# MODECOM BREEZE ARGB FLOW MIDI

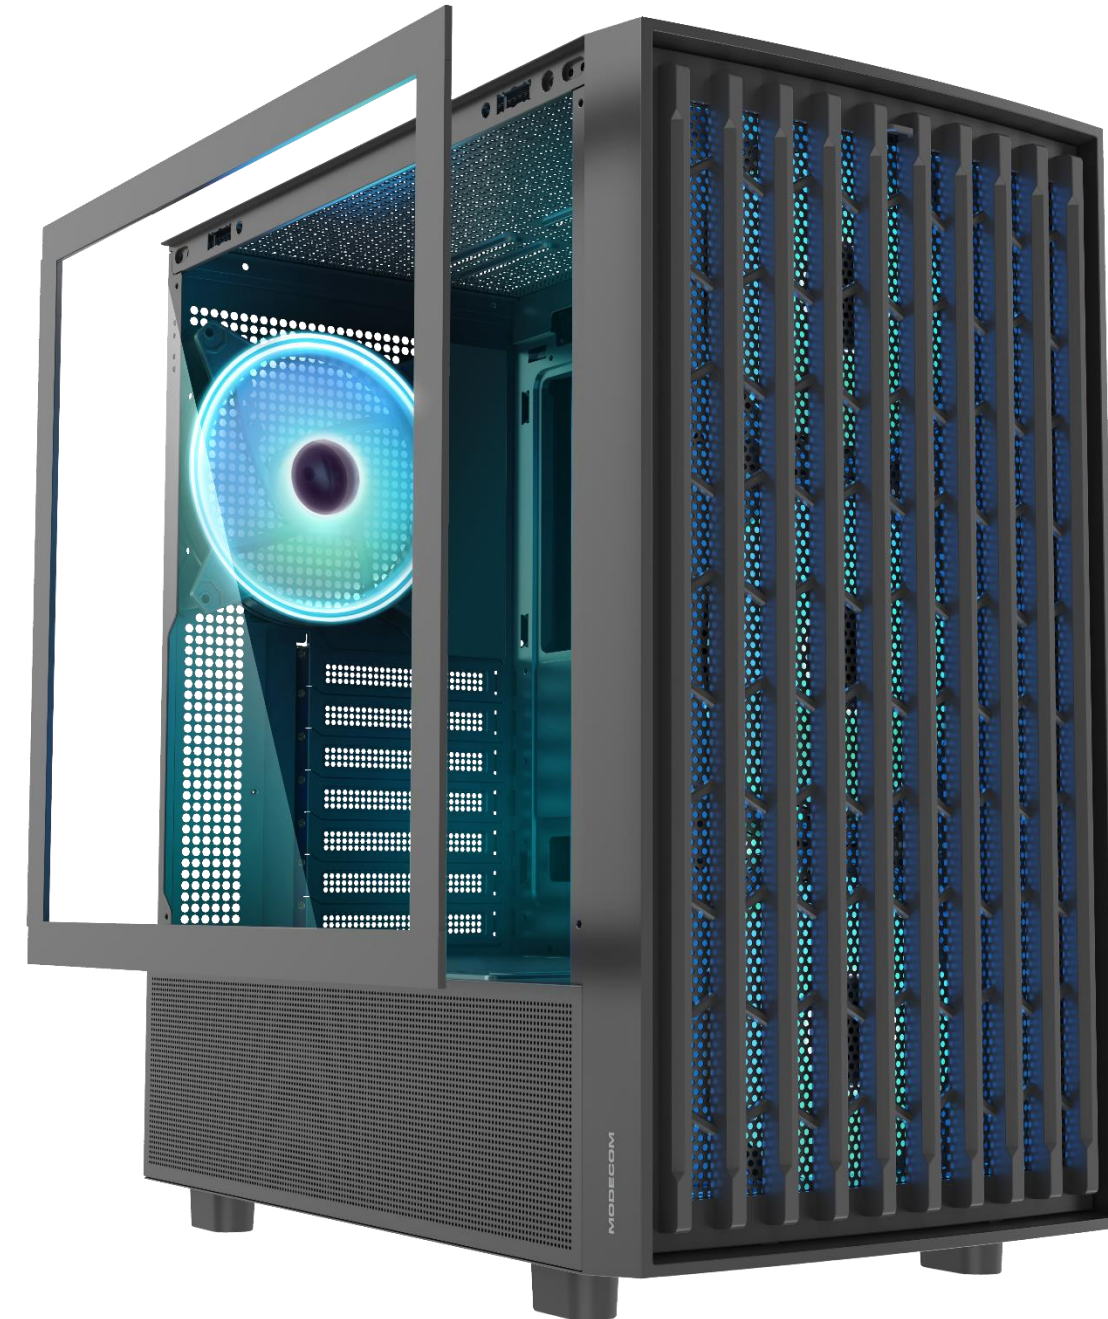

# JUST CHOOSE WHAT YOU LIKE

MODECOM Breeze ARGB Flow Midi is a computer case designed to build a versatile and universal personal computer. When creating the "breeze", our main goal was optimal air circulation and pleasure of components installation and, in the long run, modernization of the computer. This PC case was made for people starting their adventure with computers as well as advanced users. We installed **four 140 mm fans (three at the front and one at the back) with ARGB backlight and LED rings**, showing the installed components in the best way. But it is not everything. You also receive a **fan controller** as standard and practical solutions for keeping your computer clean, such as **conveniently removable front panel with a dust filter**. There are more filters here - you will find them at the bottom of the PC case and on the top panel. The side panel is made of tempered glass and mounted on snaps. **We have done everything to ensure that you simply like the implemented solutions.**

- ✓ 4 140 mm ARGB fans pre-installed.
- ✓ Glass side panel with snaps.
- ✓ Airy front and top panel.
- ✓ Ventilation holes on the side panel to optimize air circulation.

- ✓ 2 x USB 3.0 and 1 x USB-C.
- ✓ Removable covers for PCI-E slots.
- ✓ Conveniently removable front construction element to clean the filter without having to remove the entire panel.
- ✓ Ready for installation of water cooling.

- ✓ Dust filters.
- ✓ Tunnel for the power supply.
- ✓ Space for 2 hard drives (1 SSD/1 HDD or 2 x HDD configuration).
- ✓ ARGB fan controller.

## MODECOM BREEZE

# COLD? IT SHOULD BE!

Four 140 mm ARGB fans are installed in the case. Three of them, mounted on the front, force cold air into the computer, while one, mounted on the rear panel, blows hot air out.

This solution ensures that your computer runs cool, regardless of the processes and activities performed by the computer.

