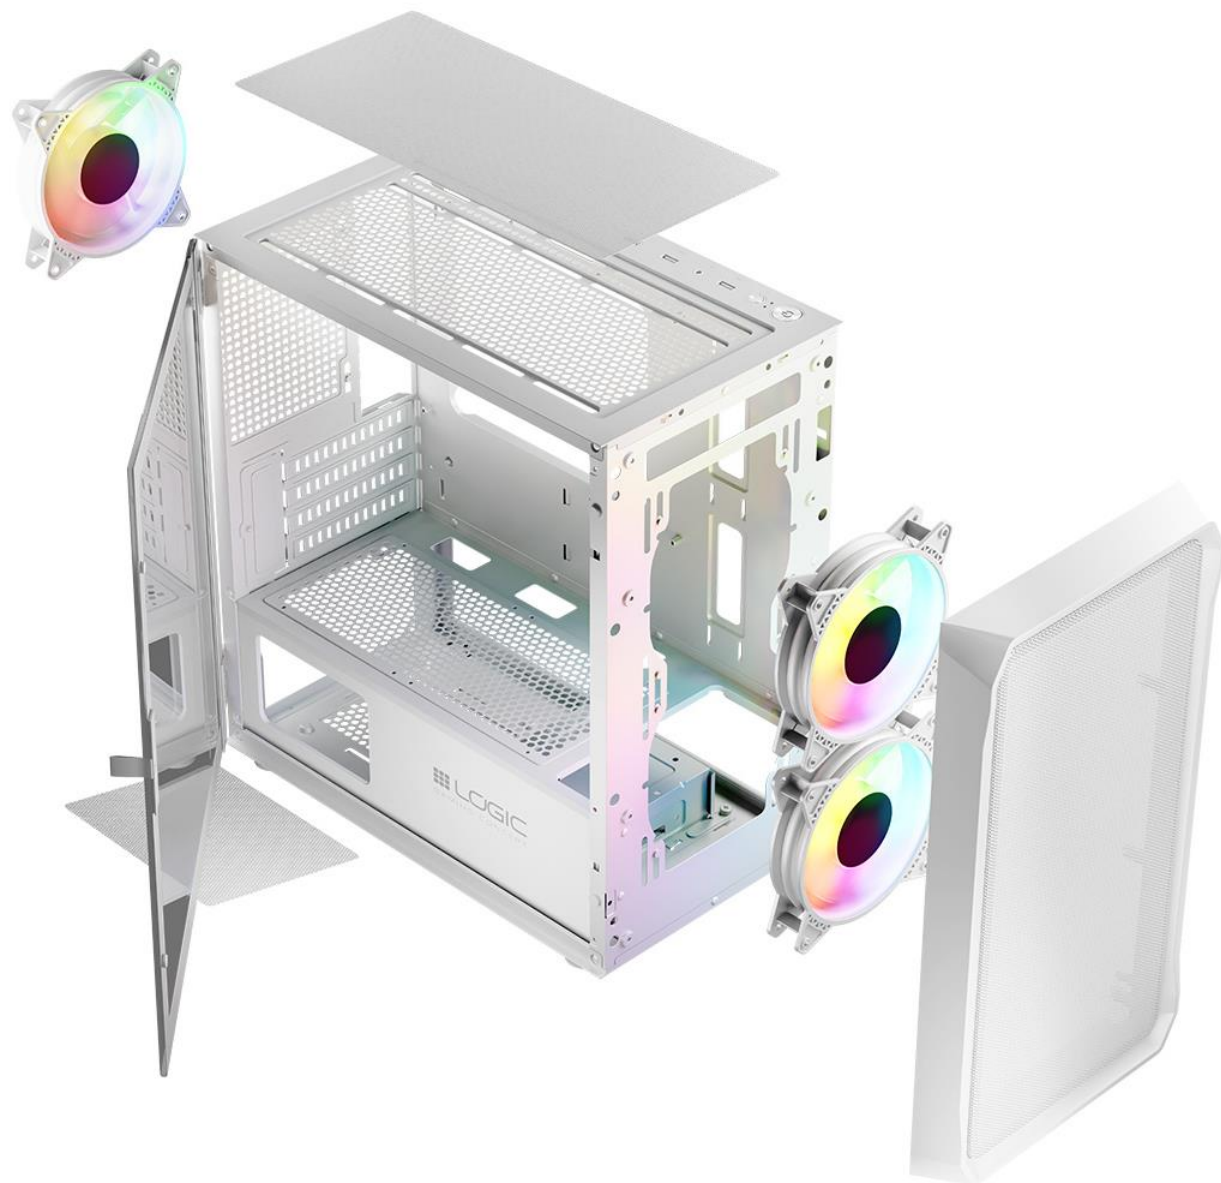

DUST FILTERS

A dust filter has been placed under the power supply. Minimizes the amount of dust sucked in by the power supply fan, positively affecting its operating temperature and lifespan.

