

MODECOM HORIZON ARGB FLOW MIDI

YOUR DREAM PC CASE IS HERE, NOT OVER THE HORIZON.

www.modecom.com

MODECOM Horizon is one of those cases that fully meets the need for a decent, solidly made and functional computer case. This classic-looking PC case has a lot to offer. There are three 140 mm ARGB fans installed as standard at the front and one 120 mm ARGB fan at the back of the case. Additionally, inside you will find plenty of space even for E-ATX motherboards, high CPU cooling and long graphics cards. And all this is closed behind a side door made of tempered glass, surrounded by mesh panels with dust filters.

- ✓ 3 x 140 mm ARGB fans pre-installed on the front of the case.
- ✓ 1 x 120 mm ARGB fan pre-installed on the back of the case.
- ✓ Side door panel made of tempered glass.
- ✓ Mesh front and top panel.

- ✓ 2 x USB 3.0 and 1 x USB-C.
- ✓ PCI-E slots with screws.
- ✓ Ready for E-ATX motherboards.
- ✓ Ready for water cooling.
- ✓ PSU tunnel.
- ✓ Available in fashionable white or elegant black.

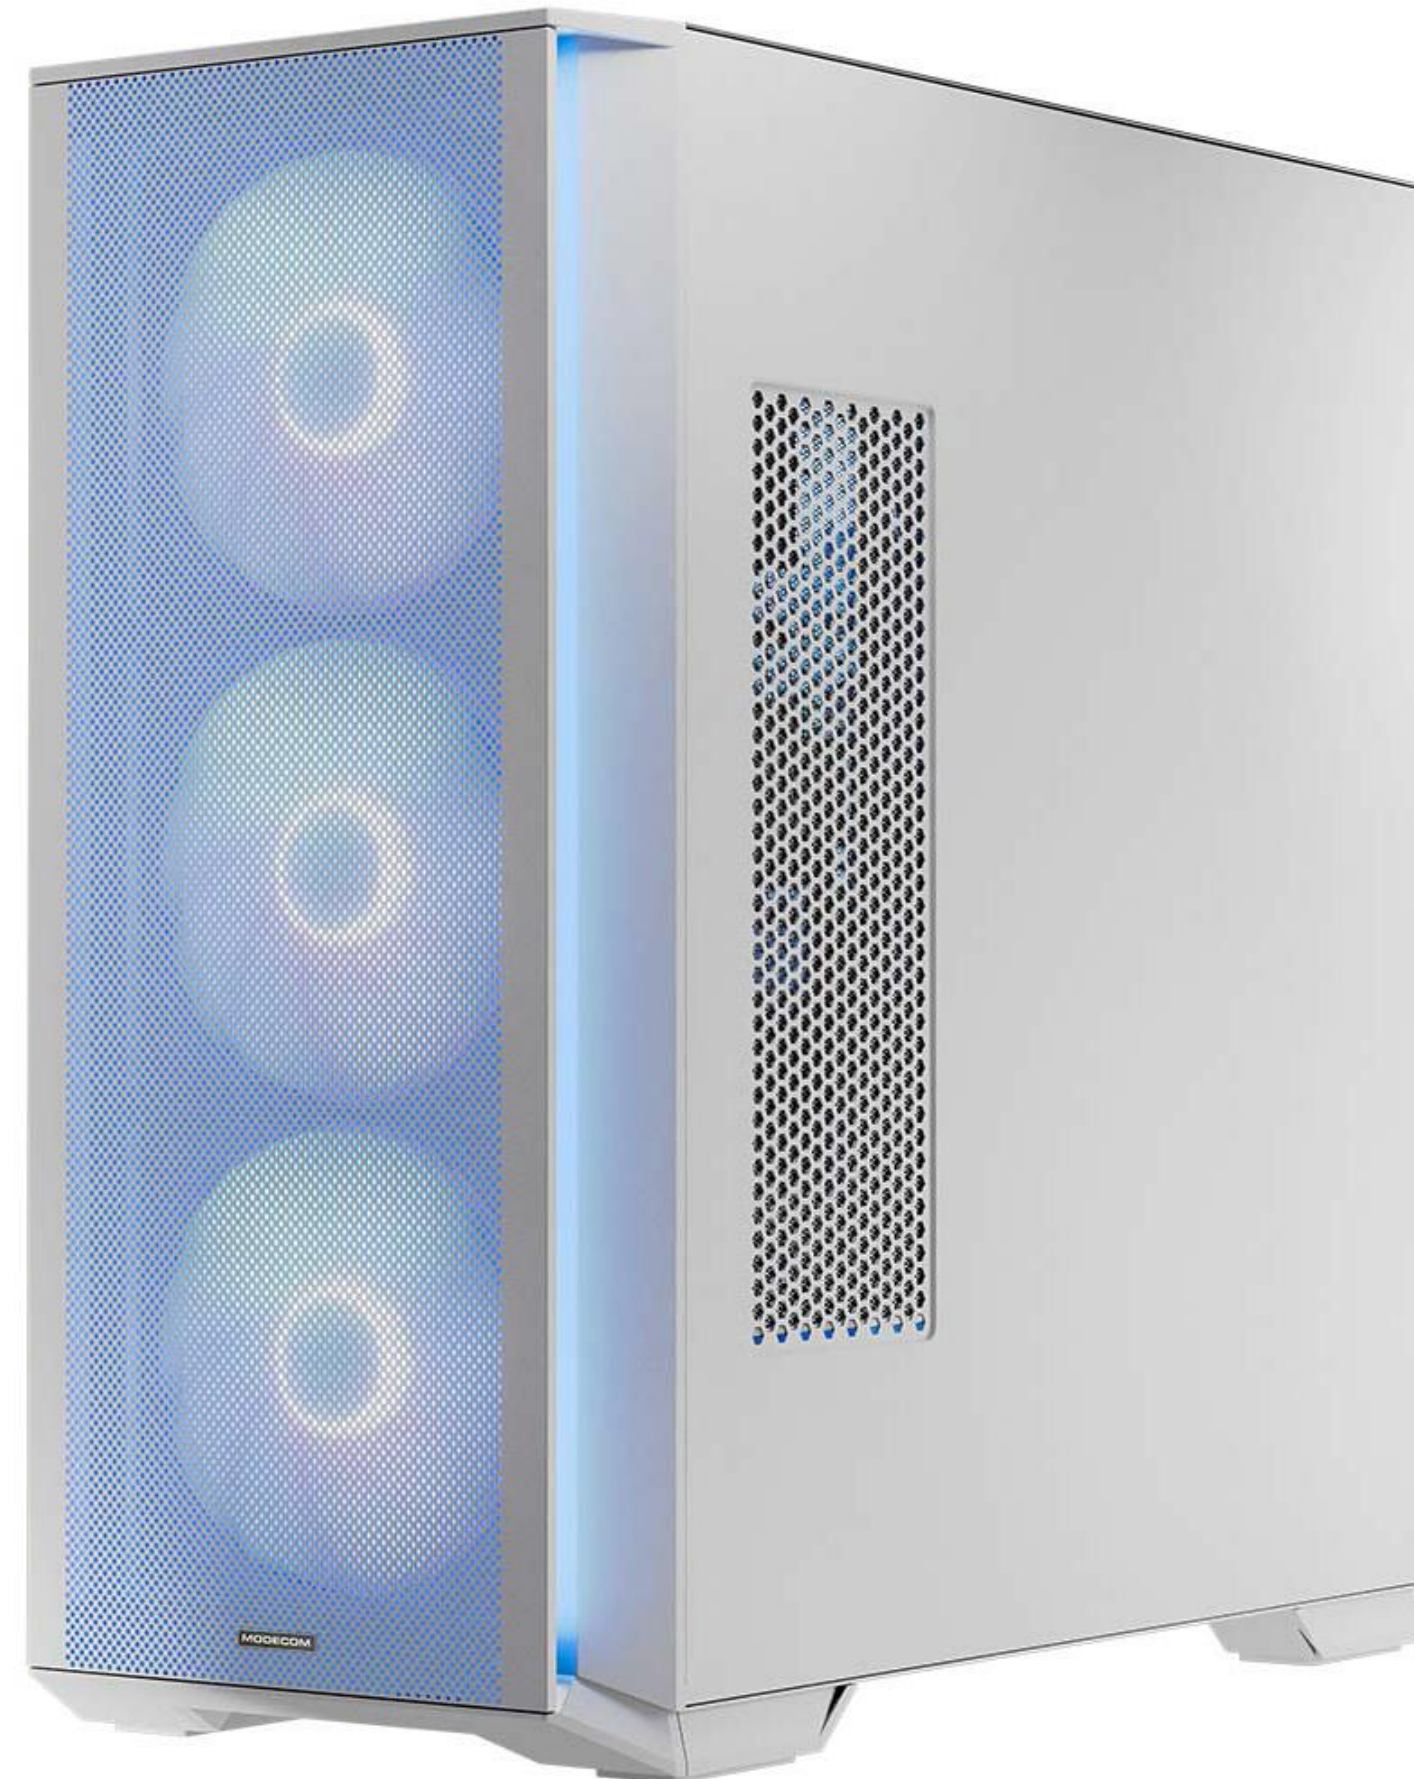

- ✓ Four dust filters - bottom, top, front and side of the housing.
- ✓ Easily removable mesh on the front.
- ✓ Space for 4 hard drives (2 SSD / 2 HDD or 3 SSD / 1 HDD or 4 SSD configuration).
- ✓ ARGB fan controller.

MODECOM HORIZON

NOTHING CAN STOP THIS WIND

The case has **three 140 mm ARGB fans pre-installed on the front**, forcing cold air into the computer, while **one 120 mm ARGB fan, mounted on the rear panel**, is designed to blow hot air out.

You get an "out of the box" case - just install the components and work on a well-cooled and ventilated computer.

CREATE A WIND

But that's not all - **you can install additional 3 x 120 mm or 2 x 140 mm fans on the top of the case by yourself.** It is also possible to install two 120 mm fans on the motherboard wall.

A computer configured in this way will be cooled in an optimal way, ensuring that the components operate at low temperatures, contributing to their longer lifespan.

MODECOM HORIZON

DON'T CLOSE YOURSELF TO NEW THINGS

A side panel door made of tempered glass makes it very convenient to assemble and clean the computer. You can easily and conveniently open the door and replace RAM, graphics card or other components.

There is no simpler and more convenient solution for assembling and modifying the computer's interior and cleaning it than the one used in the MODECOM Horizon PC case.

Tempered glass, in turn, allows you to display the installed graphics card and other expensive components.

Installation of large motherboards

READY FOR EVERYTHING

E-ATX.

