High ergonomics allows you to use it for many hours - not only while playing your favorite games for many hours, but also while working or studying.

LED RGB

Full LED RGB backlight (16,7 million colors).

SOFTWARE

Dedicated software.

ANTI-GHOSTING

Full Anti-Ghosting.

QUALITY

High-quality materials, proven design.

RGB LED

RGB LED 16,7 million colors

TKL

Tenkeyless mechanical keyboard.

WELL KNOWN

Proven, tested and recognized by gamers design of the popular MODECOM Lanparty series.

ROTARY SWITCH

Rotary switch to change the backlight intensity or volume.

PORT USB

An additional USB port allows you to connect any device, e.g. a mouse or headphones.

NON-SLIP FEET

Non-slip feet on the bottom of the keyboard prevent it from sliding even during intense gaming.

TKL FORMAT

The small size of the keyboard means more space for the mouse.

SWITCHES

Gateron switches (brown / blue) with a lifetime of 50 million clicks.

DUAL INJECTION

The caps are made in the dual-injection technology. Wear-resistant and easy to replace or clean.

BACKLIGHT

The backlight color can be freely configured, both from the keyboard and software.

GATERON SWITCHES - IN A CLASS BY ITSELF.

MECHANICAL KEYBOARD

MODECOM Volcano Lanparty 2 is the successor to the popular and recognized Lanparty model, which won the hearts of gamers around the world.

Enriched with additional elements such as a rotary switch to control the volume and backlight and a USB port, it offers players practical solutions that make multimedia entertainment even more pleasant.

Gateron Blue or Gateron Brown switches are not only highly reliable, but also a pleasure to play, resulting from the specificity of their work.

The small, tournament-size keyboard (TKL) also means more room on the desk for the mouse.

DESIGN

The keyboard in the TKL format without the numeric section, is a design aimed strictly at gamers.

The smaller keyboard format gives the mouse more space on the desk, allowing it to move freely, even during intense gaming.

The TKL format is so universal that it will also work well while writing and surfing the Internet.

LANPARTY 2

MODECOM Volcano Lanparty 2 is a tournament mechanical keyboard designed for gamers, which offers optimal solutions for the greatest pleasure of playing.

There are many advantages of having it - Gateron switches, a convenient rotary switch for adjusting the volume of sound and button illumination, or an additional USB port and RGB LED backlight are only some of its attributes.

Meet MODECOM Volcano Lanparty 2

Enter the world of gaming and forget about the reality that surrounds you. Use the latest technological solutions and have fun. Or take advantage of its best features and spend your time comfortably while working or studying.

It's your choice, we only gave you the tool.

10 REASONS WHY YOU SHOULD HAVE IT

01. CONVENIENCE

The small size of the TKL keyboard means higher ergonomics. Wrists and hands are less tired, you can type or play the keyboard for much longer without unpleasant discomfort. There is also more space for the mouse.

02. LONGEVITY

Gateron Blue or Gateron Brown switches, indelible keys and high-quality materials - the keyboard will last for years.

03. DESIGN

RGB LED backlight 16.7 million colors allows you to define the appropriate color under your own preferences. Subtle backlight, or maybe a full range of colors? It is only your choice.

04. USB PORT

An additional USB port - you can connect a mouse or headphones to the keyboard.

05. ROTARY SWITCH

Conveniently adjust the volume or backlight with a rotary switch.

10 REASONS WHY YOU SHOULD HAVE IT

06. WORK OR PLAY

The keyboard is universal, but has a gaming character. It will work as a tool for playing, learning and working.

07. SOFTWARE

The software can be downloaded from the manufacturer's website - www.modecom.com

Thanks to it, you can adjust the keyboard to your own needs.

08. CERTAINTY

Thanks to the rubberized, non-slip feet, the keyboard lies firmly on the desk - it does not move even during intense gaming.

09. LOTS OF FUNCTIONS

Windows key lock and full Anti-Ghosting are useful functions for gaming. First of all, you will not accidentally go to the desktop and you will not lock the keys while playing.

10. MEET LEGEND

Keyboards from the MODECOM Lanparty series are a living legend - this model has been successfully and appreciated for years on the market in various configurations.

USB PORT

There is a USB port on the back of the keyboard, to which you can connect a mouse or headphones.

Accessories connected directly to the computer do not always have a sufficiently long cable or their connection is simply inconvenient.

Connecting the mouse or headphones to the keyboard is much better - the cable is coiled close to the gamer and thus increases the comfort while playing computer games.

Gaming and long-lasting character

High-quality Gateron switches (Blue or Brown) with a lifetime of 50 million clicks allow you to reliably enjoy computer games. Due to their design, they ensure the longevity of the gaming keyboard.

The use of high-quality materials and components, the perfect fit of every detail is not only a pleasure to use, but also the certainty that MODECOM Volcano Lanparty 2 will be a keyboard for years.

ROTARY SWITCH AND BUTTONS

The rotary switch (roller) to change the volume of the loudspeakers and keyboard backlight is located just above the arrows on the right.

There are two illuminated buttons next to the rotary switch (roller):

- One button defines the work of the roller by changing the keyboard backlight intensity or the volume of the sound coming from the speakers.
- The second button with the lock icon "locks" the selected mode.

01. WINDOWS KEY LOCK

Windows key lock prevents accidental pressing of the Windows key. Thanks to it, you will never see a situation where you will suddenly see your... desktop during the most exciting gaming situation. Remember that you decide when to end the game.

02. SOFTWARE

Thanks to the software you can record macros and program the keyboard backlight in any configuration. With these features, you can say the keyboard is REALLY YOURS.