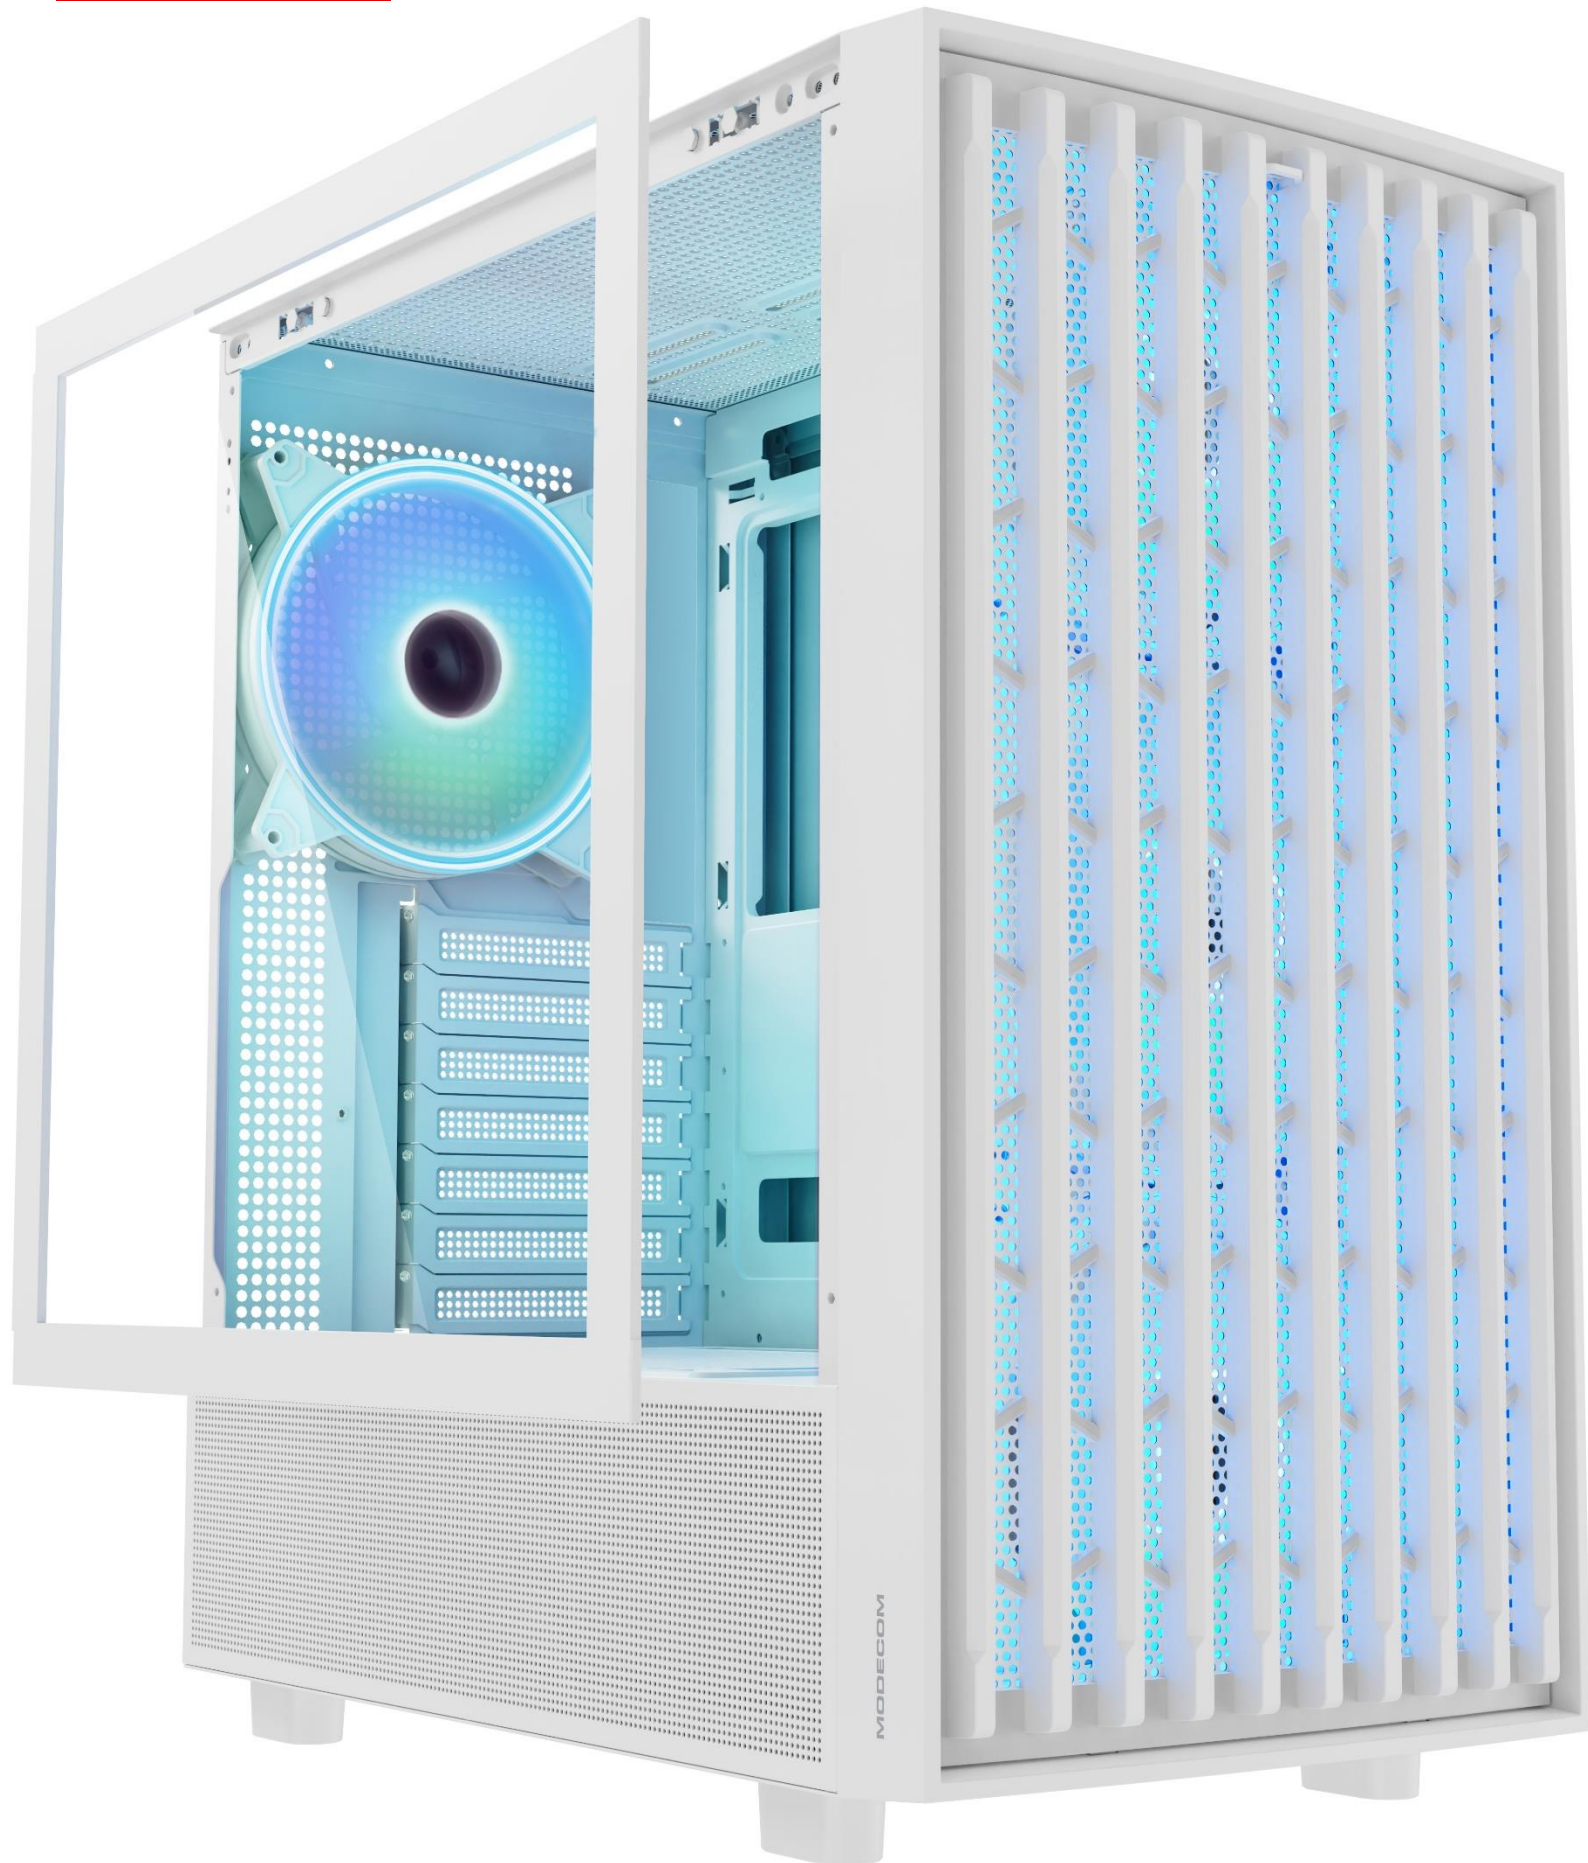

## COOLING

# WHEN YOU NEED EVEN MORE COOLING...

There are many possibilities for expansion with additional air cooling. In addition to the already installed fans, you can install two 120 mm or 140 mm fans on the top and two 120 mm fans on the power supply tunnel.

## MODECOM BREEZE

# SIDE PANEL ON SNAPS

---

The side panel made of tempered glass is mounted with snaps. You don't have to remove the screws every time you need to replace a component in the computer or clean the inside.

At the same time, below the height of the removable side panel glass, the metal part of the structure element is ventilated, ensuring even lower operating temperatures of the components.

The introduced solutions aim to maximize the functionality of this PC case.

## MODECOM BREEZE

# FOR THE BEST POSSIBLE EFFECT

Airy panels - front and top - ensure optimal airflow. Small openings at the front effectively bring in cool air while keeping dust particles out, while vents at the back and top dissipate heat.

This is a design in which optimal airflow has a positive effect on the operation of the entire computer.