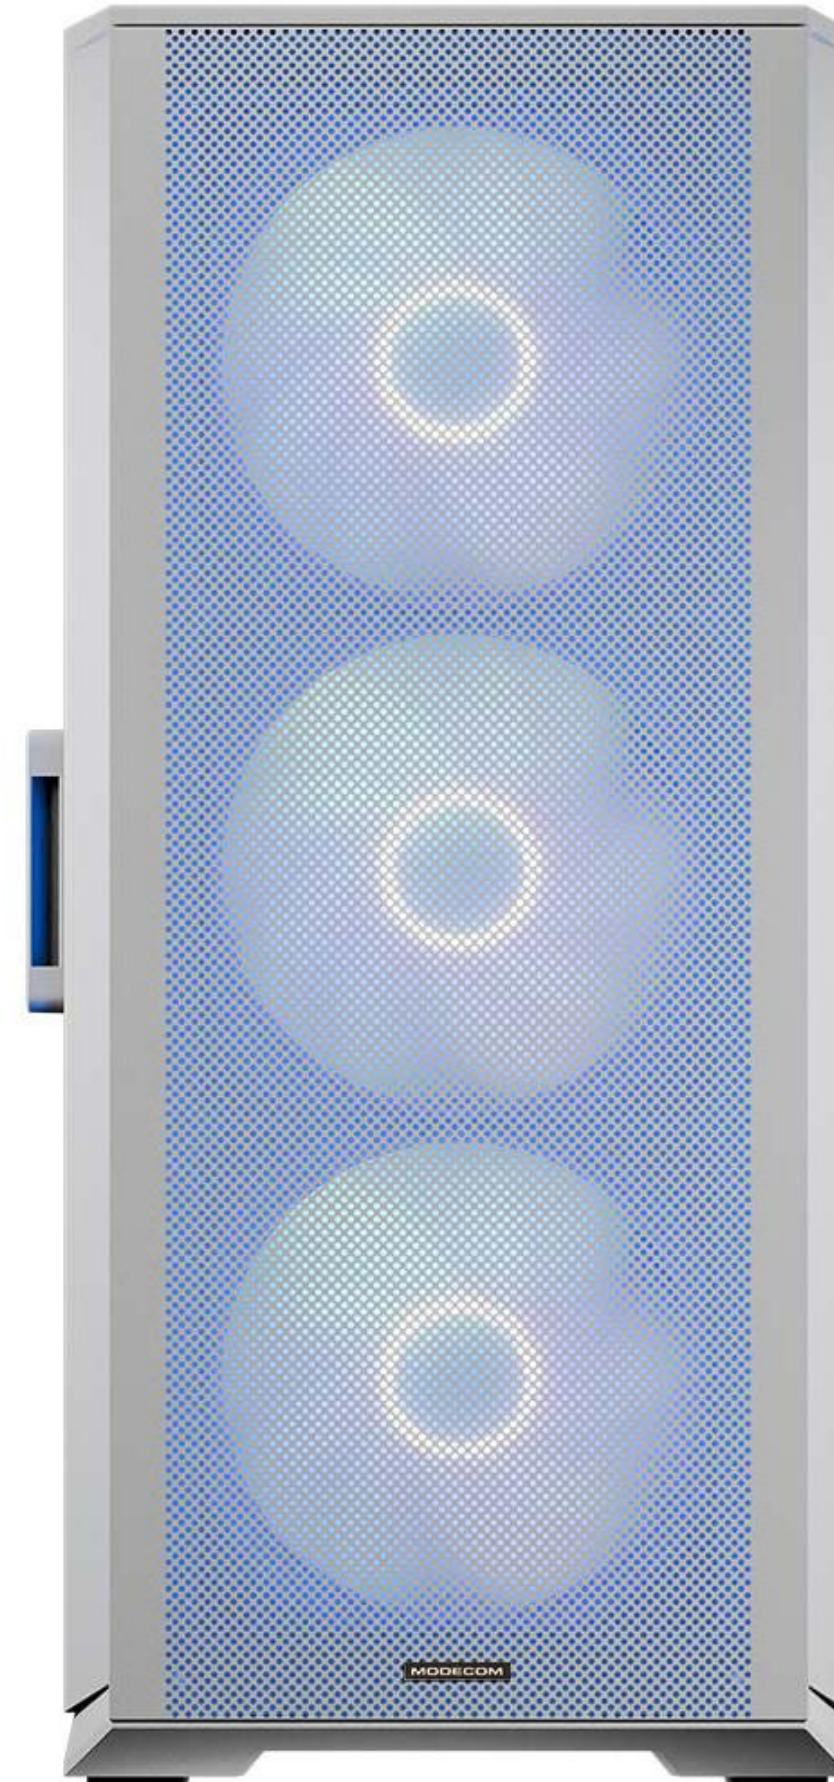

The PC case is designed to mount E-ATX motherboards. The extensive possibilities of arranging and expanding the computer will prove useful both in computers for players and in professional solutions. The unlimited freedom of computer configuration allows for the installation of modern components with the possibility of further expansion.

MODECOM HORIZON

TO MAKE IT EASIER...

Mesh panels - front and top - ensure optimal airflow. Small openings at the front panel effectively bring in cool air while keeping dust particles out, while vents at the back and top dissipate heat.

Cool operation of the components has a positive effect on their operation and durability, so in order to keep them clean, we have designed the front panel so that the front filter can be conveniently cleaned. You don't have to tear out the entire panel to keep the computer clean - the front filter can be removed conveniently and pleasantly.

GAMES AND PROGRAMS WILL FIND THEIR PLACE HERE

The MODECOM Horizon PC case has space for 4 hard drives.