An additional filter is located on top of the PC case. Thanks to this, it effectively catches unwanted dust and protects installed components.

It protects against dust that gravitationally enters your computer, even when the computer is turned off.

The whole anti-dust effective protection is complemented by a mesh front panel.

OPTIMAL AIRFLOW

The ventilated front panel provides airflow with **two 120mm ARGB fans**. On the back of the case, there is **one pre-installed 120 mm ARGB fan**.

This allows you to effectively cool the installed components inside the computer, positively affecting the culture of their work and life.

Optionally, it is possible to install two 140 mm fans on the front of the case (in place of the factory-installed ones) and two 120 or 140 mm fans on the top.

The PC case is also adapted to the installation of water cooling.

BEAUTY OF ARGB

The PC case for gamers must look nice. That's why pre-installed ARGB fans emphasize the gaming purpose of the entire PC.

The color of the backlight can be freely changed from the predefined settings using the RESET button on the control panel of the case.

— LOGIC PORTOS ARGB MINI

Great gaming possibilities in the Portos ARGB Mini PC case

USB PORTS ON THE TOP PANEL

Convenient access to the top panel

Convenient access to the top panel, with two USB 2.0 and one USB 3.0 port. In addition, one HD audio minijack for headphones and microphone, power and reset button (allowing you to control ARGB lighting).

SIMPLE ASSEMBLY

—LOGIC PORTOS ARGB MINI

Everything here is well thought out and intuitive. Building a computer in this case is a pleasure and is child's play.

PSU

TUNNEL FOR PSU

A gaming PC must be equipped with a good and powerful power supply. That's why we made sure that it would feel at home here! The **maximum length** of the power supply with the drive bay installed is **200 mm**.

A dust filter has been placed under the power supply, which effectively protects the operation of the power supply against dust.

—LOGIC PORTOS ARGB MINI

4 PCIe slots.

Four slots for PCIe expansion cards. This is the optimal amount for installing a graphics card or any other expansion card.

—LOGIC PORTOS ARGB MINI

Home & Office

Despite its gaming origin, this PC case will also work well in office tasks and everyday work. The possibility to build a universal and efficient computer is undoubtedly its advantage.

SSD / HDD

—LOGIC PORTOS ARGB MINI

NEED SPACE FOR GAMES? YOU CAN HAVE IT!

The installation of HDD or SSD drives is of course also well thought out here. Inside the PC case at the level of the tunnel there is a basket for 3.5" or 2.5" drives.

Moreover, on the motherboard tray, it is possible to mount an additional 2.5" drive.

A total of 2 SSDs and 1 HDD or 1 SSD and 2 HDDs can be installed.

5 REASONS WHY YOU SHOULD BUY IT

3 ARGB FANS

Pre-installed ARGB fans.

GAMING

Optimal solutions to build a gaming computer.

AIRFLOW

Practical solutions for optimal airflow.

SIDE DOOR

Side door made of tempered glass.

MINI ATX

Compact solutions, huge possibilities.

KEY FEATURES

Modern design.

Tunnel for PSU.

Optimal airflow.

Ventilated front and top panel.

MINI ATX.

Ready for water cooling.

Dust filters.

Mesh front panel.

Two 120 mm ARGB fans on the front of the case included.

One 120mm ARGB fan on the back of the case included.

Tempered glass side panel door.

1 USB 3.0 port on the top panel.

2 USB 2.0 ports on the top panel.

Technical specification

— LOGIC PORTOS ARGB MINI

3 x port USB (1 x USB 3.0 and 2 x USB 2.0).
 HD Audio. 1 minijack port microphone / headphones.

Fan mounting locations:

- front 2 x 120 mm or 2 x 140 mm.
- top 2 x 120 mm or 2 x 140 mm.
- back 1 x 120 mm.

Possibility to install water cooling: Yes.

Fans installed:

- 2 x 120 mm ARGB on front panel.
- 1 x 120 mm ARGB on back panel.

Drive installation locations:

- Inside:
 - bay 2 x 3,5" (or 1 x 2,5" i 1 x 3,5").
 - 1 x 2.5" on the motherboard tray.
- PCI-E: x 4

ATX power supply installation: bottom.

ATX power supply length: 200 mm (with drive basket).

Dimensions [depth x width x height].

Dimensions without front panel: 350mm*200mm*375mm

Dimensions with panel and feet: 390mm*200mm*385mm

Maximum motherboard size: ATX

Possibility of mounting graphics cards: up to 340 mm

The maximum height of the CPU cooler: 155 mm

Available colors: black / white.