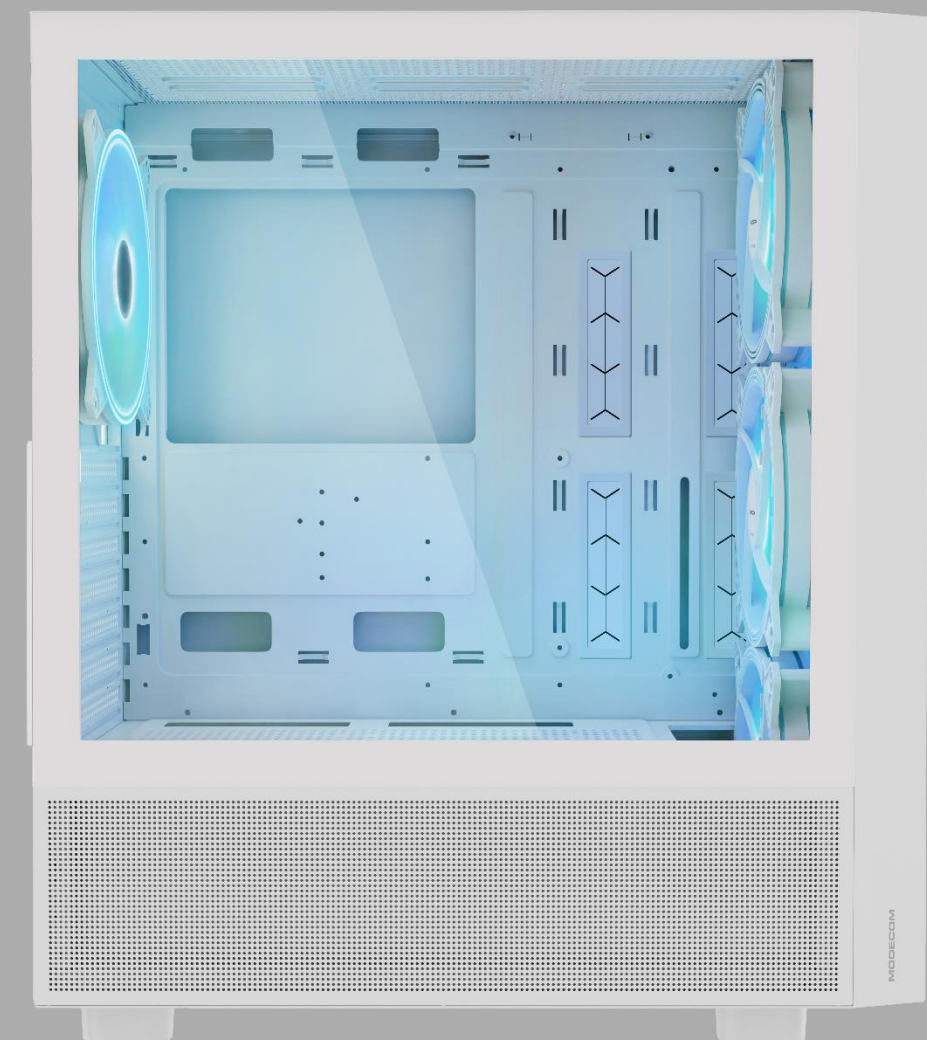

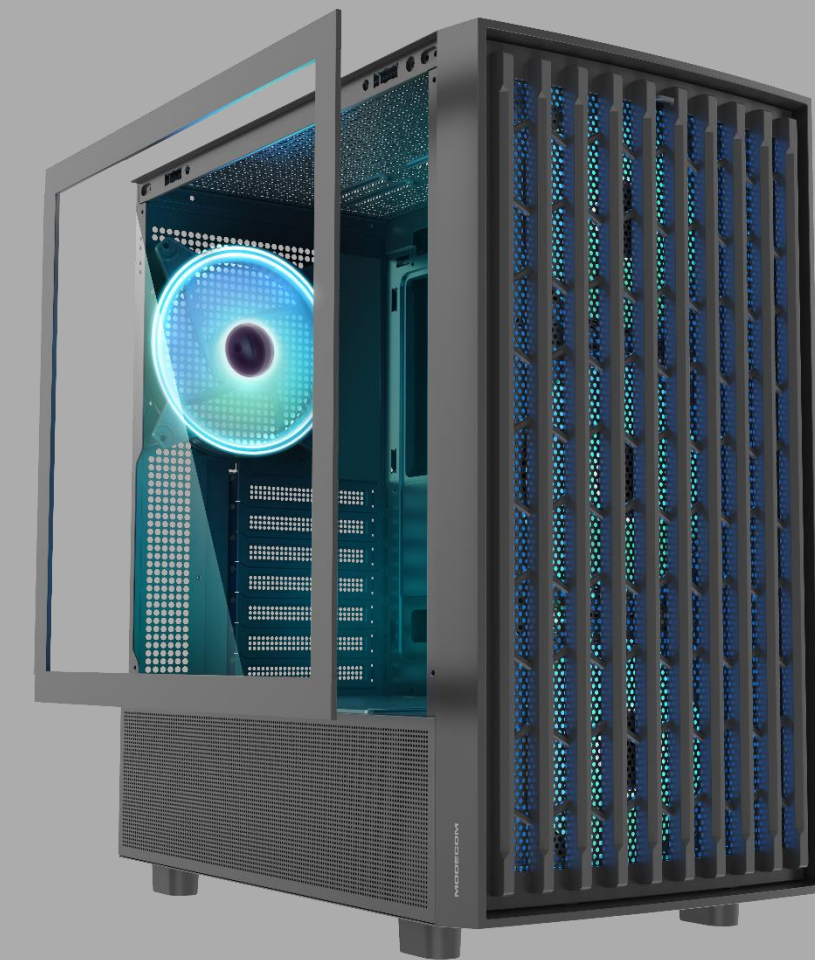

# USE THIS SPACE

---

You can mount 2 hard drives in the MODECOM Breeze PC case. It's up to you whether you want to install them in a configuration of 1 SSD and 1 HDD or 2 HDD.

You can mount all the drives in the hard drive basket, located in the power supply tunnel.

If you add space for M.2 drives on the motherboard, the computer in the MODECOM Breeze will become the optimal storage for games, documents and programs.

# CONTROL WITH A CONTROLLER

You can set the backlight color and rotation speed of the installed ARGB fans using the built-in ARGB controller. This gives you even greater options for configuring your computer. You decide what your work, study and gaming station will look like!

The controller allows you to connect 9 fans.