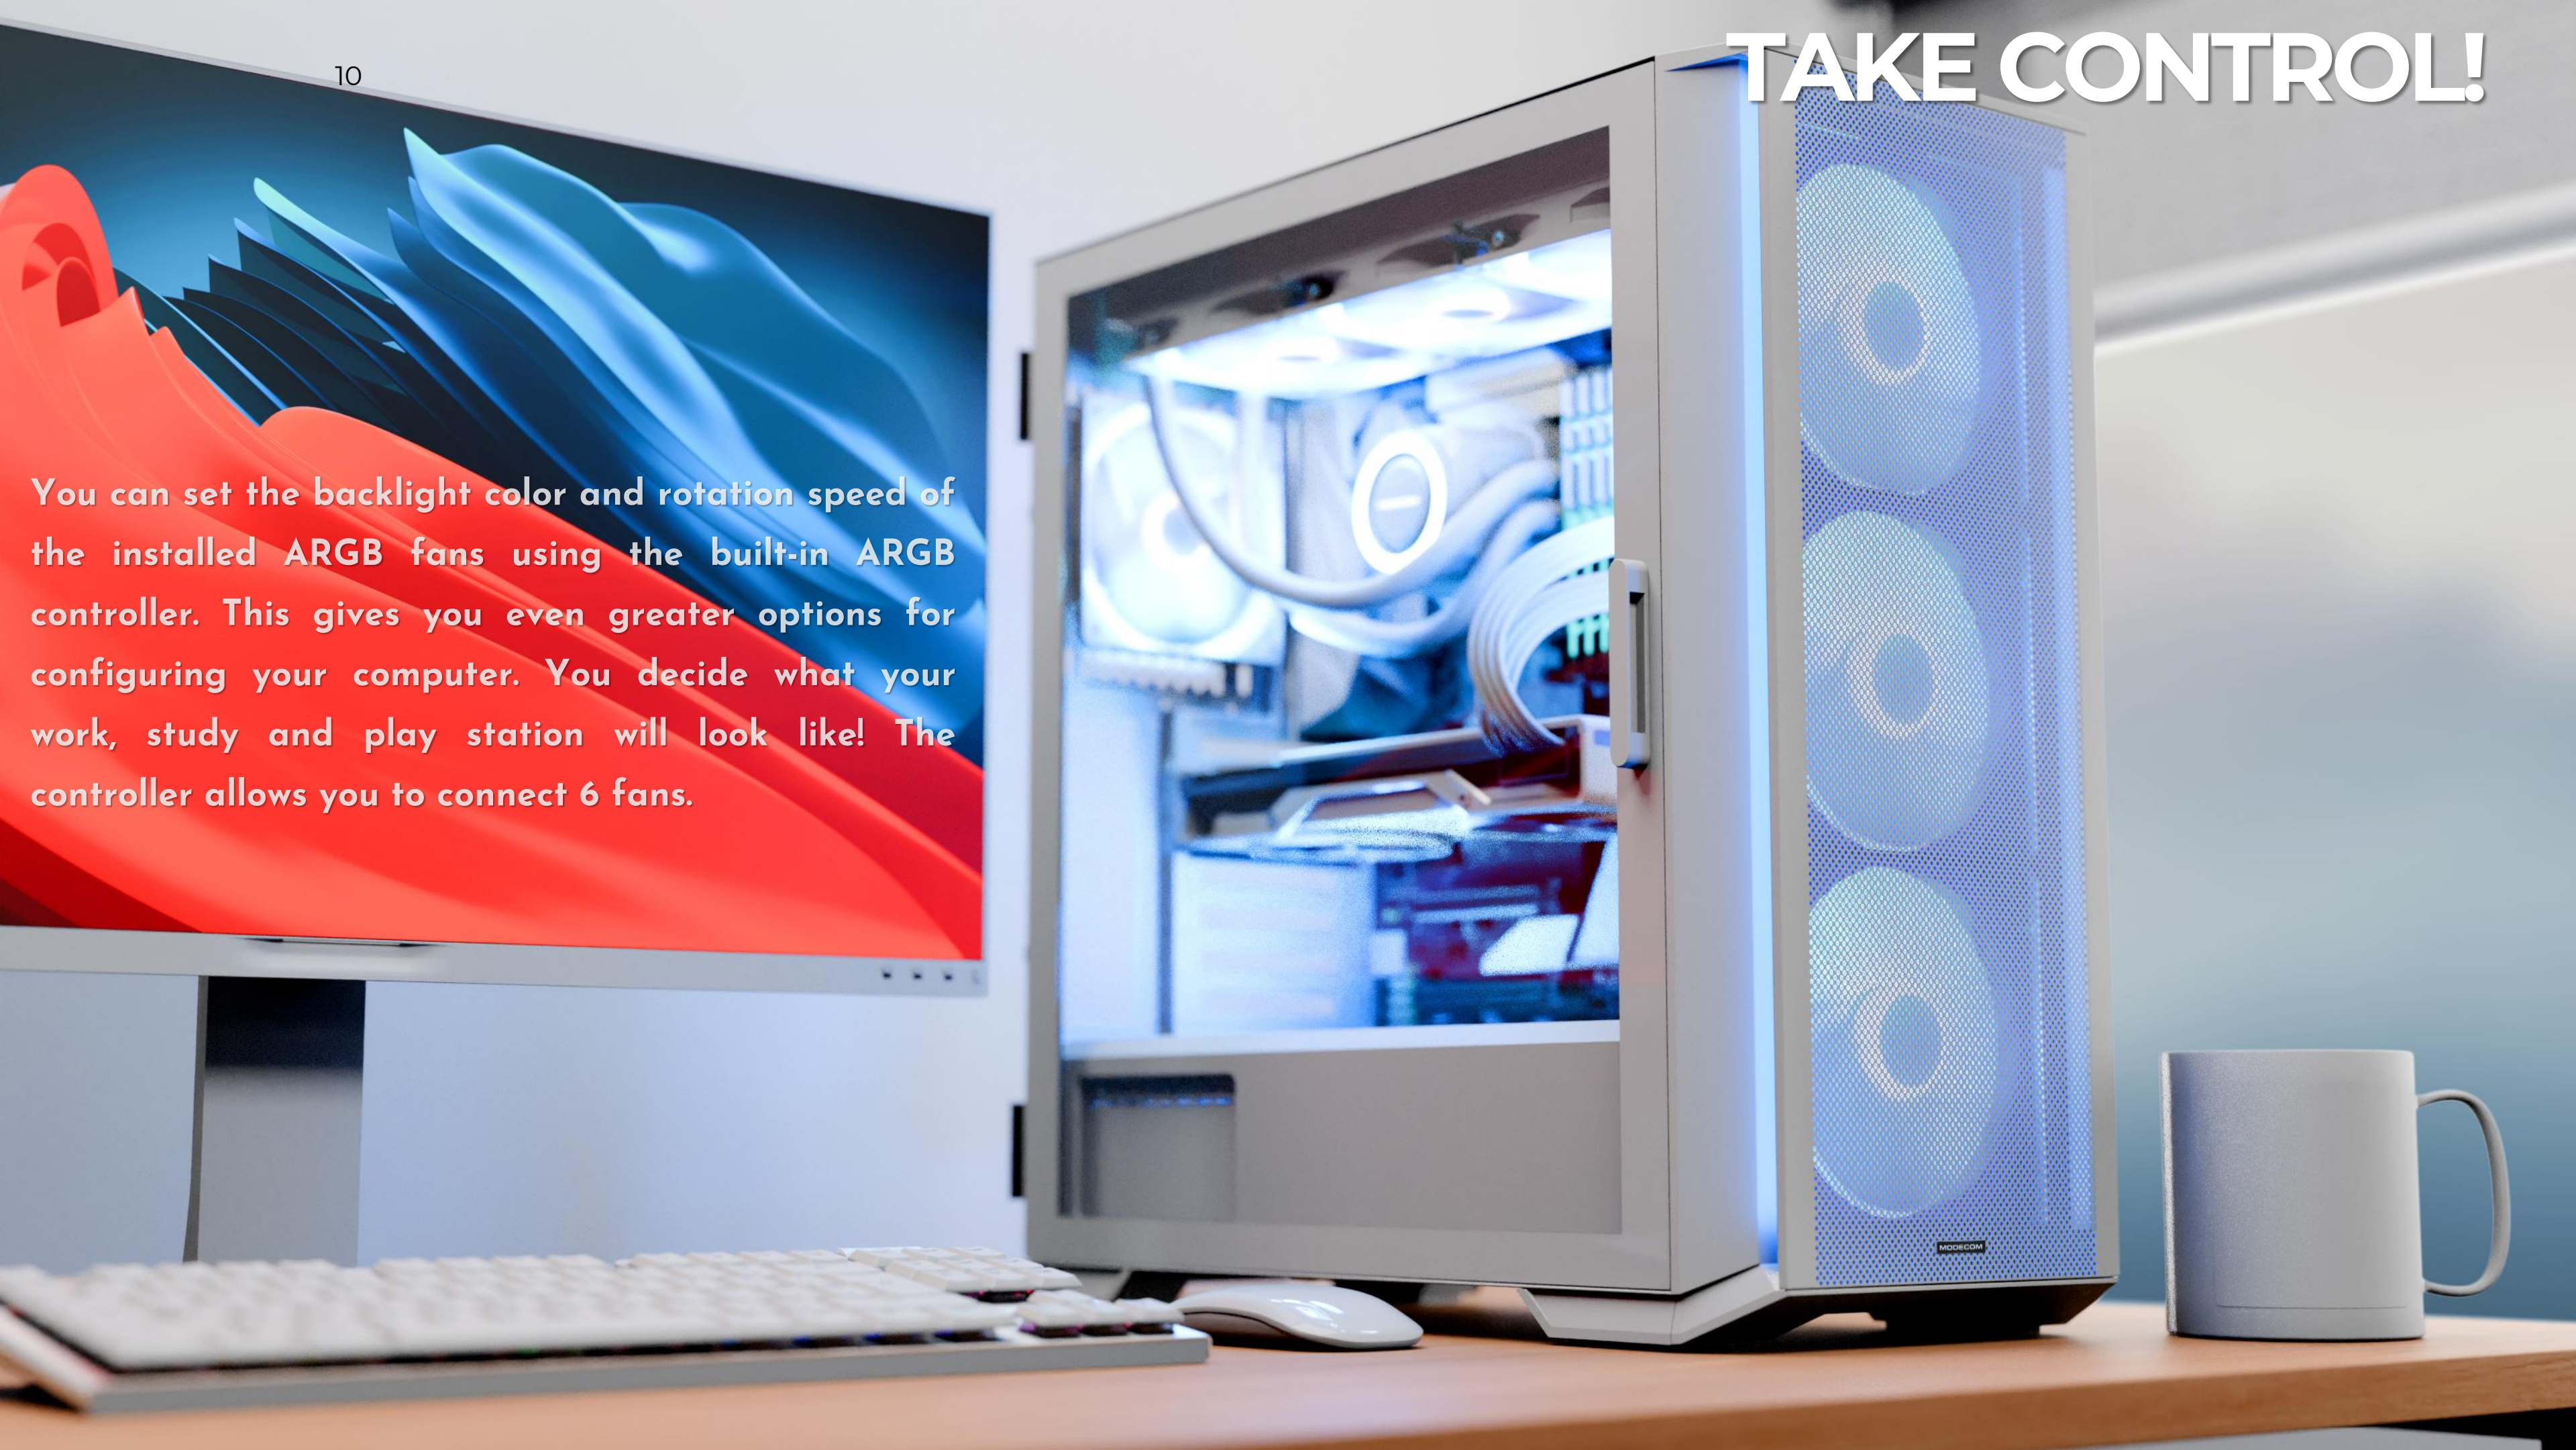

Two 2.5" SSD drives will find their place on the motherboard tray. Placed in a convenient place to connect, they are perfect as storage for games and programs.

The disk basket in the power supply tunnel allows the installation of two 3.5" HDD drives or a 1 x 2.5" SSD and 1 x 3.5" HDD configuration. You can also simply use 2.5" SSD media and install two such drives in the power supply tunnel.

If you add space for M.2 drives on the motherboard, the computer in the MODECOM Horizon will become a real storage room for games and documents.