03. FULL ANTI-GHOSTING

Most keyboards available on the market can detect just a few keys at a time. On keyboards with this restriction, gamers will not be able to use more key combinations that are required in many games. As a consequence, it limits the quality of entertainment and affects the results achieved in games. The keyboard is equipped with an advanced full anti-ghosting function, which gives the user unlimited freedom - with no limit to the number of simultaneously pressed keys. Thanks to it the keyboard is professional tournament equipment.

04. RGB LED

The keyboard is equipped with fully adjustable LED backlight in full RGB palette. You can create your own profiles in which only selected keys will be illuminated (adjusted to a specific game or to your own preferences).

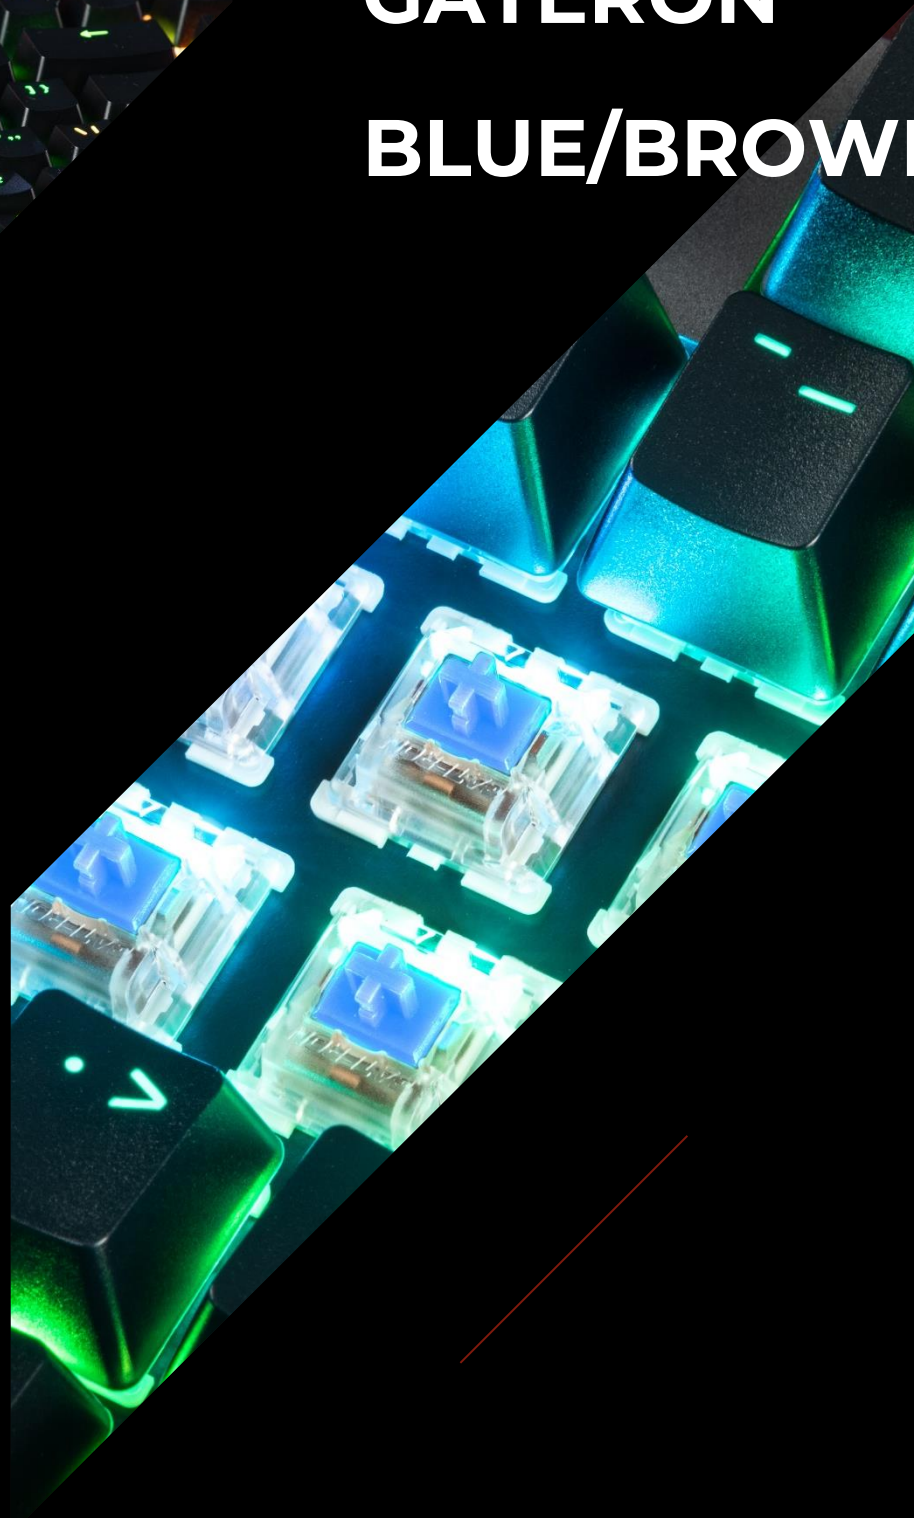

05. RUBBER, NON-SLIP FEET

We have placed four non-slip feet, thanks to which the keyboard will be stable even during the most exciting games.

06. DUAL INJECTION

The keyboard uses high-quality double-injection keycaps. An overlay made with this method consists of two separate elements: external (translucent) and internal with an overprint. Thanks to this method, the print will not wear off even as a result of intensive use.