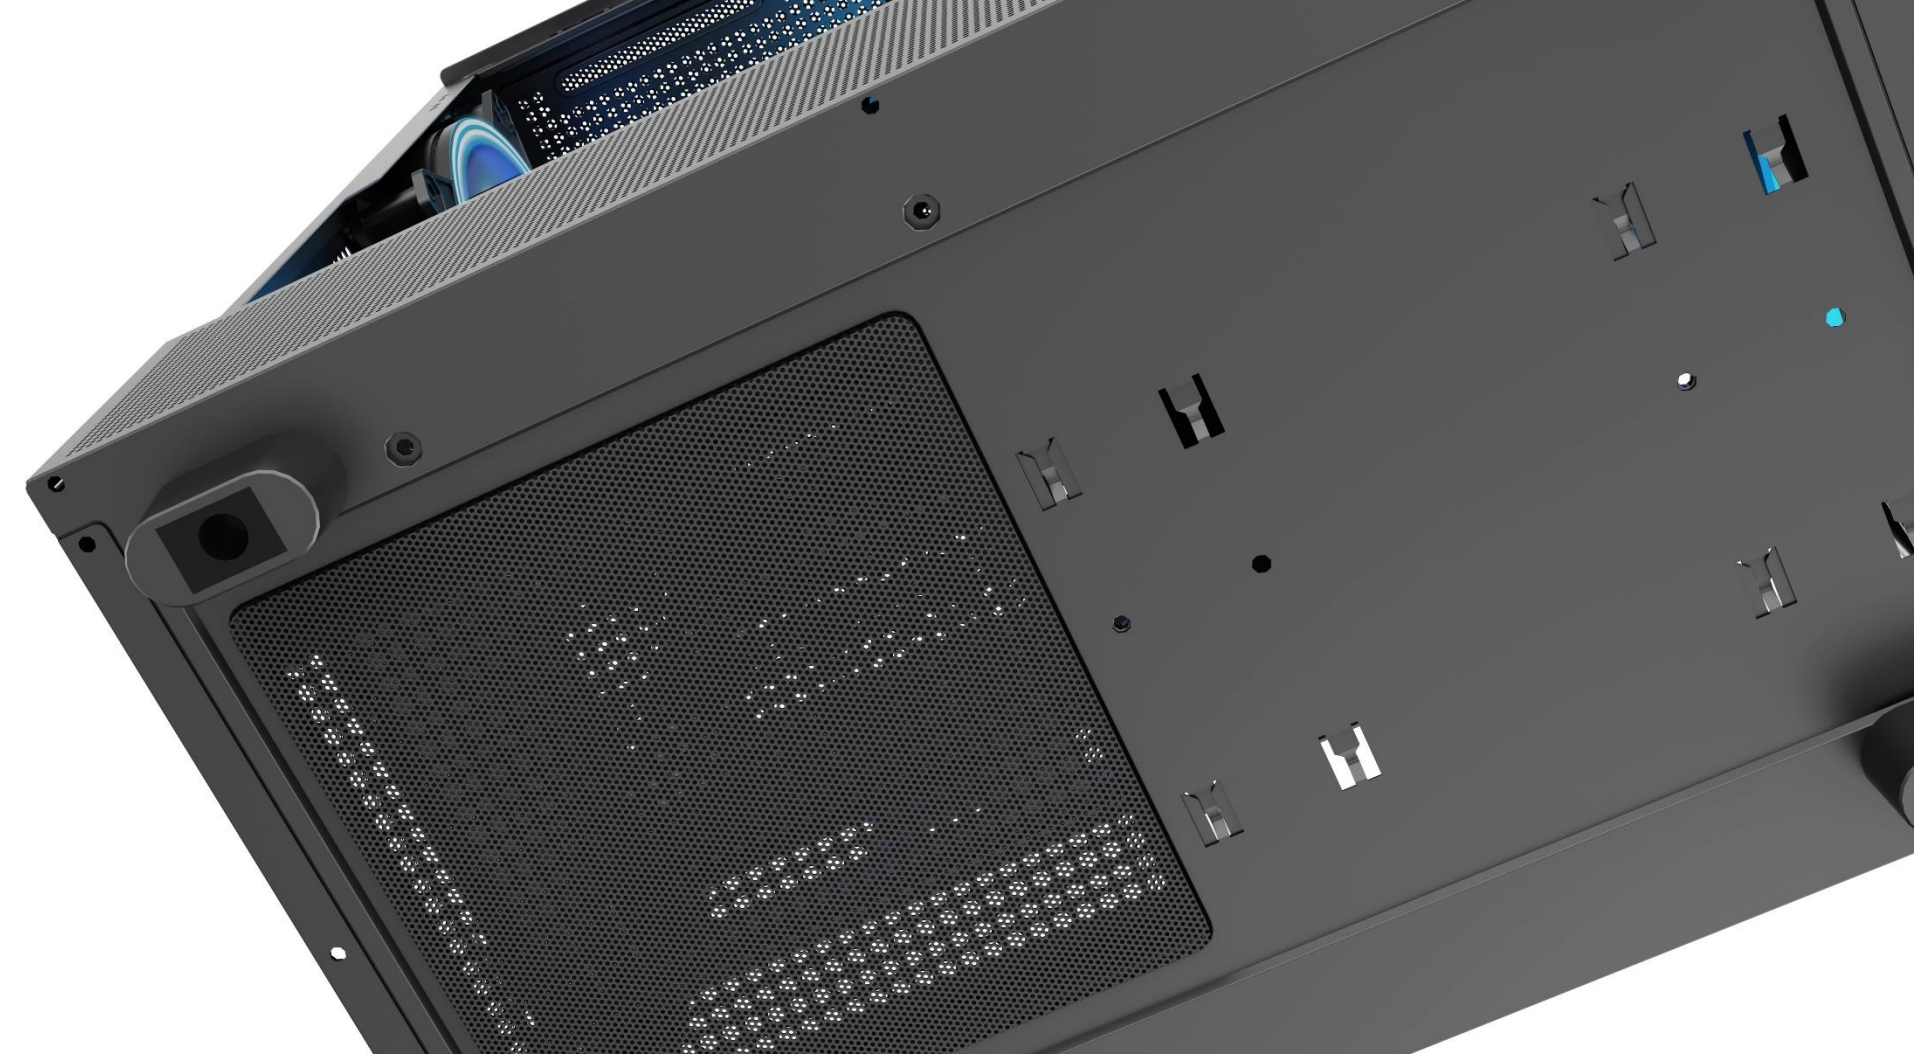

## PROTECTION FROM DUST

---

# DON'T YOU LIKE CLEANING? THAT'S GOOD!

## EFFECTIVE PROTECTION AGAINST DIRT AND DUST

---

Your computer in the MODECOM Breeze computer case is **effectively protected against dust**. The dust filter under the power supply and the magnetic filter on the top panel effectively minimize the amount of dust inside the case. Small holes on the front panel also help keep the inside of the computer clean.

If you don't like cleaning, this case is just for you - the dust protection is exemplary.

## MODECOM BREEZE

# LETS PLAY SOMETHING

---

The well-designed interior of the case allows for the installation of a high CPU cooler (up to 175 mm) and long graphics cards (up to 330 mm or 360 mm if the fans are removed).

Here is a case in which you can build an efficient and modern gaming computer.

# THE COLORFUL WORLD OF ARGB

---

Your place of work, study and entertainment does not have to be boring. All this thanks to illuminated ARGB fans. You can set any favorite color and lighting mode to fit even better into the interior design.

Your desk can take on interesting colors - take advantage of this opportunity!

## MODECOM BREEZE

---

# ERGONOMICS AND COMFORT

On the top panel we have placed two USB 3.0 ports and one USB-C port. Thanks to this, you can conveniently connect a pendrive and other devices.