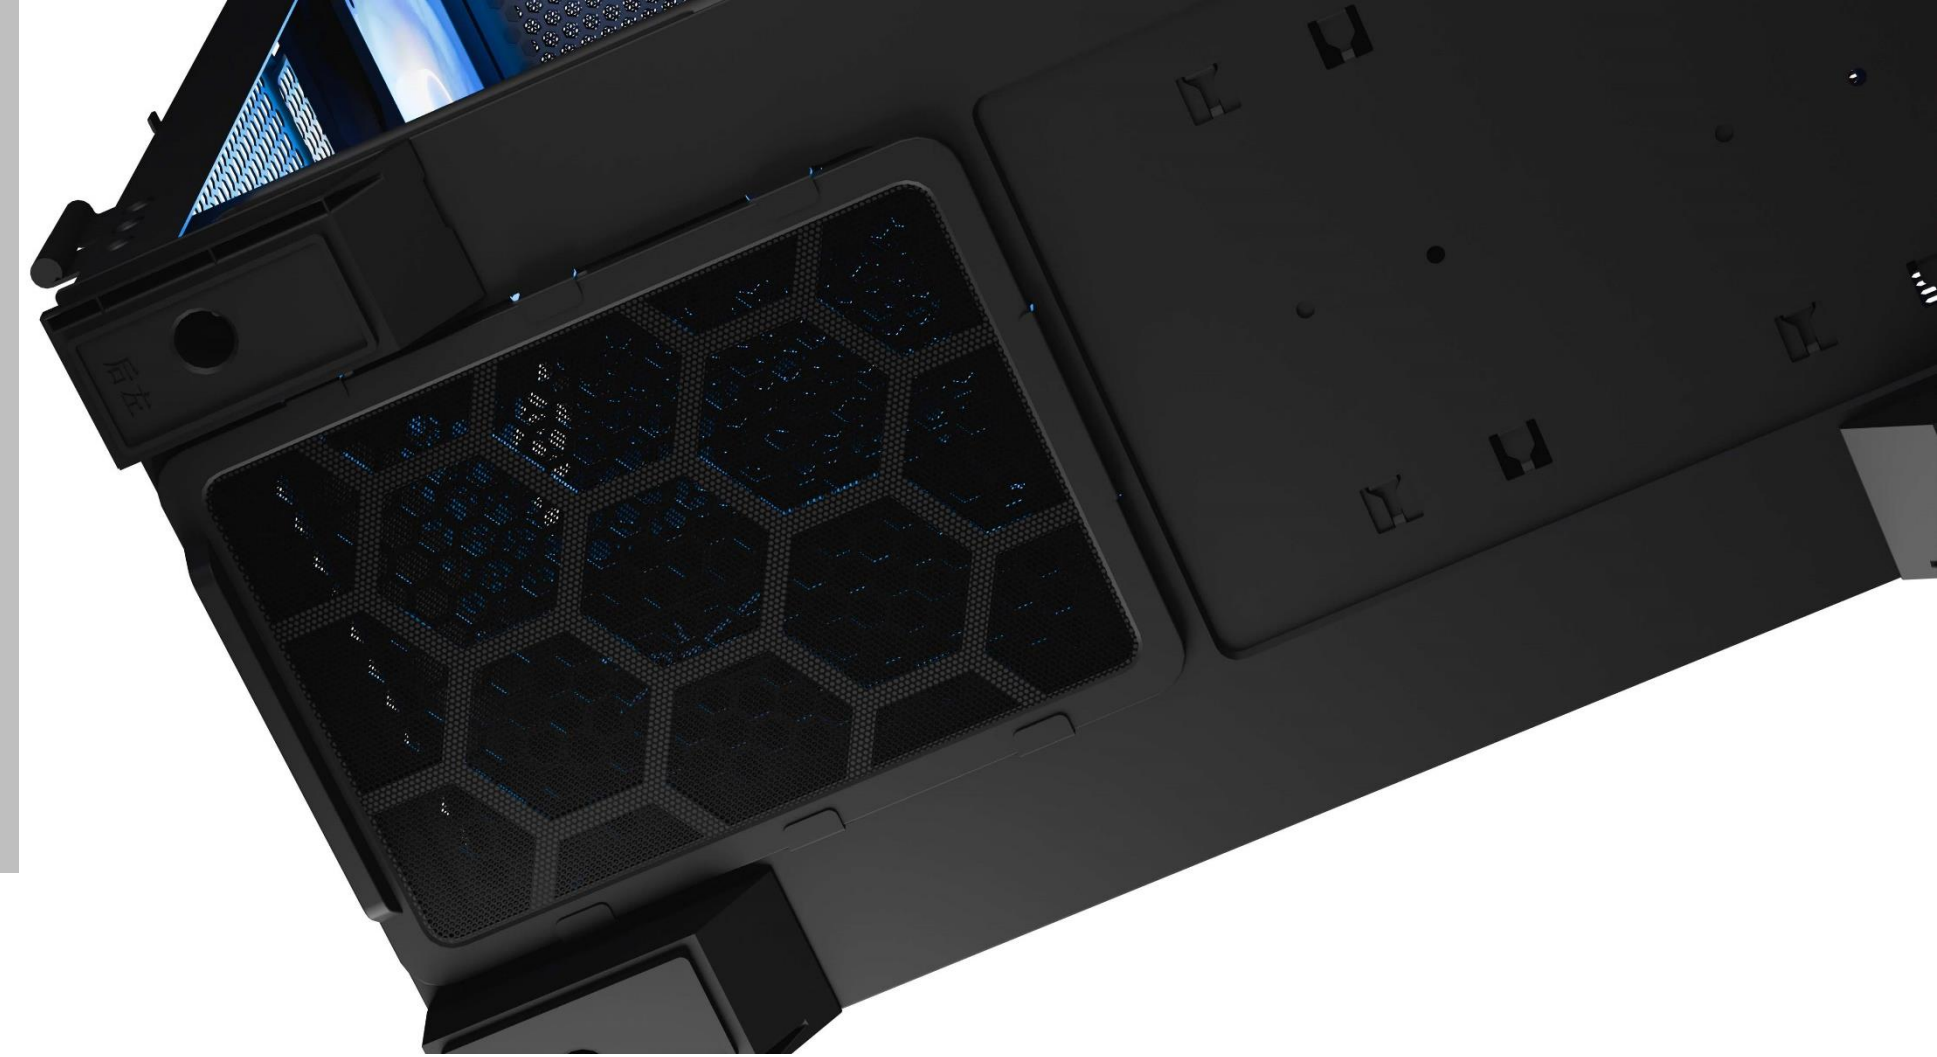

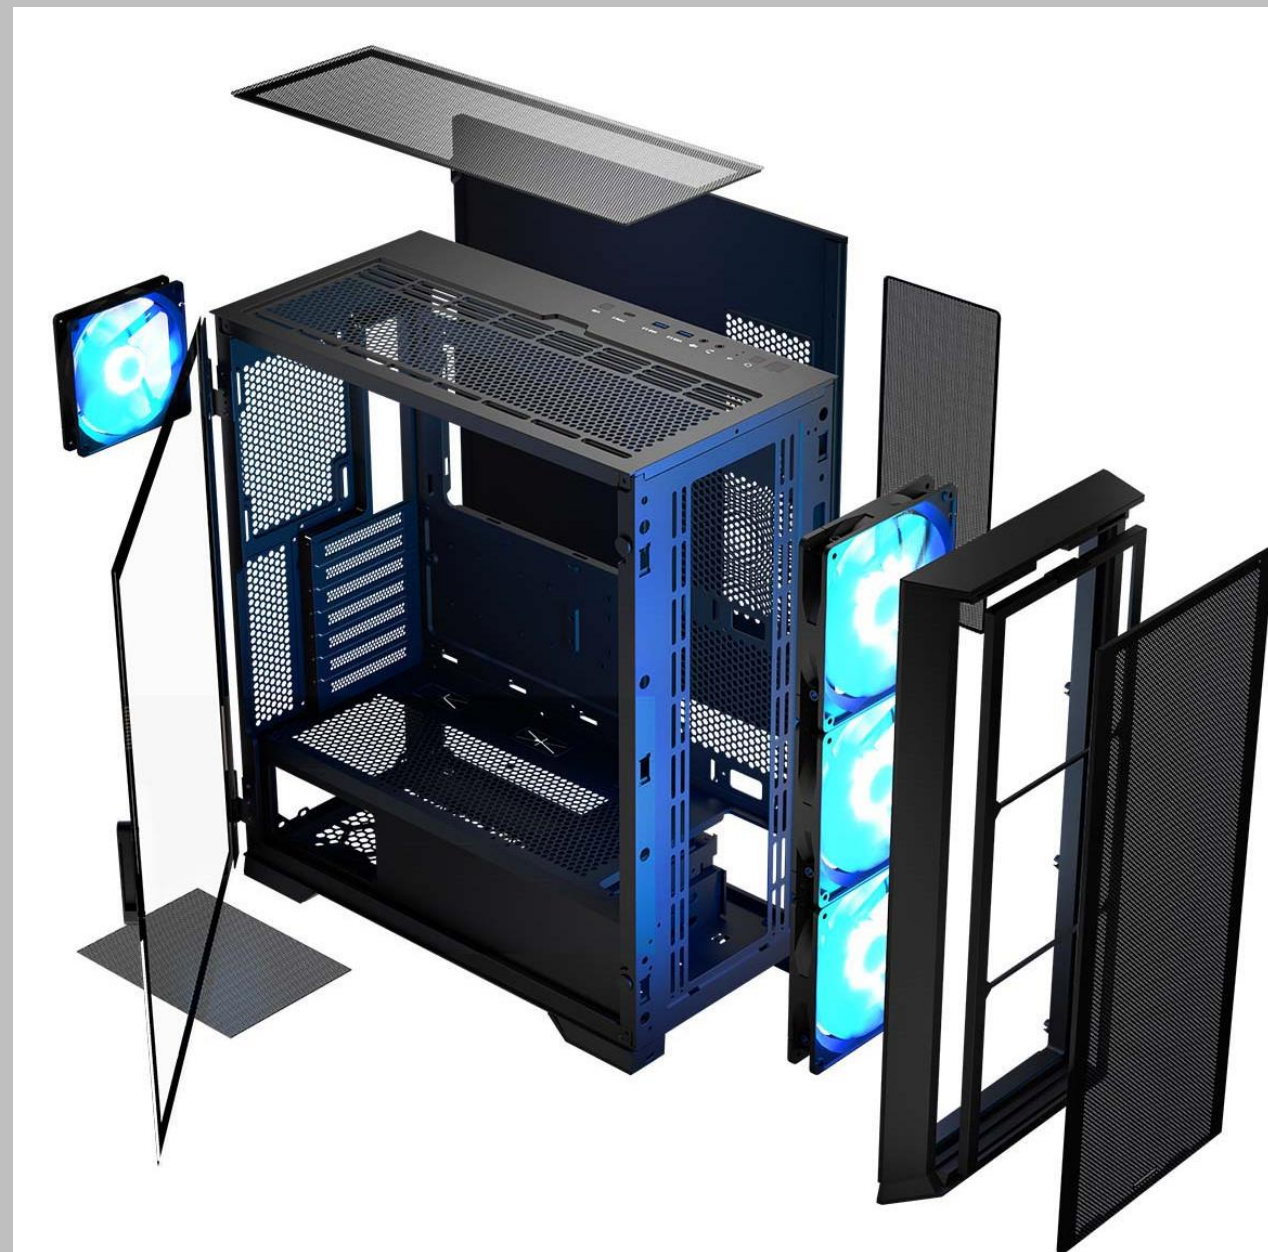

You can set the backlight color and rotation speed of the installed ARGB fans using the built-in ARGB controller. This gives you even greater options for configuring your computer. You decide what your work, study and play station will look like! The controller allows you to connect 6 fans.

