Desirable silence

If you clearly separate the boundary between gaming equipment and equipment for work or study - this is the product for you. The switches are quiet and made especially for long hours of typing.

Scissor mechanism

The MODECOM MC-5200U keyboard is based on a scissor-type mechanism. The scissor mechanism owes its name to the movable and flexible handles, the shape of which resembles scissors. The key attached to the membrane with "scissor" handle, makes typing not only comfortable, but simply enjoyable. The keyboard user will have the impression that their fingers are flowing at an even pace on the soft and pleasant to touch keys. Scissor-type keys react very quickly to pressure. They also make a pleasant, very soft sound. This type of mechanism is commonly used in laptops.

Thanks to the technology used (a scissor mechanism well known from laptops), typing or working with numbers in the MS Office environment is a pleasure.