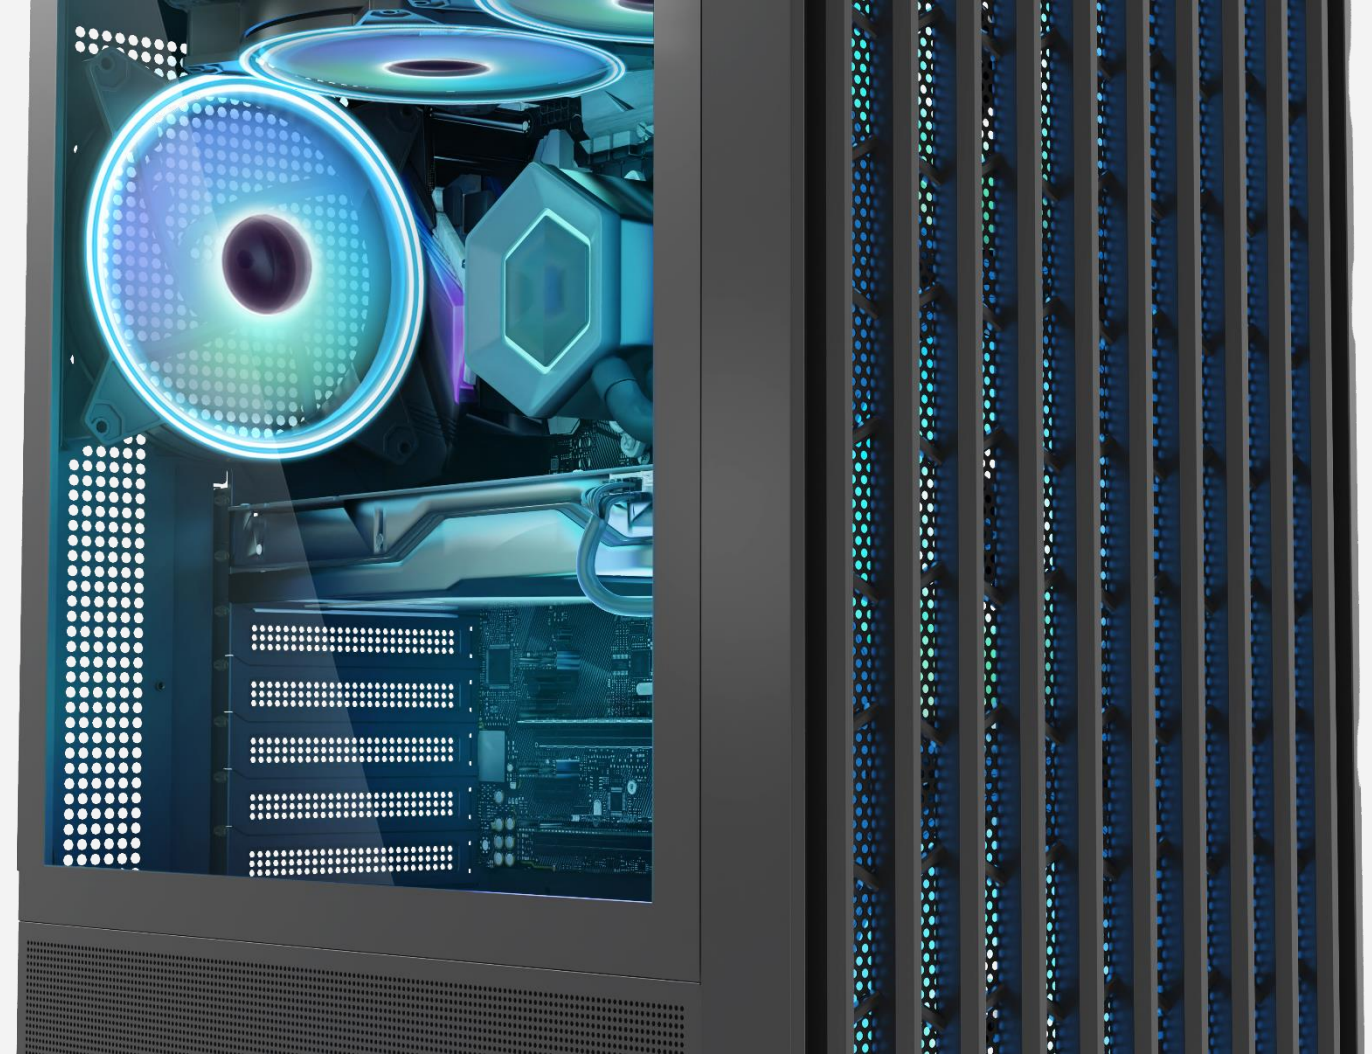

The panel also has an HD audio input for a microphone and headphones, as well as a Power and LED/Reset button.

This solution is especially useful when the computer is placed on the floor - all ports are within easy reach.

DO IT YOURSELF - IT'S EASY!

# PLEASURE OF INSTALLATION

## PRACTICAL INTERIOR

A side panel made of tempered glass mounted with snaps and rubberized cable grommets allow for pleasant and convenient components installation. All of this to give you practical solutions. Building a computer in the MODECOM Breeze computer case will be easy and pleasant.

## MODECOM BREEZE

---

# PSU TUNNEL

When you are building an efficient and modern computer for gaming and fun, you need a modern and powerful power supply.

In the MODECOM Breeze, you can mount it in a dedicated tunnel, ensuring optimal and uninterrupted operation.

The maximum length of the power supply with the mounted disk basket is 185 mm. However, longer power supplies can be installed by removing the basket.