DUST PROTECTION

DON'T YOU LIKE CLEANING? THAT'S GOOD!

10 / 10 IN THE RATING OF DUST PROTECTION

Provide your computer with the highest protection against dust and dirt by choosing the solutions implemented in the MODECOM Horizon. There are 4 dust filters - one under the power supply in an easily removable tray, the other on the front (also easily dismantled without having to remove the entire front panel), and the remaining two magnetically mounted on the side and top of the case.

The level of protection against dirt and dust is an example here.

MODECOM HORIZON

HIGH CLASS COMPONENTS

Are you planning to build your computer with high class components? Do you have a large E-ATX motherboard, high air cooling and a long graphics card and you're wondering how to fit it?

You can rest easy, your equipment will feel at home here - **there is room for air cooling up to 173 mm in height and graphics cards up to 400 mm in length.**

THE COLORFUL WORLD OF ARGB

Your place of work, study and entertainment does not have to be boring. All this thanks to illuminated ARGB fans. **You can set any favorite color and lighting mode to fit even better into the interior design.**

Your desk can take on interesting colors - take advantage of this opportunity!

MODECOM HORIZON

ERGONOMICS AND COMFORT

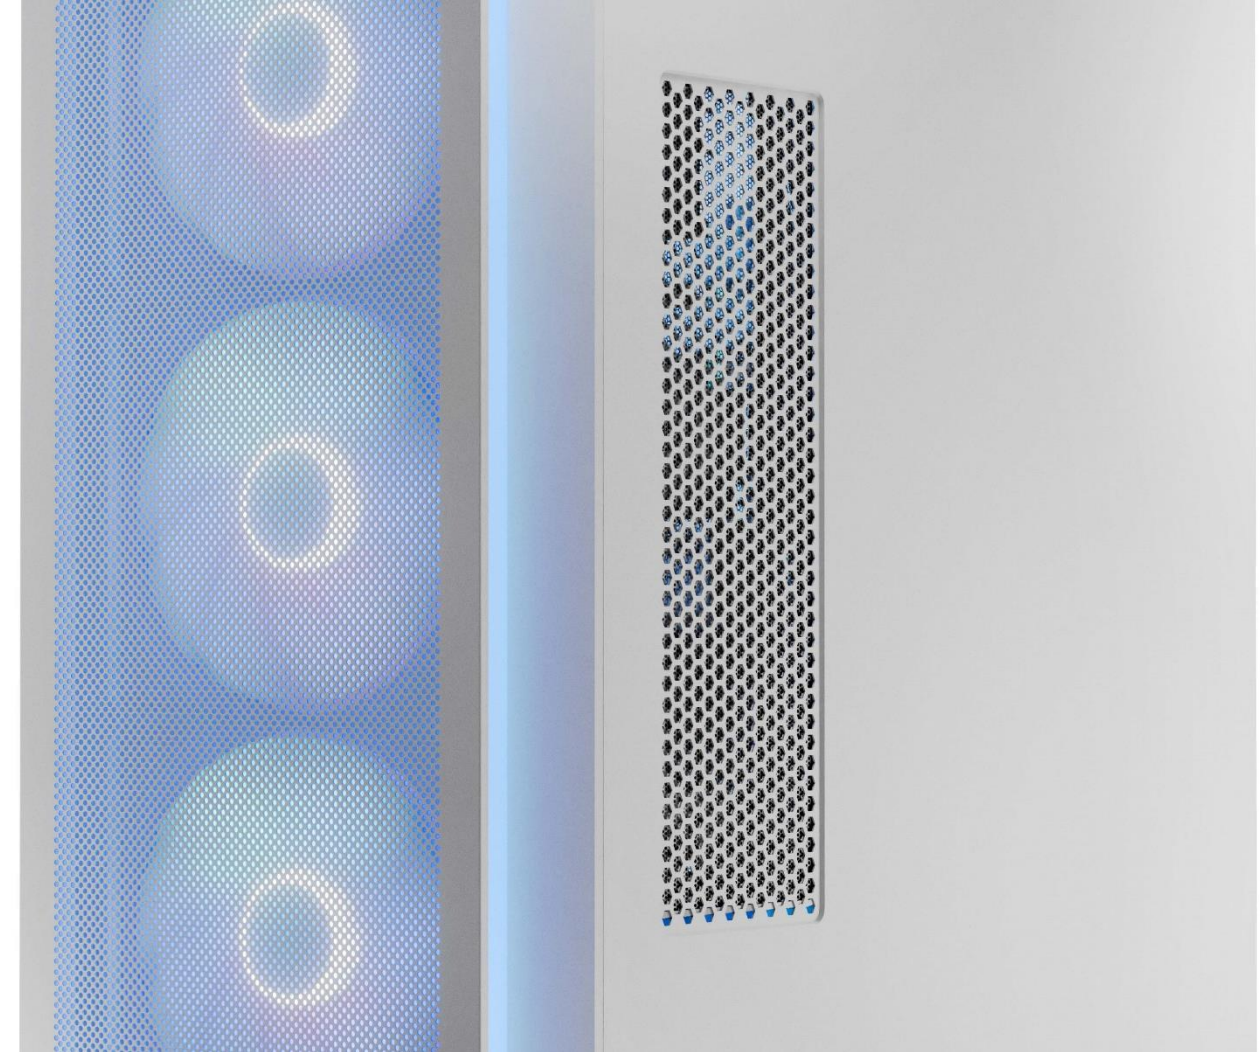

On the top panel we have placed two **USB 3.0** ports and one **USB-C** port. Thanks to this, you can conveniently connect a pendrive and other devices.

The panel also has an HD Audio input for a microphone and headphones, as well as a Power, LED and Reset button.

This solution is especially useful when the computer is placed on the floor at the desk - all ports are within easy reach.

DO IT YOURSELF - IT'S EASY!

PLEASURE OF INSTALLATION

PRACTICAL INTERIOR

Thanks to the opening doors and well-designed interior, assembling the computer is a pleasure. You receive practical solutions for convenient installation of components.

Building a computer in a MODECOM Horizon is a pleasure.

MODECOM HORIZON

PSU TUNNEL

When you are building an efficient and modern computer for gaming and fun, you need a powerful power supply.

In the MODECOM Horizon PC case, you can mount it in a dedicated tunnel, ensuring optimal and uninterrupted operation.

The maximum length of the power supply with the mounted disk basket is 260 mm. However, if you decide to dismantle the disk basket, you can install a 380 mm long power supply.

