

# MODECOM VOLCANO 850 GOLD

850W.

80 PLUS® GOLD PLUS 230 V EU certificate.

Modern design.

### GOLD

80 PLUS® GOLD certificate 230V EU.

### POWER

850 Watt.

Perfect power for modern gaming computers.

### MODULAR

The power supply has fully modular cabling.

### DESIGN

Modern design perfect for PC case with glass panel.

### HIGH QUALITY

The use of high-quality materials during production ensures durability.

### HIGH EFFICIENCY

High efficiency – at least 92% efficiency at 50% load, at least 90% efficiency at 20% load and at least 89% efficiency at 100% load power.

### PROTECTION

A number of protections against short circuits and overloads.

### GAMING

The power supply is a perfect choice for any gaming computers.

### FAN

Silent and efficient 120 mm fan.

**POWER 850 W**

Large amount of power suitable for most gaming computers.

**STABLE POWER**

Powerful single power line Super +12V.

**DESIGN**

Interesting design of the power supply, which looks good in PC cases with tempered glass side panel.

### FULL MODULAR

Fully modular wiring with long flat cables - significantly reduces jumbled wires inside the chassis and increases airflow.

### 80 PLUS® GOLD 230V EU certificate.

High efficiency.

### FAN

120 mm - quiet and efficient fan.

### COMPONENTS

High-quality transistors and capacitors.

# KEY FEATURES

- Intel® ATX 12V Version 2.31
- 850 Watt of continuous power provides adequate power reserve
- Very high efficiency - over 92% at 50% load (confirmed with official 80 PLUS GOLD 230 V EU certificate)
- Working in the full range of voltage 100~240V
- Active PFC (PF - 0,99)
- The most durable technology configured for 80 PLUS GOLD 230V EU power supply
- DC2DC circuit of durable structure, produced with the use of the new technology - supports SVGA cards
- Japanese capacitors
- High quality transistors
- The highest electromagnetic efficiency
- Using radiators made from almost pure aluminium (99%) increases giving heat off by up to 60%
- Powerful single power line Super +12V
- Silent fan 120 mm
- Fully modular wiring with long flat cables - significantly reduces jumbled wires inside the chassis and increases airflow

## 850 W

Allows you to power new gaming components such as a graphic card or processor.

## FULLY MODULAR

Significantly reduces jumbled wires inside the chassis and increases airflow.

## 80 PLUS® GOLD 230 V EU

80 PLUS GOLD 230 V EU certificate means high energy efficiency.

# GOLD

**80 PLUS GOLD 230 V EU CERTIFICATE** - the power supply has at least 92% efficiency at 50% load, at least 90% efficiency at 20% load and at least 89% efficiency at 100% load.

# VOLCANO 850 GOLD

## PSU FOR GAMING

MODECOM Volcano 850 Gold is an efficient power supply that will be perfect for personal computers dedicated for gamers. 850 Watt is a sufficient power for the processor, graphic card and other gaming components. It ensures stable operation for many hours, especially during intense gaming. The fully modular design allows better organization of the computer interior, while having a positive effect on air circulation.

The power supply uses technology to protect often expensive components, and at the same time a strong 12V line allows you to build an efficient gaming unit.

## DESIGN

The power supply is one of the most important components in a computer. Not only does it have to provide a stable supply of electricity, but at the same time protect the components against voltage surges. In addition, it should have sufficient power to ensure stable operation of the graphic card or processor.

MODECOM Volcano 850 Gold is designed to ensure safe and stable operation of gaming computers. Its gaming purpose has been emphasized by an extraordinary case and design that looks great on computers with a tempered glass side panel.

Now, when you look at your computer, you know that it has a power supply that will not fail even during long hours of gaming sessions.

## MODECOM VOLCANO

Volcano power supplies series were designed for gamers and their gaming computers. The high power of the power supply and numerous protections allow you to power even complex gaming units with high power demand. They allow you to power overclocked processors and graphic cards, ensuring their continuous and safe operation.

# Meet PSU MODECOM VOLCANO 850 GOLD

Enter the world of gaming and forget about the reality that surrounds you. Choose a power supply that will allow your computer to work safely and for a long time. Don't worry about power and stable operation, even when all components are working at 100%.

# 10 REASONS WHY YOU SHOULD HAVE IT

01. **POWER**

850 Watt of the power supply means that all gaming components will be supplied with the right dose of power.

02. **LONGEVITY**

High-quality components allow you to power the computer for years.

03. **DESIGN**

Modern design that will be perfect for PC cases with a tempered glass side panel.

04. **QUALITY**

High quality of transistors and capacitors.

05. **SAFE**

A number of protections against overloads, voltage changes and short circuits.

## 10 REASONS WHY YOU SHOULD HAVE IT

06. **GOLD 80 PLUS** 80 PLUS Gold 230 V EU certificate - it is a proof of the high energy efficiency of the power supply.

07. **FAN** 120 mm quiet and efficient cooling fan.

08. **100% MODULAR** Fully modular wiring with long flat cables - significantly reduces jumbled wires inside the PC case and increases airflow.

09. **SINGLE POWER LINE 12V** Powerful single power line Super +12V. Max power 828 W.

10. **FOR GAMING** The power supply is perfect for gaming computers - its design and components will power even a powerful gaming computer.

## 100% MODULAR WITH FLAT CABLES

All PCI-E cables are detachable, which allows them to be better managed while maintaining not only order, but also optimal air circulation inside the case.

Flat cables allows them to be managed even better in the PC case.

# VOLCANO 850 GOLD

## Up to 42% energy savings

The power supply saves up to 42% of electricity compared to an ordinary power supply. It allows you to work not only efficiently but also economically power the computer.

As a result, it also generates less heat, which also benefits the overall temperature inside the computer.

## 01. SAFE POWER

Volcano power supplies provide safe power for each gaming unit. They protect your computer's components from surges and voltage fluctuations.

## 02. DESIGN

Modern design perfect for gaming computers.

## 03. STABLE POWER

Regardless of how demanding games you run - the power supply ensures stable operation of the entire computer.

## 04. 100% MODULAR

Better cable organization inside the computer and better airflow.

## 05. ECONOMICAL AND QUIET

The power supply fan is quiet, so you can focus playing your favorite game. The applied technological solutions reduce the energy demand compared to ordinary power supplies.

## 06. 80 PLUS GOLD

The power supply is 80 PLUS Gold certified. You can be sure that it is efficient and provides adequate power to all computer components.

## Model

## VOLCANO 850W GOLD

Power	850 Watt
Format	ATX
Power supply standard (ATX)	2,31
Power Factor Connection	Active (APFC)
Performance at 50% load	92%
Mean Time Between Failures	100 000 h
Wiring	Modular, flat cables
Number of power plugs 4-pin (HDD/ODD)	4 pieces
Number of power plugs 4-pin (FDD)	1 piece
Number of power plugs Serial ATA	8 pieces
Number of power plugs 6+2-pin (PCI-E)	4 pieces
Power plug type +12V	4+4 pin; EPS12V
Number of power plugs +12V 4+4-pin (EPS12V)	1 piece
ATX connector	20-pin + 4-pin
Power supply chassis	Black 0,8 T
Fan	120 mm