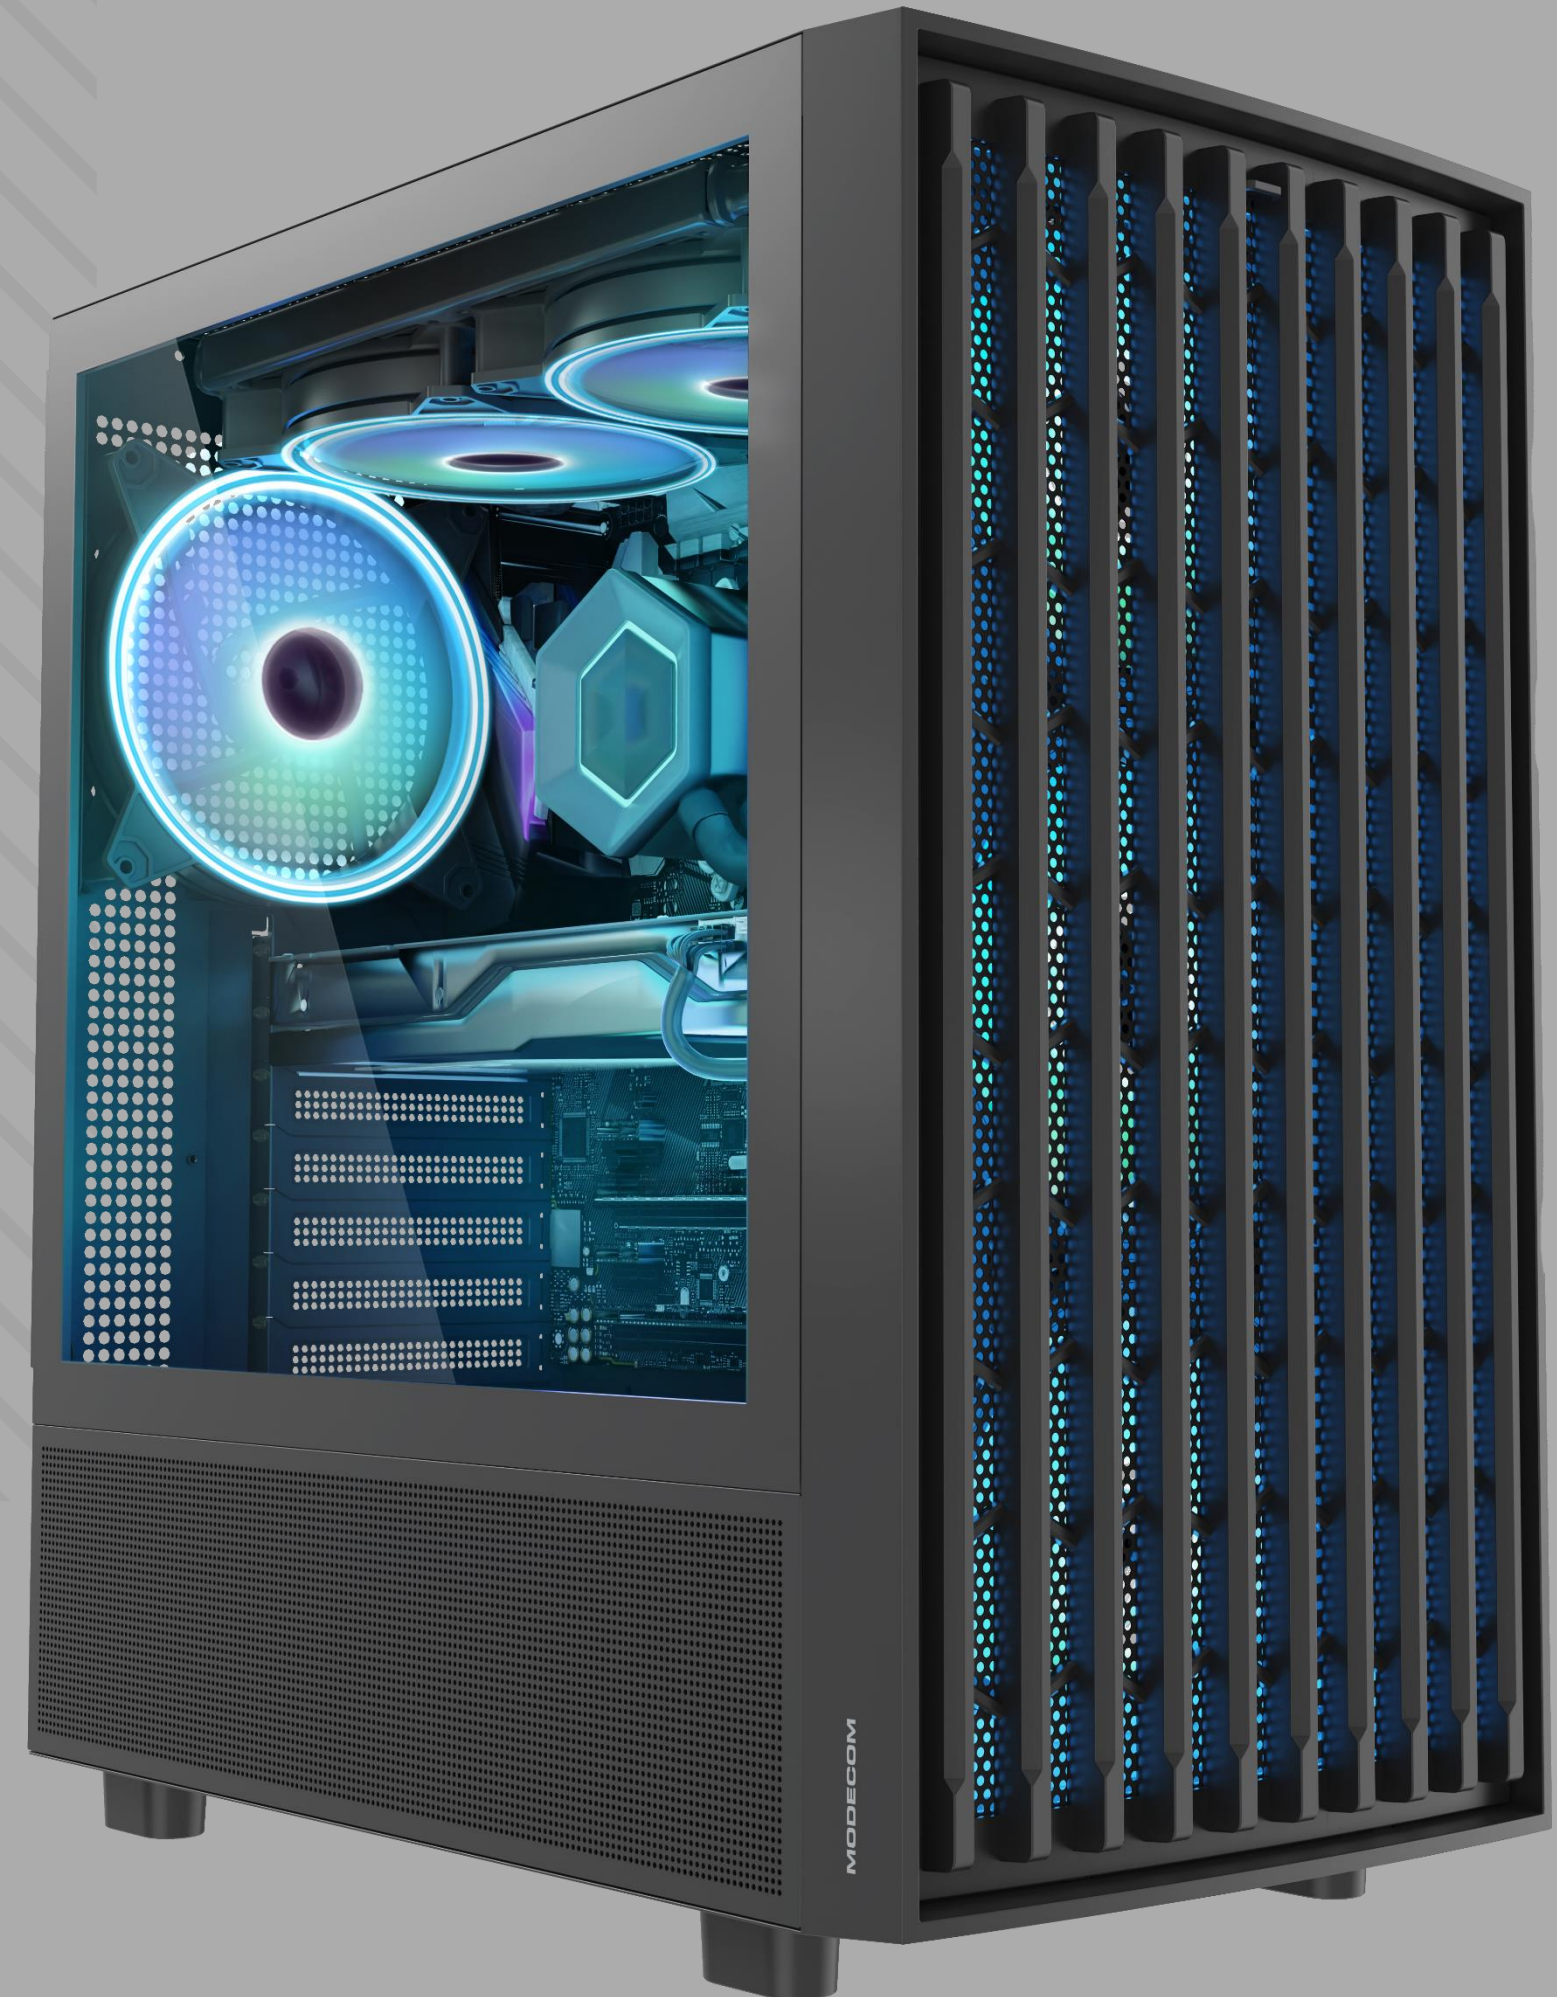

# WATER COOLING? SURE!

---

This computer case is ready for water cooling installation. If you decide that air cooling is not enough for you, **you can install a radiator up to 360 mm at the front, up to 280 mm at the top and up to 140 mm at the rear.**

There are many computer configuration options - simply decide which option is best for you.

MODECOM BREEZE

# FOR ANY TASKS

---

Are you a graphic designer? Are you a designer? No matter what office work you do - in this case you can build a computer for every task. And when you want to relax after work, you will spend a nice evening playing your favorite game.

---

# EVERYTHING IS IN ITS PLACE

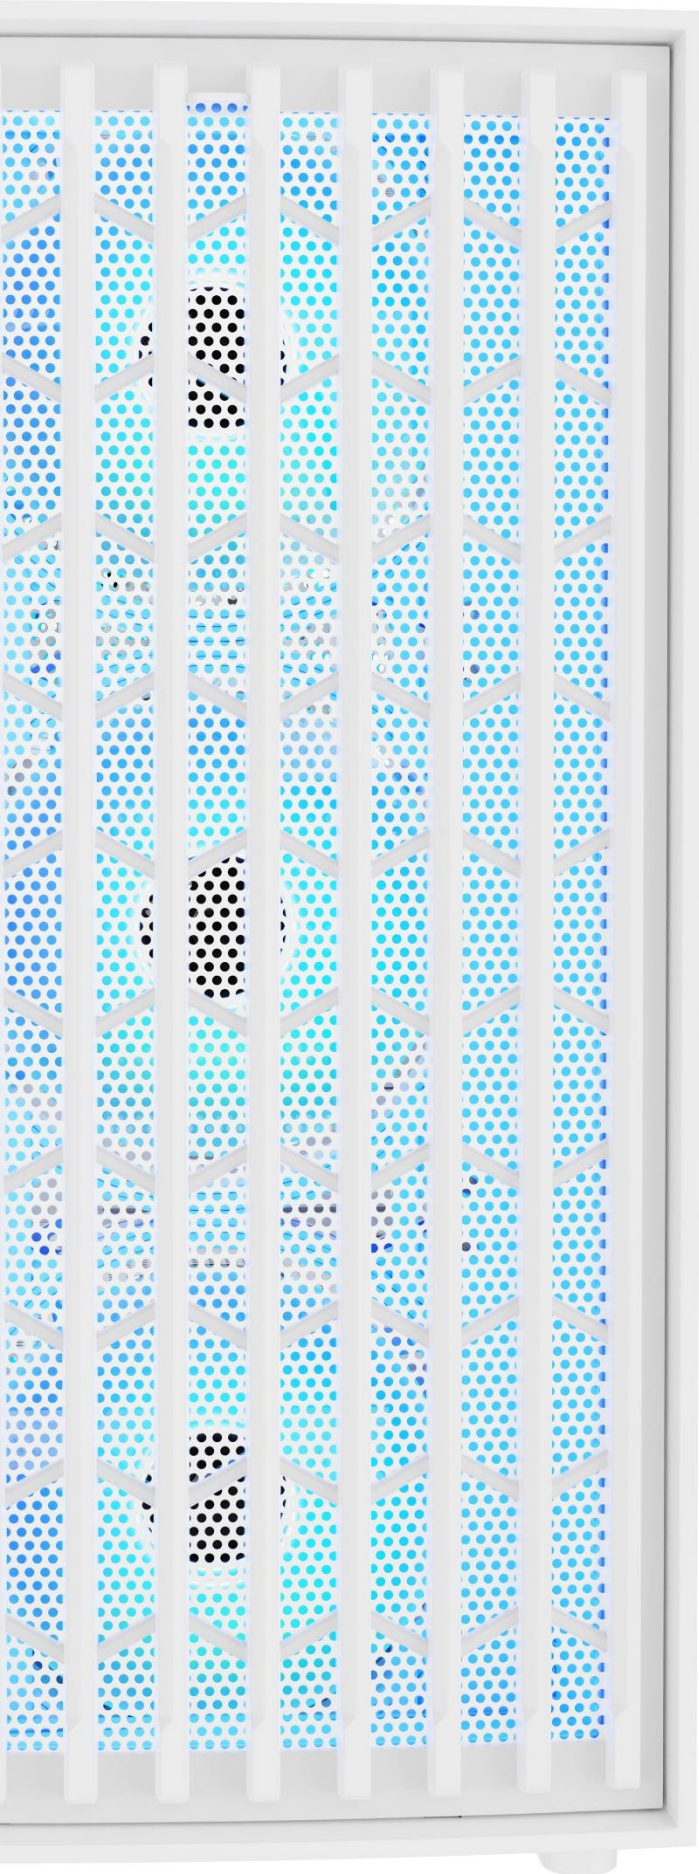

Illustrative photo

## SCREW BOX

---

For maximum convenience of assembling the computer, you will find a box with mounting screws inside the case. Everything is organized and in its place - all to make the computer assembly as simple as possible.