WATER COOLING? OF COURSE!

This PC case is ready for water cooling installation. If you decide that air cooling is not enough for you, **you can mount a radiator up to 360 mm on the top and front.**

There are many computer configuration options - decide for yourself which option will be best for you.

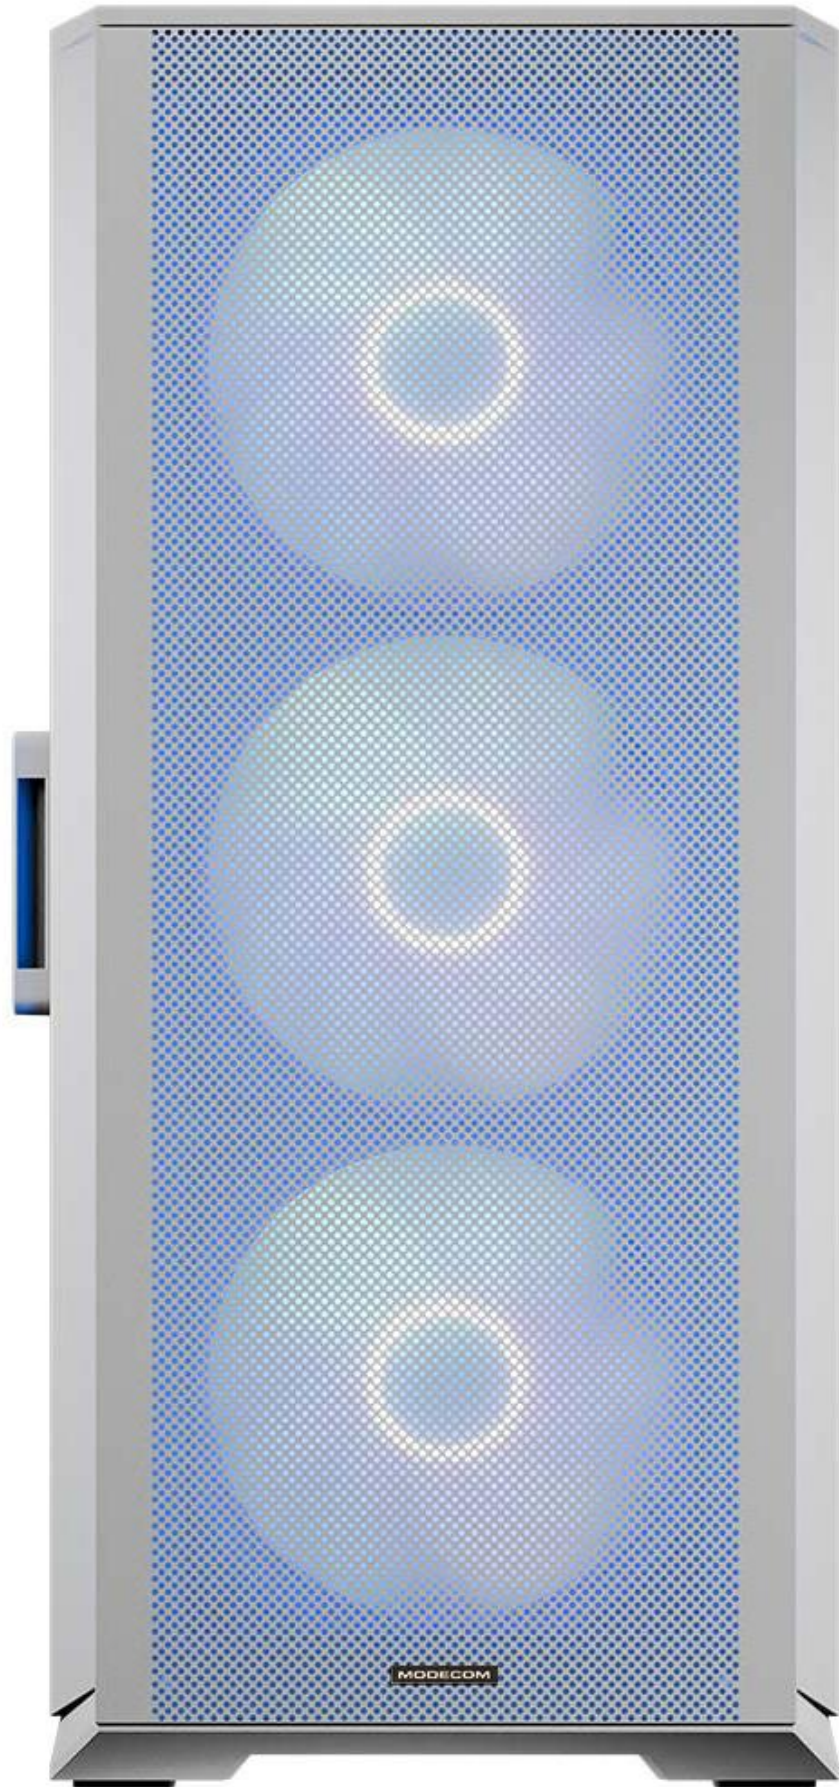

MODECOM HORIZON

UNIVERSAL MEANS GOOD

The high universality of the design will fit into the interior design of a modern office as well as a classically equipped loft. Additionally, it features proven solutions that will be appreciated by graphic designers, architects, photographers, etc. - wherever you need a computer with a powerful processor, a good graphics card and plenty of space for data storage media.

The versatility of the MODECOM Horizon case allows you to build a computer for work, study and fun.

MODECOM HORIZON

• • •

READY FOR EXPANSION

Three 140 mm ARGB fans and one 120 mm ARGB fan that you receive from us at the start after taking it out of the box are not enough? That's ok - you can install three 120 mm or two 140 mm fans on the top panel yourself. And if you decide that you need even more cool air, you can install two additional 120 mm fans at the height of the motherboard wall.

MODECOM HORIZON

• • •

PRACTICAL AND FUNCTIONAL

Convenient access to the interior by using the door means convenient ability to keep the computer clean thanks to removable dust filters.

MODECOM HORIZON

BIG OPPORTUNITIES

Installing large E-ATX motherboards offers great possibilities for computer configuration.

5 REASONS WHY IT'S WORTH HAVING IT

01. **4 PRE-INSTALLED ARGB FANS WITH CONTROLLER**

02. **PERFECT AIRFLOW**

03. **SIDE DOOR MADE OF TEMPERED GLASS**

04. **READY FOR E-ATX MOTHERBOARD**

05. **DUST FILTERS**

MODECOM HORIZON ARGB FLOW MIDI

Model	MODECOM Horizon
Front panel	Ventilated (mesh).
Top panel	Ventilated (mesh).
Side panel	Side panel door with tempered glass.
