LS-20 Speakers

Logic Concept LS-20 is a 2.1 speakers system, which consist of two satellites and one subwoofer. Logic LS-20 is speakers set dedicated especially for the computers and other multimedia devices. It is a perfect proposal for anyone who is looking for a compact speaker to its own PC or laptop. Each satellite speaker has a 3W power output, whilst subwoofer has a 5W. Thanks to the parameters Logic LS-20 is an interesting option for those who are looking for audio system, that is designed in an interesting, minimalist design and does not occupy much space on a desk. Its compact size and lightweight construction allows easy transportation (for example from home to meeting with friends). Powered by a USB cable, speakers deliver the power of joy for all users when watching videos or having fun with any other multimedia entertainment. Logic LS-21 is available in three colors: black, white and blue.