## MODECOM BREEZE

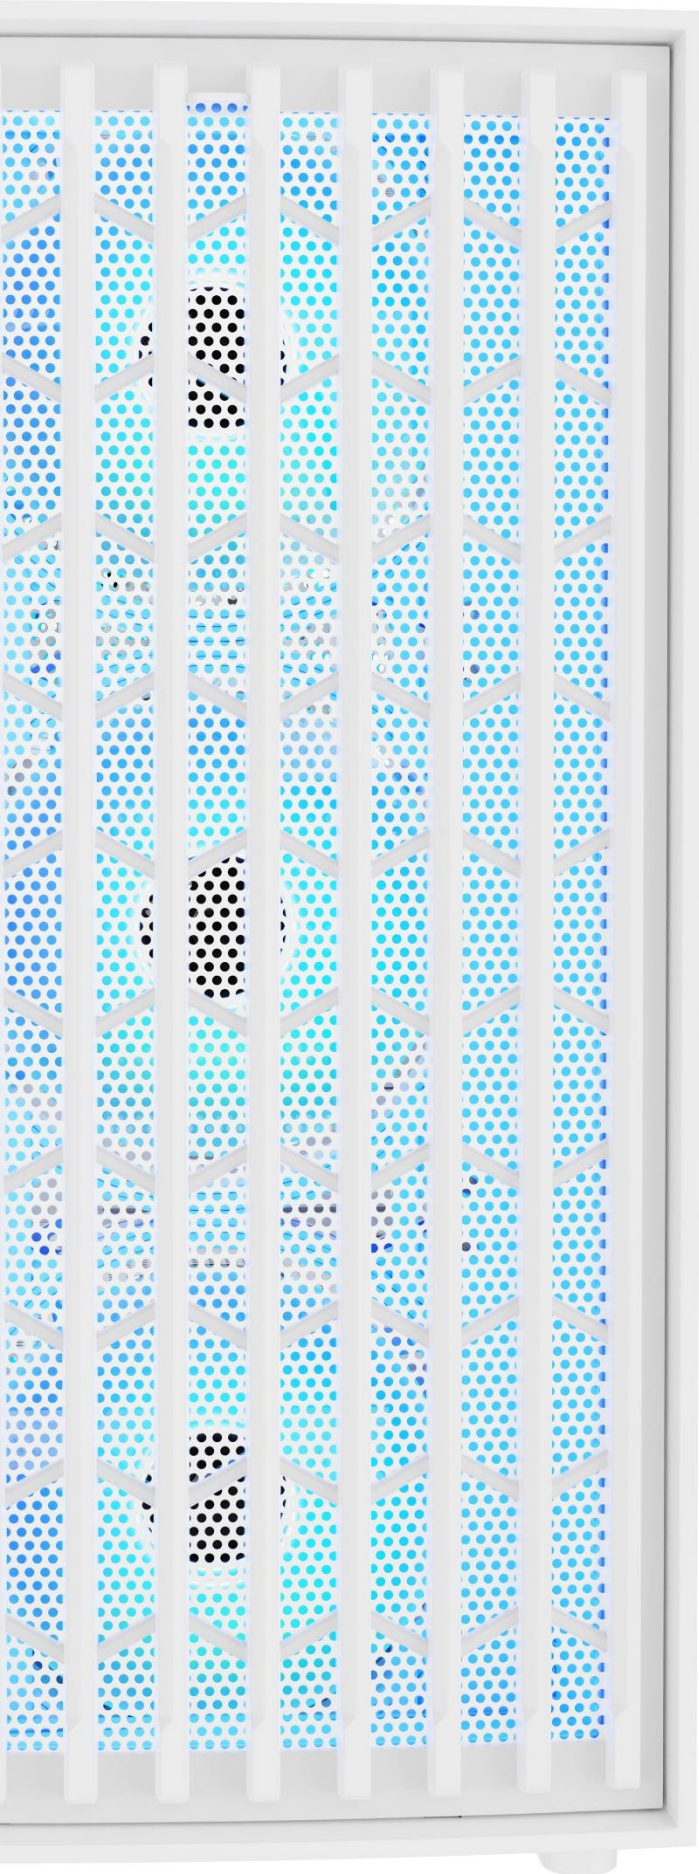

---

# READY FOR EVERYTHING

This computer case is ready for all tasks. There are factory-installed fans and dust filters, and the available solutions allow you to build a modern computer.

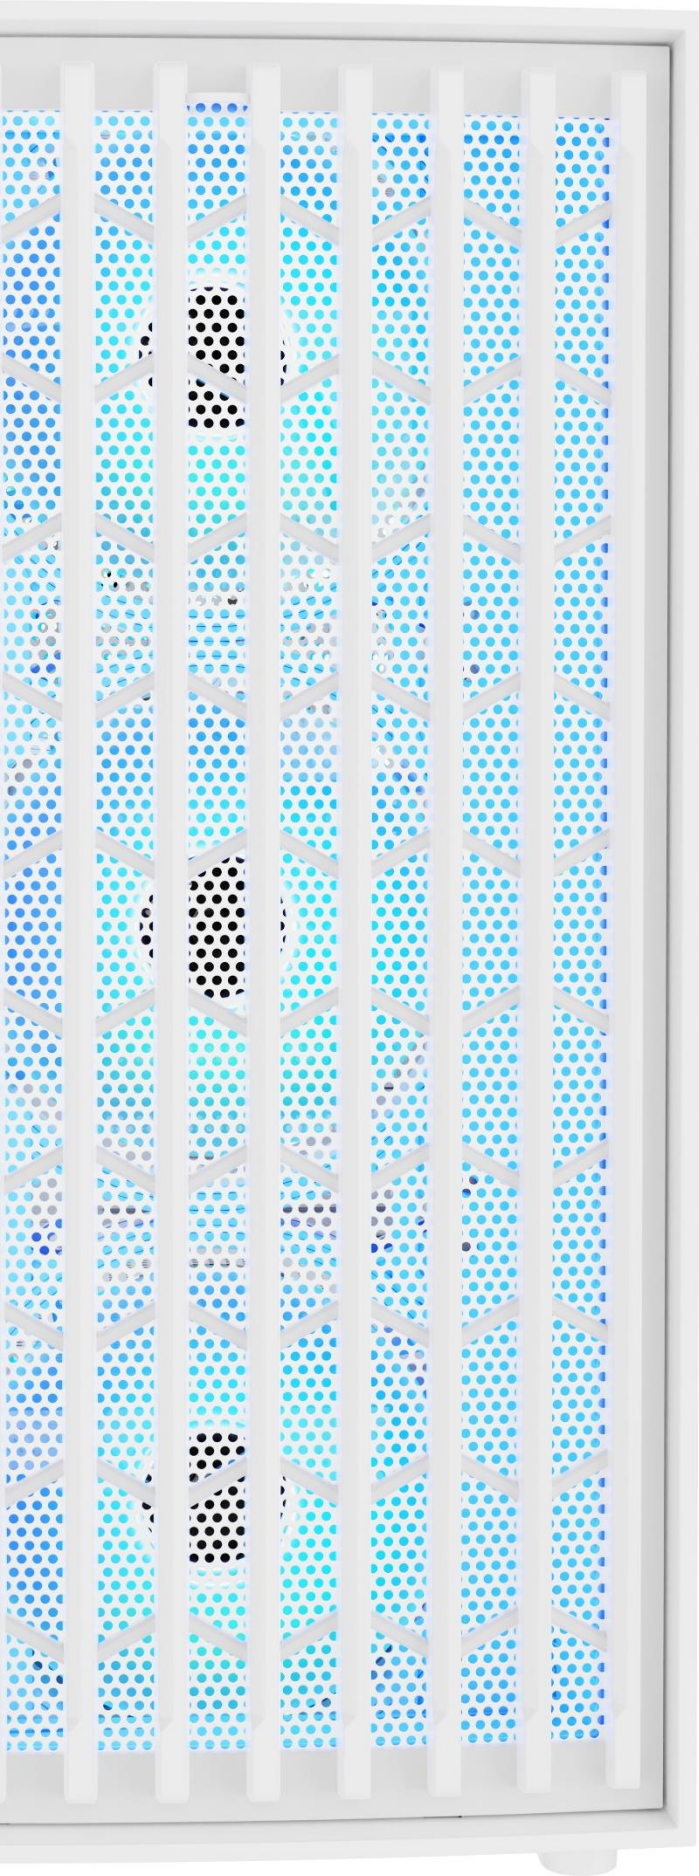

## MODECOM BREEZE

---

# CONVENIENCE AND COMFORT

Removing the front filter is very easy and simple. It's rare to find such simple and easy solutions to keep your computer clean.

## MODECOM BREEZE

---

# MODERN DESIGN

ATX size case, well designed with a modern and airy front panel.

## 5 REASONS WHY IT'S WORTH HAVING IT

01. **4 PRE-INSTALLED ARGB FANS**

02. **MESH FRONT AND TOP PANEL**

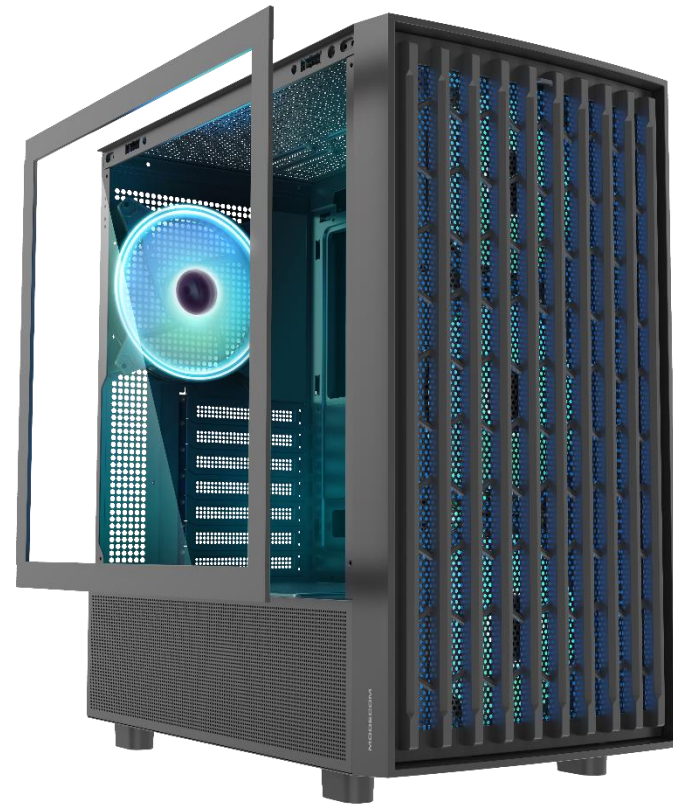

03. **TEMPERED GLASS SIDE PANEL MOUNTED WITH SNAPS**

04. **FAN CONTROLLER**

05. **DUST FILTERS**

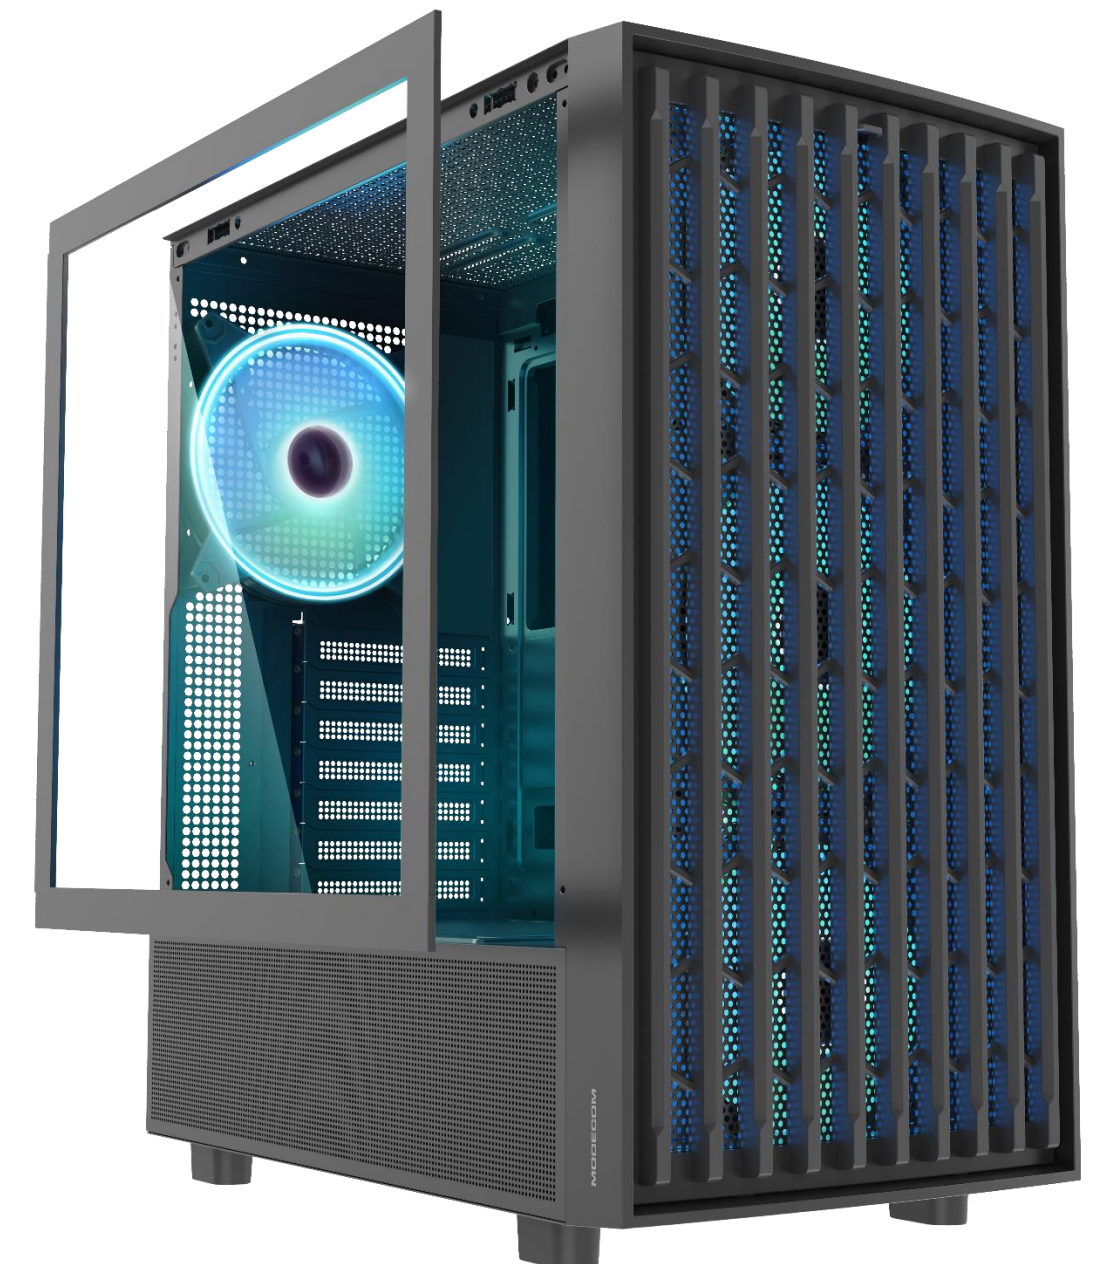

# MODECOM BREEZE ARGB FLOW MIDI

Model	MODECOM Breeze
Front panel	Mesh
Top panel	Mesh
Side panel	Tempered glass on snaps. Airy lower metal side panel.
Steel thickness	0.4 - 0.5 mm
I / O ports	USB-C x 1, USB 3.0 x 2 Microphone input Headphone input / HD audio Power and Led / Reset
PSU length	185 mm (with mounted disk basket) PSU tunnel
Pre-installed fans	Front: 3 x 140 mm ARGB Rear: 1 x 140 mm ARGB
Fans mounting place	Front: 3 x 120 mm / 140 mm Top: 2 x 120 mm / 140 mm Rear: 1 x 120 mm / 140 mm PSU tunnel: 2 x 120 mm
Fan controller	Yes - 9 connectors
Dust filters	Front / top / bottom
HDD / SSD mounting place	Basket: 2 x 3,5" or 1 x 3,5" and 1 x 2,5"
PCI slots	7 slot covers - all removable with screws
PC case size	418 x 230 x 456 mm
Chassis size	360 x 230 x 436 mm
GPU length	330 mm with front fans installed 360 mm without front fans
CPU cooling length	175 mm
Max motherboard size	ATX
Water cooling	Ready for water cooling Front: 240 mm / 280 mm / 360 mm Top: 240 mm / 280 mm Rear: 120 mm
Weight netto	4,98 kg
